Chairman's Statement

Dear Shareholder,

Introduction

We live in unprecedented and challenging times; COVID-19 has had a huge impact across the oil and gas industry and, coupled with the recent dispute over oil production volumes between Saudi Arabia and Russia, has led to a very significant drop in oil and gas prices. Our operations in Tanzania are essentially protected from such movements due to current zero production and a future gas price that is not pegged to the oil price. My statement that follows is therefore offered against this backdrop of uncertainty.

Despite another year of frustration, due to the continued ongoing delays to obtaining the approvals required to progress our business interests in Tanzania, 2019 was a year of change at Aminex, beginning with my appointment as Chairman in February and the appointment of Tom Mackay as Interim Chief Executive Officer in May, following the departure of Jay Bhattacharjee. These appointments followed that of Linda Beal as a Director in January. In September, Robert Ambrose replaced Sultan Al-Ghaithi as one of the two nominated Non-Executive Directors appointed by our major investor and shareholder, Eclipse Investments LLC, an associated company of The Zubair Corporation. While the Board settled into these changes, we continued to eagerly push for approvals from the Tanzanian government to facilitate the conclusion of our Farm-Out of a 50% interest in the Ruvuma PSA to another associated company of The Zubair Corporation ("Farm-Out"), ARA Petroleum Tanzania Limited ("APT").

This Farm-Out, long in the making, continues to excite the Board for what it can deliver to the Company. As previously described, once completed, the Farm-Out should see the Company fully carried to material levels of production and revenue without the need to return to shareholders for any additional funding for Ruvuma.

While we continued to experience delays to this game changing project, the Board was conscious in the intervening period to use time wisely. By reducing corporate overheads, including reducing General and Administrative costs ("G&A"), we succeeded in achieving better efficiencies whilst maintaining capability and competency, thereby building a more robust derisked business that would assist in creating

or attracting strategic opportunities. In this period, we have conserved capital, and reduced the impact on shareholders and I am happy to report that we have successfully achieved significant gains in these areas. However, the very recent effects of the COVID-19 virus and its impact on the oil price may lead to a further round of cost cutting and consolidation during this new period of high uncertainty whilst we wait to receive the Tanzanian government consents.

2019 Activity

In February, we took a strategic decision to complete a fundraising for US\$2.36 million to accelerate development over our Kiliwani North Development Licence and Nyuni Area PSA and take advantage of depressed market conditions in the service industry whilst awaiting completion of the Farm-Out. With this capital, we were able to reprocess existing 2D seismic and plan for the acquisition of new 3D seismic over both the Kiliwani North Development Licence and the area adjacent within the Nyuni Area PSA.

We continue to see value in Kiliwani operations and have looked into remedial work to restart production from our Kiliwani North well. In August, we updated shareholders on this process and noted that we continue to seek to source equipment to perform the re-entry and remedial work which has been designed to be carried out at minimal cost. Unfortunately, we continue to await upon approvals from the Tanzanian authorities to commence the operations and look forward to updating shareholders on progress in due course.

In March, following discussions with APT, we agreed to extend the longstop date of the Farm-Out until 31 July 2019. In subsequent announcements we have since further extended the longstop date to 30 June 2020 and have agreed that another associate company of The Zubair Corporation, ARA Petroleum LLC ("ARA") will provide a US\$3 million advance in instalments to the Company, ahead of completion of the Farm-Out; providing the Company with financial support pending completion. Whilst it is frustrating to experience these continual delays, we are pleased that we have the continued support from ARA to persevere and close the Farm-Out. With this support, it is clear that ARA and APT are aligned with the joint venture parties in recognising the value of our interest in Ruvuma and are focused in seeing this project through to production.

In June, we decided to cancel our listing on the Euronext Dublin exchange as a necessary step to secure the appropriate flexibility afforded by the transfer to the Standard listing segment in London. This was a step which helpfully dovetailed with our focus on reducing expenditure.

Towards the end of the year, in November, the Company announced that Max Williams was to step down from the Board and from his position as Chief Financial Officer and be replaced by John Arthur via an internal promotion.

Tanzanian Developments

During 2019 and 2020 we have been focused on satisfying the various conditions precedent for completion of the Farm-Out and, as reported earlier this month, the Company received the Mtwara Exploration Licence. As part of the ongoing process to obtain Tanzanian Government approval,

the Company, with the support of its Tanzanian tax adviser, has been in discussions with the Tanzania Revenue Authority ("TRA") regarding any taxes payable on the Farm-Out. All taxes must be paid before the TRA can grant the necessary Tax Clearance Certificate which is a legal requirement to enable the Minister of Energy to approve the Farm-Out. The TRA's assessment of the Capital Gains Tax ("CGT") on the Farm-Out was US\$2.2 million. The Board decided that although it disagreed with the basis for the CGT calculation, following a period of intensive discussions with the TRA to reduce the CGT, to avoid further potential significant delays, it was in the best interests of the Company to accept this CGT charge in order to expedite the completion of the Farm-Out, which delivers considerable value to Aminex and its shareholders. ARA has agreed in principle to provide a further advance of US\$2 million to Aminex to enable the Group to pay the monies due to the TRA, which will be repaid to ARA from the consideration due on completion of the Farm-Out. The TRA have confirmed that on receipt of the CGT, plus stamp duty payable by APT, they will issue the Tax Clearance

Certificate, which allows the Minister of Energy to grant his approval to the Farm-Out. The Tax Clearance Certificate and the Minister's approval are the only remaining conditions for completion of the Farm-Out. We remain in close contact with the Tanzanian government and the relevant authorities to ensure the Farm-Out is completed as soon as possible.

Our 2020 Work Programmes and Budgets, for all licences in Tanzania, have been submitted to the government for approval and includes a gross contingent budget of approximately \$40 million for Ruvuma PSA. The programme includes the drilling of the Chikumbi-1 well and the acquisition of an extensive 3D and 2D seismic survey over the Mtwara Licence, pending completion of the Farm-Out. I would remind shareholders that we will be fully-funded, as per the terms of the Farm-Out Agreement, for these activities. We further noted that ARA has appointed a management team to oversee its Tanzanian operations and agreed to fast-track select Chikumbi-1 well pre-drilling activities.

There remains a significant and rising energy supply weakness in Tanzania, particularly when considered against demand, which highlights the importance of assets like Ntorya. We would also note to shareholders that we are likely to be supplying gas domestically and are therefore less impacted by global commodity price weakness once in production.

Outlook

This month, Robert Ambrose was appointed Interim Chief Executive Officer of the Company and Tom Mackay stepped down from his position of Interim Chief Executive Officer and as a Director of Aminex. I am delighted that Robert has agreed to become Interim Chief Executive Officer at this exciting time for the Company. I consider that the Company has a balanced and diverse Board with the requisite skills to source and assess future strategic growth and consolidation opportunities as it transitions from operator to non-operator of its key asset.

Despite the COVID-19 pandemic and these unprecedented challenges, in looking forward, I remain positive about the future of your Company whilst recognising that 2019 has been another frustrating year for shareholders. We have excellent assets in Tanzania, we have the financing to advance the Ntorya project on completion of the Farm-Out and we have an outstanding partner in APT, all of which will help to drive real growth and change in-country.

We sincerely believe that the gas sector in Tanzania is gradually unlocking after two years of stagnation, with the government working hard to deliver prosperity for its citizens.

I would like to close by thanking shareholders for their continued support and my gratitude to all the staff of Aminex and its subsidiaries, who continue to endure and work hard on delivering value from our portfolio. I look forward to providing further positive news on our activities throughout 2020.

Yours sincerely,

John Bell
Chairman

Chief Executive's Review

Introduction

I am pleased to present my first review after taking up appointment as Interim Chief Executive Officer this month. 2019 began with shareholder approval for the farm-out of a 50% interest in the Ruvuma PSA to The Zubair Corporation, a significant shareholder in Aminex through its investment company, Eclipse Investments LLC. Over the course of the year, the completion of the Farm-Out remained a primary focus for the Company but as we all know, it has been subject to ongoing delay. Fortunately, we have begun to see positive signs that the Tanzanian Government is working with producers in country to support Tanzania's power demands which is well in excess of current supply. We therefore remain extremely optimistic about the future of this project and what it will mean to the people and Government of Tanzania.

2019 also saw the appointment of John Bell as Chairman and Tom Mackay as Interim Chief Executive Officer upon the departure of Jay Bhattacharjee due to ill health. Together, John and Tom have overseen a policy of increased cash preservation and the significant reduction of G&A costs as we await the vital but essential government approvals.

Review of Operations

At the start of the year, we successfully raised US\$2.36 million which enabled the reprocessing of 2D seismic primarily over the Kiliwani North Development Licence and adjacent Nyuni Area PSA and the design of a relatively low-cost remediation intervention on the Kiliwani North-1 development well, approval for which remains outstanding with the Tanzanian authorities.

With respect to the ongoing Ruvuma Farm-Out and the drilling of the eagerly awaited Chikumbi-1 well, the Company and APT progressed on closing out and satisfying all conditions precedent within both parties' control for the Farm-Out to complete, including all joint venture partner approvals. We announced this month that we had received the long-awaited extension of the Mtwara Exploration Licence. The only condition still outstanding is the approval by the Tanzanian Government of the transfer of the 50% interest in the PSA and operatorship. Closing out the Farm-Out remains the Company's top priority and the Company and APT continue to work closely with the Tanzanian authorities to conclude these conditions precedent as soon as possible.

We are pleased that towards the latter part of 2019 and continuing into 2020, the Government has been seen to be actively resolving several long-standing issues with other operators in country to support Tanzania's growing power demands. These movements have provided confidence to the Company and APT and as such, we agreed to fast-track select Chikumbi-1 "pre-drill" activities with APT.

Meanwhile, the Company has applied for a 3-year extension of the Nyuni Area PSA with a revised work programme.

Financial Position

Aminex and ARA signed an advance funding agreement, whereby ARA will provide a US\$3 million advance in instalments to the Company, ahead of Completion of the Farm-Out, payments of which started in November 2019. Such payments were due to be paid as the first tranche cash consideration upon completion of the Farm-Out. Moreover, it was agreed to advance payment of the second tranche of the US\$2 million from 180 days after Completion of the Farm-Out to payment upon Completion.

The Company has continued with its commitment to reduce its G&A related expenses and to preserve cash in view of the delays to the completion of the Farm-Out and the lack of a resolution of the outstanding payments for gas sales to the Tanzania Petroleum Development Corporation ("TPDC") for Kiliwani North's past production.

An important administrative decision was made earlier in the year which saw the transfer of the Company's Premium listing to a Standard listing on the London Stock Exchange and a delisting from the Irish Stock Exchange. This has reduced the administrative burden on the Company and provides greater financial flexibility for a company of our size, market capitalisation and cash resources.

New Opportunities / Outlook

We continue to see an opportunity to meet the strong structural demand for domestic power in Tanzania and believe in the significant potential of our assets to deliver value for shareholders, from a low-cost base, which we have worked tirelessly to achieve this year.

The impact of COVID-19, since the UK and Irish Governments introduced measures to initially contain the spread of the virus in early March 2020, has had a profound effect on the industry and also on the daily operations of your Company. For example, we immediately introduced measures to promote hygiene and self-distancing within our office environments in both London and Dar es Salaam and have since followed with a "work from home" policy that has been successfully implemented in the UK. We continue to closely monitor the development of the virus within Tanzania and its potential impact on local operations.

During this period, the underlying value of our portfolio has been relatively unaffected due to its focus on gas rather than oil and the gas price in Tanzania is not pegged to the oil price. Furthermore, as first gas for Ruvuma is still some time away it is expected that the crisis should have abated by that time. However, we recognise that during this period of uncertainty, global equity markets will be severely impacted.

Although we remain focussed on the development of our Tanzanian assets, we recognise both the importance and expectation amongst our shareholders to diversify our portfolio and we continue to seek new development-led opportunities which could provide near-term revenues to the Group.

Robert Ambrose
Chief Executive Officer

Finance Review

Revenue from Continuing Operations

Revenues from continuing operations amounted to US\$0.36 million (2018: US\$0.62 million). Group revenues during 2019 are derived from oilfield services comprising the provision of technical and administrative services to joint venture operations: the revenues were US\$0.36 million for the year ended 31 December 2019 (2018: US\$0.57 million). The Group generated no gas revenue during 2019, due to no production from the Group's producing asset, the Kiliwani North-1 well. During 2018, production from the Kiliwani North-1 well was 0.03 BCF of which Aminex's share was 0.01 BCF generating revenue of US\$0.05 million.

Cost of sales was US\$0.81 million (2018: US\$2.02 million). The cost of sales for Kiliwani North operations amounted to US\$0.45 million (2018: US\$1.41 million) and included the design of a remedial work programme intended to establish fluid levels in the wellbore, reservoir pressure and to unload fluid using foam treatment technology. The Group awaits approval from the relevant Tanzanian authorities to commence the well remediation work. There was no depletion charge for Kiliwani North during the year due to the well not producing in 2019 (2018: US\$0.04 million). The balance of the cost of sales amounting to US\$0.36 million (2018: US\$0.57 million) related to the oilfield services operations. Accordingly, there was a gross loss of US\$0.45 million for the period compared with US\$1.40 million for the comparative period.

Group administrative expenses, net of costs capitalised against projects, were down by US\$0.92 million to US\$2.41 million (2018: US\$3.33 million). The expenses for the current period include a share-based payment charge of US\$0.37 million relating to options granted during 2019 (2018: US\$0.58 million). During the year, management initiated a range of measures to reduce costs in light of the ongoing delays in completion of certain conditions precedent with the Tanzanian Government and authorities related to the Farm-Out transaction on the Ruvuma PSA. The second half of 2019 saw a reduction in the numbers of Executive Directors and staff resulting in a decrease in gross employment costs

for the year of US\$0.34 million from US\$2.98 million in 2018 to US\$2.64 million in 2019, equivalent to a 11% drop before one-offs. Adjusting for redundancy and settlement payments during 2019 gross employment costs were down US\$0.48 million, a reduction of 16%. Further cost savings were recognised during the year for advisors' fees, Directors' fees, office and travel costs. Adjusting for one-off items during the year, the Company has achieved a reduction in gross administrative costs of approximately 30%. These cost saving initiatives will become more evident in 2020 when a full year's impact is felt. Management maintains strict expenditure controls and continues to seek cost saving solutions and efficiencies across the Group and has implemented further cost-saving initiatives during 2020.

The Group recognised an impairment during the year in both its producing and exploration and evaluation assets. In respect of the Group's producing asset, the Kiliwani North-1 well, in light of the approval delays with the Tanzanian authorities during the year to progress the remediation programme to bring the well back into production following the successful work carried out on the sub surface safety valve, the Group revised the assumptions to reflect potential further delays, coupled with an increased discount rate to reflect risk factors and this resulted in an impairment against producing assets of US\$0.81 million.

During the year, an impairment was also recognised against exploration and evaluation assets of US\$10.93 million. In December 2019, the Tanzanian Government published new Petroleum Regulations, including the Petroleum (Cost Recovery Accounting) Regulations which state that exploration costs will be ring fenced. The Group is carrying exploration costs that were incurred under the Lindi Licence that was part of the Ruvuma PSA and although the licence expired in December 2017, under the terms of the Ruvuma PSA, Lindi Licence exploration costs can be recovered from future revenues generated by the Mtwara Licence. Following the publication of these new regulations which state that exploration costs would be ring-fenced by licence, the Directors have taken the view that, despite the economic stabilisation clause contained in the Ruvuma PSA, this change has created uncertainty of recoverability and consequently the Group provided in full for the US\$10.40 million of Lindi exploration costs. Details of the impairment are included in Note 10 to the financial statements. The remainder of the exploration and evaluation asset impairment relates to exploration and evaluation expenditure incurred on the Nyuni Area PSA of US\$0.53 million predominantly related to own costs for geological, geophysical and administrative work and licence maintenance costs, along with training and licence fees. All expenditure of the Nyuni Licence Area continues to be impaired immediately to the income statement upon recognition following the full impairment of the Nyuni Area Licence in 2018. During 2018, in reviewing the carrying value of the Nyuni asset, the Directors took into account the notification from the Tanzania Ministry of Energy that the current licence period is to end in October 2019. This was against previous advice received from the relevant Tanzanian authorities. As the Group cannot plan for works on the Nyuni Area Licence acreage, the Directors concluded that the asset was impaired and provided against the carrying value in full, resulting in an impairment of US\$43.47 million in 2018.

The Group's resulting net loss from operating activities was US\$15.18 million (2018: US\$48.51 million).

Finance income amounted to US\$0.03 million which predominantly arose on gains from foreign exchange. Finance costs for the period totalled US\$0.08 million, of which US\$0.06 million related to the unwinding of discount on the decommissioning provision and US\$0.02 million for the finance cost related to the lease liability.

The Group's net loss for the period amounted to US\$15.23 million (2018: US\$48.51 million).

Balance sheet

The Group's investment in exploration and evaluation assets decreased from US\$58.53 million as at 31 December 2018 to US\$48.97 million as at 31 December 2019. The decrease reflects the total impairment recognised during the year of US\$10.93 million as described above, partially offset by expenditure related to the updated well design programme for the Chikumbi-1 exploration well and the redesigned, significantly larger, 3D seismic programme, the reprocessing of select 2D seismic data over the Kiliwani South prospect, along with general licence maintenance costs. As discussed above, following the publication of the Petroleum Regulations by the Tanzanian Government in December 2019 the Group impaired US\$10.40 million related to exploration and evaluation expenditure incurred on the Lindi Licence. All exploration and evaluation expenditure on the Nyuni Area PSA continues to be impaired as incurred following the full impairment of the asset in 2018. The Directors reviewed the remaining balance on the Ruvuma PSA, incurred on the Mtwara Licence, and the Kiliwani South assets and have concluded that there is no further impairment to the carrying value. This opinion takes into account the expected completion of the Farm-Out of the Ruvuma PSA and the planned work on Kiliwani South.

The carrying value of property, plant and equipment has decreased from US\$2.39 million at 31 December 2018 to US\$1.96 million at 31 December 2019. The decrease was as a result of the partial impairment of US\$0.81 million on the Kiliwani North producing asset following delays to the remediation programme offset predominantly as a result of first year recognition of a right of use asset under the requirements of IFRS 16: Leases ("IFRS 16"), resulting in a net asset recognised as at 1 January 2019 of US\$0.60 million. There were other minor additions during the year of US\$0.01 million, offset by a depreciation charge for the year of US\$0.24 million.

Current assets amounted to US\$8.56 million (2018: US\$9.37 million) with trade and other receivables of US\$7.87 million (2018: US\$7.51 million), which as operator includes joint venture parties' interests in gas revenues and interest charged on overdue invoices. Cash and cash equivalents as at 31 December 2019 were US\$0.69 million (2018: US\$1.86 million).

Total current liabilities amounted to US\$11.72 million at 31 December 2019 compared with US\$9.99 million at 31 December 2018. The majority of the increase related to US\$1.00 million received during 2019 under the advance funding agreement entered into in November 2019 between the Group and ARA, a related party of the Group (see Note 27 to the financial statements for details), and the recognition of short-term lease liabilities of US\$0.21 million resulting from the first-time adoption of IFRS 16: Leases. The

balance also includes amounts payable to the TPDC and joint venture partners for their profit shares under the terms of the PSA governing Kiliwani North. Payables also include VAT and excise tax payable on gas receivables. Non-current liabilities amounted to US\$1.00 million at 31 December 2019 (2018: US\$0.70 million). The increase was predominantly as a result of the recognition of a long-term lease liability of US\$0.17 million, as a result of recognition and measurement requirements under the first-time adoption of IFRS 16: Leases in 2019, and a related restoration provision of US\$0.07 million classified under other long-term liabilities. During the year, the decommissioning provision increased by US\$0.06 million at 31 December 2019 to US\$0.76 million (2018: US\$0.70 million), the increase relating to the unwinding of the discount charge during the period.

Total equity has decreased by US\$12.84 million between 31 December 2018 and 31 December 2019 to US\$46.77 million (31 December 2018: US\$59.61 million). The net movement comprises US\$2.36 million increase in share capital and share premium from the successful disapplication placing in February 2019, a net decrease of US\$0.45 million to the share option reserve, an increase of US\$0.16 million in the foreign currency translation reserve and the movement of US\$14.59 million in retained earnings arising on the loss of US\$15.23 million for the period, the release from the share option reserve of US\$0.82 million for expired options and expenses related to the share issue of US\$0.17 million.

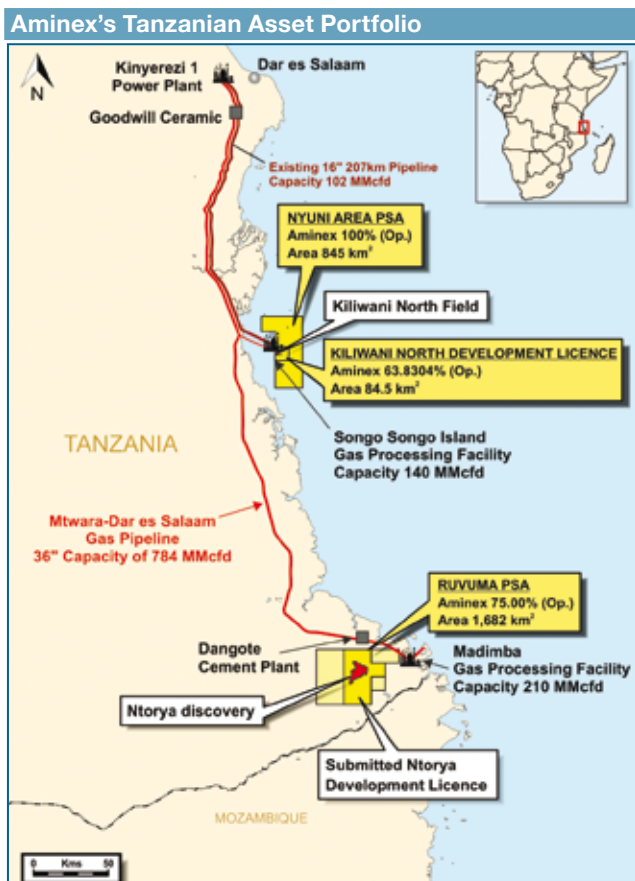

Cash Flows

Net cash outflows due to operating activities was US\$2.70 million (2018: US\$2.46 million). There was an increase in debtors of US\$1.13 million primarily arising on the increase in the gross receivables from the TPDC and a decrease in creditors of US\$0.68 million. Net cash outflows from investing activities amounted to US\$0.45 million (2018: US\$1.96 million). The Group received US\$1.00 million under the advance funding agreement with ARA related to the Ruvuma PSA Farm-Out which was predominantly offset by expenditure on exploration and evaluation assets in the current period of US\$1.45 million, relating to payments for well planning services for Chikumbi-1 to be drilled on the Ruvuma PSA acreage, 2D seismic reprocessing over Kiliwani South, together with continuing costs on all Tanzanian licence interests. Cash inflow from financing activities during the year of US\$1.95 million (2018: US\$nil) were as a result of net proceeds of \$2.19 million from the issue of share capital in the period offset by lease payments of US\$0.23 million. Net cash and cash equivalents for the year ended 31 December 2019 therefore decreased by US\$1.19 million compared with a decrease of US\$4.42 million for the comparative period. The balance of net cash and cash equivalents at 31 December 2019 was US\$0.69 million (31 December 2018: US\$1.86 million).

John Arthur

Chief Financial Officer

Operations Review

Ruvuma PSA

Aminex has completed an updated well design for the Chikumbi-1 exploration well and has redesigned a significantly larger 3D seismic programme than was originally planned. The changes to the seismic programme reflect the requirements and intent of our farm-in partner, and future operator, to gather all of the information required during the early stages of their involvement in the project in order to rapidly progress to full-field development and thereby, early cashflow from the Ntorya gas field. The proposed 2020 contingent work programme and budget for Ruvuma includes approximately US\$40 million (gross) of drilling and seismic work of which Aminex would be fully carried for our approximate US\$10 million share of this expenditure, leaving an additional US\$25 million of carry available for future development works.

A primary focus for the Company has remained the completion of the Ruvuma Farm-Out with APT. The conditions precedent within the two parties' control have been satisfied and completion is expected upon receipt of governmental approvals. The Farm-Out, with a net carry to Aminex of up to US\$35 million, is expected to fully fund Aminex through to full-field development of the Ntorya gas field and to relieve Aminex of all its development capital requirements associated with the field. The work programme for the Ntorya field will include the acquisition of new 3D seismic data, the drilling of Chikumbi-1 and is expected, with success, to include the drilling of multiple wells required for full-field development and related infield production infrastructure. Chikumbi-1 has been designed to delineate the Cretaceous Ntorya gas field and to test the deeper Jurassic 'Chikumbi' prospect to fulfil one of the outstanding exploration well obligations on the licence.

In April 2020, the Group formally received the extension of the Mtwara Licence in respect to the Ntorya Location from the Ministry of Energy of Tanzania; one of the last remaining conditions required to close the Farm-Out. The extension, which was applied for in late 2017, is valid for one year. Under the terms of the extension the Company, through the Ruvuma PSA Joint Venture, is committed to acquire 200 square kilometres (surface coverage) of 3D seismic, drill the Chikumbi-1 exploration well, complete the negotiation of the Gas Terms for the Ruvuma PSA with the TPDC and using the data gathered from Chikumbi-1 and the seismic acquisition, prepare and submit an application for a Development Licence for the Ntorya Location area. It is acknowledged by all parties that the full work programme is unlikely to be completed during this extension period and the Company will therefore apply for an additional extension(s) as necessary and as permissible under the current legislation.

² Management Estimates

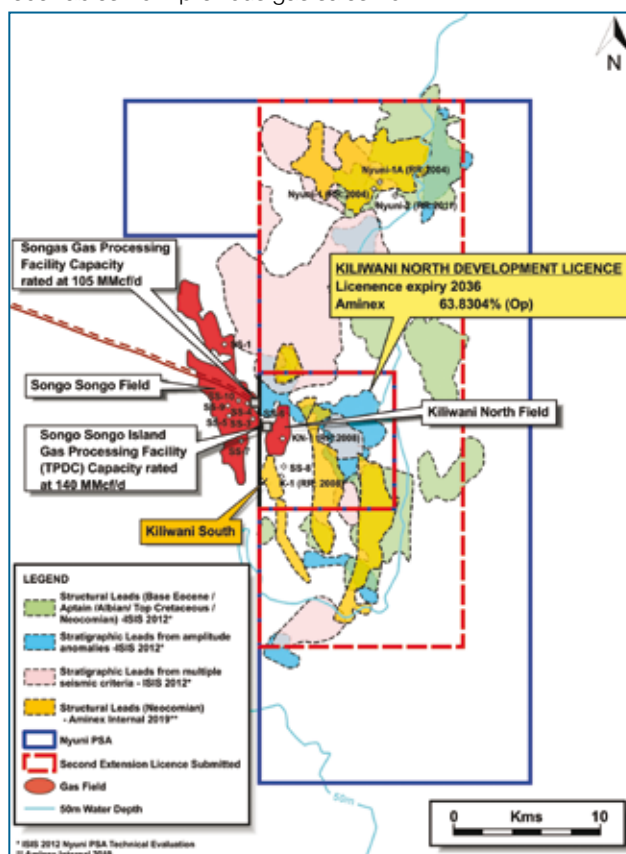

As a result of fluid build-up and natural depletion, the Kiliwani North-1 well has not produced during the period. Aminex undertook preliminary remedial work and successfully repaired the downhole safety valve in late 2018 which resulted in temporary gas flow to the gas facility. The well has produced approximately 6.5 BCF of gas to date. Aminex has prepared and is awaiting final approval to carry out a remedial work programme intended to establish fluid levels in the wellbore, reservoir pressure and to unload fluid using foam treatment technology. If successful, this operation is expected to re-establish gas production from the well. The Company has identified appropriate equipment and will begin sourcing as

soon as approvals have been received. The Company has been awaiting final approvals for a significant period of time and while reassured that the unloading operation can be carried out, there is no firm timeline on when final approval will be granted. Should approval be granted immediately, and personnel permitted to travel with the ongoing Coronavirus pandemic, it is estimated that work can commence within three to six months.

As previously advised, following a re-interpretation of existing seismic, the Company identified the Kiliwani South prospect, estimated by management to contain a mean 57 BCF un-risked GIIP. It is envisaged that as part of a larger 3D seismic programme, most of the Kiliwani North development licence will be covered by 3D seismic, allowing for the Kiliwani South prospect to be progressed to drill ready status and to target remaining potential within the Kiliwani North structure. The Kiliwani South prospect is accounted for as an exploration and evaluation asset.

In preparation for acquiring 3D seismic over the licenced acreage, comprising the shallow-water areas adjacent to Songo Songo Island, Aminex conducted the reprocessing of select 2D seismic data. Remapping of the reprocessed data in combination with a fresh look at the regional data has identified multiple structural and stratigraphic leads across the licence which are ideally located in shallow waters and in close proximity to existing offtake infrastructure, meaning that a discovery could be rapidly monetised with relatively low-cost drilling and tie-backs.

The Company continues to meet with the relevant Tanzanian authorities to discuss and resolve the issue of outstanding receivables from previous gas sales from KNDL.

Nyuni Area PSA

Aminex (operator) 100%

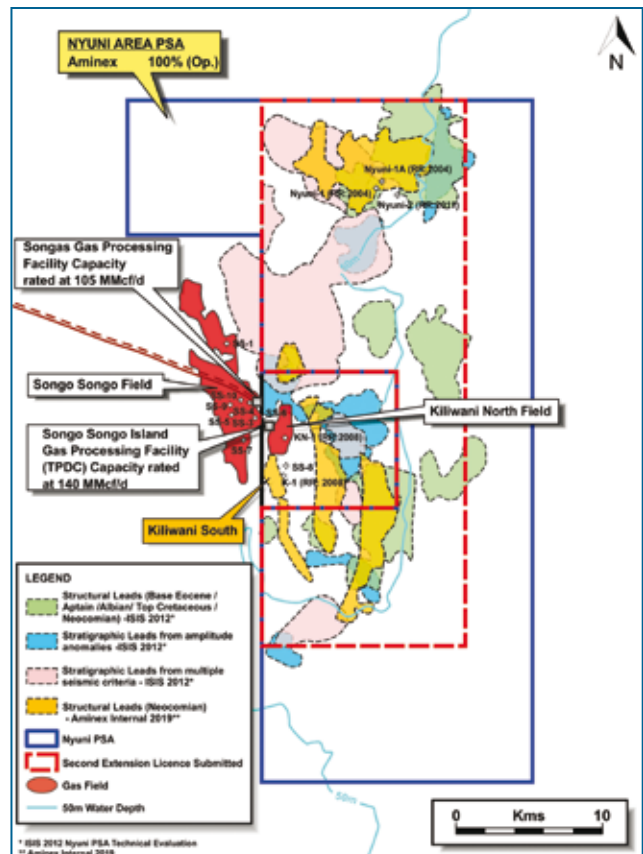

Resource Summary

PSA	Licence Status	Gross Mean unrisked GIIP (BCF)
Nyuni Area	Exploration	4,858

Source: RPS Energy CPR of February 2018, RISC Consultants CPR of June 2012

The First Extension Period to the Nyuni Area PSA was granted in December 2016 for a four-year term, however, during the reporting period the Tanzanian authorities advised the Company that the effective start date for the licence period was to be back-dated to October 2015. Accordingly, the First Extension Period expired on 27 October 2019, but the licence remains valid until otherwise advised by the Ministry.

In July 2019, Aminex submitted an application to the TPDC to enter the Second Extension Period of three years requesting an amendment to the existing work programme and proposing a new work programme for the Second Extension Period. If approved, the number of blocks retained under the licence will reduce to five, from the current ten blocks. The proposed amended work programme and associated commitment is being supported by the TPDC and awaits the approval of both the Petroleum Upstream Regulatory Authority (“PURA”) and the Minister of Energy. Aminex was advised to, and has submitted, a 2020 work programme and budget for the Nyuni Area PSA, assuming that the extension and amended work programme have been accepted. Aminex remains optimistic that the proposed extension and work programme will be accepted and approved in the near future.

Corporate and Social Responsibility

Environmental Policy

Successful environmental management is dependent on recognising, and avoiding or minimising, environmental impacts. Aminex is aware that protection of the environment requires careful planning and commitment from all levels within the Company. Best practice environmental management demands a continuing, integrated process through all phases of a project.

Environmental management is a core business requirement for Aminex, essential to long-term success. Aminex complies with all relevant legislative requirements and commitments applicable to its operations and where practical, exceeds these requirements. In addition, Aminex is committed to good environmental management and continuous improvement in its performance.

Health, Safety, Security and Environment Policy

The health, safety and security of all our employees, contractors and the wider community in which it operates is of paramount importance to Aminex.

As standard practice, the Company:

- does not compromise on safety;
- complies with legislative requirements;
- identifies, assesses and manages environmental health, safety and security hazards, risks and impacts;
- promotes continuous improvement practices within all aspects of the business;
- minimises work place exposure to hazards; and
- understands and works to meet the expectations of the community and provides appropriate training

to employees and contractors to ensure health, safety and security responsibilities are understood.

Community

Aminex believes that continuous improvement in the areas of environment, community and safety is fundamental to ongoing sustainability and success.

The Company's good reputation as a worthy corporate citizen has been achieved by:

- working closely with neighbours and co-occupiers of the land;
- supporting local community through sponsorship and resources;
- providing public information about environmental, community, health, safety and security aspects of the business; and
- encouraging the services of local suppliers where possible.

Aminex has strived to foster a lasting and tangible relationship with the local communities and stakeholder groups where it works and is aware

that in addition to regulatory operating approvals, the Company also requires a community acceptance to operate, and that acceptance has to be earned. Aminex is committed to working in an effective and collaborative manner with local communities that co-exist with its operations. To achieve this Aminex has and will continue to:

- establish and maintain positive and meaningful communication with all affected groups;
- consult with the people whose land may be affected by its activities; and
- engage with relevant groups on various community projects.

Aminex supports local community initiatives where possible. The Company is a supporter of the Tanzanian registered NGO Australia Tanzania Society (ATS) which includes the provision of surgical missions for free to Tanzanians (www.asanterafiki.com) and the capacity building of local surgeons. It also supports the Australia Tanzania Young Ambassadors (www.youngambassadors.com.au) in helping community schools and education. Our principal contribution is directed to community projects that add sustainable benefit in the education and medical sectors of the community.

Aminex has strict anti-bribery and corruption procedures and policies in place and ensures that its employees and contractors observe these at all times in carrying out the Company's business.

Board of Directors

John Bell, (54) (UK)

Chairman (A,N,R)

John Bell is a Chartered Engineer with over 30 years' experience in the energy sector having worked at Vice President level or Managing Director level with BP, Statoil AS and Suncor Energy (Syria). He graduated with a First Class Honours degree in Engineering from Strathclyde University and studied Executive Leadership at Haas Business School, University of Berkeley California. Previous public company directorships include Gulf Keystone Petroleum and Tethys Petroleum where he was Executive Chairman. John is currently the Managing Director at Gulfsands Petroleum PLC. He was appointed a Director of Aminex in November 2017 and Chairman in February 2019.

Robert Ambrose, (60) (UK)

Executive Director, Chief Executive Officer

Robert Ambrose was formerly the Chief Operating Officer of The Zubair Corporation's Energy & Logistics Division. He has a Petroleum Engineering Masters from Imperial College, London, and a Mechanical Engineering Honours Degree from Brunel University in the UK. He has over 30 years' experience in the oil and gas industry, from downstream to upstream, covering many aspects of the supply chain and has experience in and held senior management roles involving the reservoir, well construction and production both onshore & offshore. Mr Ambrose joined The Zubair Group in 2001. He was appointed a Director of Aminex in September 2019 and Interim Chief Executive Officer in April 2020.

Ola Fjeld, (62) (Norway)

Non-Executive Director

Ola Fjeld has over 30 years of diverse industry experience in Norway and internationally. He has worked for large international service companies as well as starting an oil and gas software company VoxelVision. The company was acquired by Schlumberger and the technologies from VoxelVision and GigaViz form the seismic interpretation parts of the world leading G&G software package Petrel. He is currently the Chief Operating Officer of ARA Petroleum LLC. He holds a Master's degree from NTNU, Norway. He was appointed a Director of Aminex in August 2016.

Linda Beal, (58) (UK)

Non-Executive Director (A,N,R) (Senior Independent Director)

Linda Beal is a Chartered Accountant and has over 30 years' experience with PwC including over 16 years as partner, during which time she led services to various international resources groups and advised on many transactions. She was also a partner at Grant Thornton for two years, where she led the global energy and natural resources group, with a significant focus on Africa. She is currently non-executive director at Kropz PLC, San Leon Energy PLC, Orca Exploration Group Inc and i3 Energy PLC and was appointed a Director of Aminex in January 2019.

A Member of Audit and Risk Committee

N Member of Nominations Committee

R Member of Remuneration Committee

Directors' Report

The Directors present their annual report and audited financial statements for Aminex PLC ("the Company") and its subsidiary undertakings ("the Group") prepared in US dollars for the year ended 31 December 2019.

Principal activities

The principal activities of the Group are the exploration, appraisal, development and production of oil and gas assets, reserves and resources. The Group operates through subsidiary undertakings, details of which are set out in Note 13 to the financial statements. The Group's principal area of activity is in Tanzania.

Results and dividends

As set out in the Group Income Statement on page 35, the Group loss after tax amounted to US\$15.23 million which compares with a loss after tax of US\$48.51 million for 2018. No dividends were paid during the year (2018: US\$nil).

Share capital

At 31 December 2019, the Company had two classes of shares which were divided into Ordinary Shares of €0.001 each and Deferred Shares of €0.059 each. The number of Ordinary Shares of €0.001 and Deferred Shares of €0.059 in issue were 3,770,684,843 and 818,658,421 respectively (2018: 3,643,458,062 Ordinary Shares of €0.001 each and 818,658,421 Deferred Shares of €0.059 each). The Company's authorised share capital was €64,000,000 (2018: €64,000,000) comprising 5,000,000,000 Ordinary Shares of €0.001 each and 1,000,000,000 Deferred Shares of €0.059 each (2018: 5,000,000,000 Ordinary Shares of €0.001 each and 1,000,000,000 Deferred Shares of €0.059 each). The Ordinary Shares are in registered form.

Resolutions will be proposed to renew the Directors' authority to allot share capital of the Company, as will be set out more fully in the Notice of Annual General Meeting. The Directors were granted authority at the 2017 Annual General Meeting to consolidate the existing ordinary shares at a ratio of 1 new ordinary share for every 20 existing Ordinary Shares and to cancel the Deferred Shares of €0.059 each and this authority remains at the Directors' discretion.

Additional information in respect of shares and directors as required by the European Communities (Takeover Bids (Directive 2004 25/EC)) Regulations 2006 are set out on pages 14 and 15.

Directors and their interests

Biographies of all Directors are set out on page 11. In accordance with the Articles of Association, John Bell retires from the Board and being eligible offers himself for re-election. Robert Ambrose was appointed to the Board on 5 September 2019, since the last Annual General Meeting, and is therefore required to seek election at the forthcoming Annual General Meeting. Linda Beal was appointed to the Board on 9 January 2019. Having served over nine years on the Board, Keith Phair retired from the Board on 4 February 2019. Jay Bhattacharjee retired from the Board and resigned from the Company due to ill health on 23 May 2019 and Max Williams retired from the Board on 31 October 2019 after over 25 years with the Company in various capacities. In April 2020, Tom Mackay retired from the Board after five years.

With the exception of the transactions stated in Note 27 to the financial statements, there were no other significant contracts, other than Executive Directors' contracts of service, in which any Director had a material interest.

The Directors who held office at or have been appointed since 31 December 2019 had no beneficial interests in any of the shares of the Company and Group companies other than Ordinary Shares in Aminex PLC as follows:

Director	Number of Ordinary Shares		
	30 April 2020	31 December 2019	31 December 2018
Robert Ambrose	1,720,281	1,720,281	1,720,281
Linda Beal	1,034,482	1,034,482	-
John Bell	1,034,482	1,034,482	-

Details of the Directors' share options are set out in the Remuneration Report on pages 27 to 28.

Substantial shareholdings in the Company

As of the date of this report, the following was a holder of 3% or more of the Company's issued Ordinary Share capital:

	Number of shares	Per cent
Eclipse Investments LLC	1,069,161,293	28.35
Majedie Asset Management Limited and Majedie Asset Management Investment Fund Company	261,245,000	6.93

The Directors have not been made aware of any other beneficial shareholdings of 3% or more of the issued Share Capital as at the date of this report.

Finance Review

A review of current year financial activities is set out in the Finance Review on pages 5 and 6.

Operations Report

A review of exploration and production activities during 2019 and outlook for 2020 are set out in the Chairman's Statement on pages 2 and 3, the Chief Executive's Review on page 4 and in the Operations Report on pages 7 to 9.

Payment of Suppliers

The Company's policy is to agree payment terms with individual suppliers and to abide by such terms.

Electoral Act 1997

The Group did not make any political donations during the current or previous year.

Corporate Governance Statement

Statements by the Directors in relation to the Company's application of corporate governance principles, compliance with the principles of the UK Quoted Companies Alliance Corporate Governance Code published in April 2018 (the "QCA Code"), the Group's system of internal controls and the adoption of the going concern basis of preparation of the financial statements are set out on pages 16 to 26. The report on Directors' remuneration is set out on pages 27 to 28. Principal risks and uncertainties are set out on pages 23 to 25 to comply with Companies Act 2014 requirements.

Audit and Risk Committee

The Group has established an Audit and Risk Committee that is chaired by an independent Director and whose terms of reference include:

- monitoring of the financial reporting process;
- reviewing the accounting policies and significant financial reporting issues and judgements;
- monitoring of the effectiveness of the Group and Company's systems of internal control and risk management;
- monitoring the need for or the effectiveness of the internal audit function;
- overseeing the relationship with the statutory auditors and reviewing and monitoring of the statutory audit of the Group and Company's statutory financial statements;

- f) review and monitoring of the independence of the statutory auditors and in particular the provision of additional services to the Group and Company;
- g) ensuring the integrity of the financial statements; and
- h) review of the Group's financial and operating risks and ensuring that appropriate procedures are in place for mitigating risk.

Further details are provided in the Corporate Governance Statement on pages 16 to 26.

Relevant audit information

The Directors believe that they have taken all steps necessary to make themselves aware of any relevant audit information and have established that the Group statutory auditors are aware of this information. In so far as they are aware there is no relevant audit information of which the Group's statutory auditors are unaware.

Directors' Compliance Statement

The Directors, in accordance with Section 225(2) of the Companies Act 2014, acknowledge that they are responsible for securing the Company's compliance with certain obligations specified in that section arising from the Companies Act 2014, and tax laws ('relevant obligations'). The directors confirm that:

- A compliance policy statement has been drawn up setting out the Company's policies that in their opinion are appropriate with regard to such compliance;
- Appropriate arrangements and structures have been put in place that, in their opinion, are designed to provide reasonable assurance of compliance in all material respects with those relevant obligations; and
- A review has been conducted, during the financial year, of those arrangements and structures.

Post balance sheet events

On 4 February 2020, the Company granted 8,000,000 options over Ordinary Shares to John Bell, in lieu of remuneration. The exercise price is Stg1.02p with the exercise period not exceeding five years from date of grant. The share-based payment charge arising from the grant will be charged to the income statement in the year ending 31 December 2020.

On 3 March 2020, Ndovu Resources Limited, a wholly owned subsidiary of the Group, received a tax assessment from the TRA in relation to a tax audit conducted by the TRA covering the period from 2013 to 2015 (see Note 24).

Since 31 December 2019, the Group has received a further US\$1.0 million under the Advance from ARA Petroleum LLC, a related party of the Group (see Note 27).

On 24 April 2020, Ndovu Resources Limited received a one year extension to the Mtwara Exploration Licence in respect to the Ntorya location. The extension is effective from 17 April 2020. This satisfies one of the conditions precedent of the Farm-Out. During the one year extension period the Group is committed to undertake acquiring 200 km² of 3D seismic (minimum expenditure of US\$7 million), drill the Chikumbi-1 exploration well (minimum expenditure of US\$15 million), complete the negotiation of the Gas Terms for the Ruvuma PSA with the TPDC and, using the data gathered from the Chikumbi-1 and seismic acquisition, prepare and submit an application for a Development Licence for the Ntorya Location area. It is acknowledged by the Group that the full work programme is unlikely to be completed during this one year extension period and therefore the Group will apply for an additional extension(s) as necessary and as permissible under the current legislation. Also in relation to the completion of the Farm-Out, the TRA have issued the CGT assessment on the Farm-Out of US\$2.2 million to be paid prior to government approval.

On 27 April 2020, Robert Ambrose was appointed interim Chief Executive Officer of the Company. Tom Mackay resigned as interim Chief Executive Officer and as a Director of Aminex.

The global impact of the COVID-19 virus is a non-adjusting event after the financial year end. To date, the Company has experienced no adverse material impact on its operations as a result of the COVID-19 virus. Further information has been provided in the Directors' Report and Principal Risks and Uncertainties.

Coronavirus

At the date of this report, Aminex's Board and senior management continue to monitor government advice and to plan around the rapidly evolving situation regarding the spread of COVID-19 (Coronavirus). Whilst taking actions to mitigate the potential impact on colleagues, clients and contacts, the Company's operations are currently unaffected. Our priorities are safeguarding the health and wellbeing of our colleagues and clients. We have an established business continuity plan and an embedded agile working capability that will allow us to continue to operate the business whilst working remotely. Our staff are equipped for remote working, with access to our secure systems. The potential impact of COVID-19 is discussed in principal risks and uncertainties on page 25.

Brexit

It is the view of the Board that, given the Group's focus on Tanzania, Aminex will not be materially affected by the exit from the European Union by the UK. The Board also recognises that a no-deal Brexit could give rise to regulatory, legal and financial concerns for Aminex PLC in respect of its listing on the London Stock Exchange and for its UK subsidiary company, Aminex Petroleum Services Ltd and to the members of staff employed by that company and monitors the risks accordingly. As a result of Brexit, it is expected that Euroclear UK and Ireland's CREST platform will no longer be authorised to act as the Central Securities Depository for Irish (and other EU countries') securities. The Irish Market is planning to replace its existing settlement infrastructure provided by the CREST platform with the Euroclear Bank (EB) system. This change is expected to take place with effect from March 2021 and should not have any significant impact for the Company or its shareholders.

Accounting records

The Directors believe that they have complied with the requirements of Sections 281 to 285 of the Companies Act 2014 with regard to maintaining adequate accounting records by employing personnel with appropriate expertise and by providing adequate resources to the finance function. The accounting records of the Company are maintained at Kings Buildings, 16 Smith Square, London, SW1P 3JJ, UK.

Auditor

In accordance with Section 383(2) of the Companies Act 2014, the auditor, BDO, Statutory Auditors, have indicated their willingness to continue in office. BDO were appointed in October 2019 as the Group's statutory auditor for the financial year commencing 1 January 2019. The appointment remains subject to approval by shareholders at the 2020 Annual General Meeting.

On behalf of the Board

Robert Ambrose

Director
30 April 2020

Additional Information for Shareholders

Additional information in respect of shares and Directors as required by the European Communities (Takeover Bids (Directive 2004 25/EC)) Regulations 2006 are set out below.

Amendment to the Articles of Association

Any amendment to the Articles of Association ('Articles') of the Company requires the passing of a special resolution in accordance with the provisions of the Companies Act.

Rights attaching to shares

The rights attaching to the Ordinary and Deferred Shares are defined in the Company's Articles. A shareholder whose name appears on the register of members can choose whether the shares are evidenced by share certificates (i.e. in certificated form) or held in electronic form (i.e. uncertificated form) in CREST (the electronic settlement system in Ireland and the UK). From March 2021, as an impact of the exit of the UK from the European Union, it is anticipated that the CREST platform will be replaced by Euroclear Bank (an electronic settlement system based in Brussels) for the settlement of Irish securities.

At any general meeting, a resolution put to the vote shall be decided on a show of hands unless a poll is (before or on the declaration of the result of the show of hands) demanded by the Chairman of the meeting, or by at least three shareholders present in person or by proxy, or by any shareholder or shareholders present in person or by proxy and representing not less than 10% of the total voting rights of all the shareholders having the right to vote at the meeting, or by a shareholder or shareholders holding shares in the Company conferring the right to vote at the meeting being shares on which an aggregate sum has been paid equal to not less than 10% of the total sum paid up on all the shares conferring that right to vote.

The shareholders may declare dividends by passing an ordinary resolution in general meeting but the amount of the dividend shall not exceed the amount recommended by the Directors. The Directors may authorise the payment of interim dividends. No dividend shall be paid unless the distributable profits of the Company justify the payment.

Notice of each dividend declared and/or other monies payable to members (including, without prejudice to the generality of the foregoing, on a return of capital) shall be given to each member in the manner provided for under Articles 137 and 138. All dividends and/or other monies payable to members (including, without prejudice to the generality of the foregoing, on a return of capital) unclaimed for a period of 12 years after the declared date of payment thereof may by resolution of the Board be forfeited for the benefit of the Company.

If the Company is wound up, the liquidator may allocate, with the sanction of a special resolution passed in general meeting and any other sanction required by the Companies Act 2014, between the shareholders in specie or in kind the whole or any part of the assets of the Company. The liquidator may value the assets and determine how to divide the assets between shareholders or different classes of shareholders. The liquidator may transfer the whole or any part of the assets into trust for the benefit of the shareholders.

Voting at general meetings

Subject to any rights or restrictions for the time being attached to any class of shares, shareholders may attend any general meeting and, on a show of hands, every shareholder present in person or by proxy shall have one vote and on a poll every shareholder present in person or by proxy shall have one vote for each share of which he/she is the holder.

Votes may be given either personally or by proxy. The form of proxy shall be signed by the appointer or his/her duly authorised attorney or if the appointer is a body corporate either under the seal or signed by an officer of the body corporate duly authorised.

The form of proxy must be delivered to the Company not less than 48 hours before the time appointed for holding the meeting or adjourned meeting as notified in the notice of general meeting at which the person named in the form of proxy proposes to vote.

No shareholder shall be entitled to vote at any general meeting unless all calls or other sums payable in respect of his/her shares have been paid.

Transfer of shares

The Directors may decline to register the transfer of a share which is not fully paid. The Directors may also refuse to register a transfer unless the instrument of transfer is accompanied by the certificate of the shares to which it relates and such other evidence as the Directors may reasonably require to show the right to transfer and the instrument of transfer is in respect of one class of share only.

The Directors have the power to implement any arrangements they think fit for evidencing the title to and transfer of shares in accordance with statutory obligations made from time to time. Until an alternative platform is put in place, transfers of uncertificated shares must be carried out using CREST and the Directors may refuse to register a transfer of an uncertificated share in accordance with the regulations governing the operation of CREST. The Company will notify shareholders as and when a new trading platform to replace CREST is implemented. Transfers of shares in certificated form must be executed by or on behalf of the transferor and the transferee.

Variation of rights

Without prejudice to any special rights previously conferred on the holders of any existing shares or class of shares, any share in the Company may be issued with such preferred, deferred or other special right or such restrictions, whether in regard to dividend, voting, return of capital or otherwise, as the Company may from time to time by ordinary resolution determine.

If at any time the share capital is divided into different classes of shares, the rights attached to any class may be varied or abrogated with the written consent of the holders of at least 75% of the issued shares of that class, or with the sanction of a special resolution passed at a separate general meeting of the holders of the shares of that class.

Additional Information for Shareholders continued

Appointment and replacement of Directors

There will be no less than two Directors. Directors may be appointed by the Company by ordinary resolution (provided not less than 7 days or more than 42 days before the day appointed for the meeting, notice is given to the Company of the intention to propose a person for election) or by the Board. A Director appointed by the Board shall hold office only until the following annual general meeting and shall be eligible for re-election but shall not be taken into account in determining the Directors who are to retire by rotation at that meeting. At each annual general meeting of the Company, one-third of the Directors shall retire by rotation or if their number is not a multiple of three then the number nearest one-third shall retire from office. The Directors to retire in every year shall be those who have been longest in office since their last election but as between persons who became Directors on the same day, those to retire shall (unless otherwise agreed among themselves) be determined by lot. A retiring Director shall be eligible for re-election.

The Company may, by ordinary resolution of which extended notice has been given in accordance with the Companies Act 2014, remove any Director before the expiration of his period of office.

Powers of the Directors

The business of the Company shall be managed by the Directors who may exercise all such powers of the Company as are not required by the Companies Act 2014 or by the Articles to be exercised by the Company in general meeting. The Directors are, subject to the provisions of the Companies

Act 2014, authorised to allot shares in accordance with an offer or agreement for the number of authorised shares not yet issued and also to issue shares for cash. Resolutions to renew these authorities will be set out in the Notice of Annual General Meeting. Under the Aminex PLC Share Option Scheme, the Directors are authorised, in the event of an offer for the whole or a specified portion of the share capital, to request option holders to exercise unexercised options.

Following the transfer of the Company's listing category on the Official List of the Financial Conduct Authority from the Premium listing segment to the Standard listing segment, and the de-listing from the official list of Euronext Dublin, the Company is no longer required to apply the principles of the UK Corporate Governance Code, as previously applied. The Directors however are committed to continue to maintain high standards of corporate governance and have resolved to apply the principles of the UK Quoted Companies Alliance Corporate Governance Code (the "QCA Code"), being a code more appropriate to the size and shape of the Company. Except where otherwise stated, the Directors believe that the Group has complied with the provisions of the QCA Code throughout the year under review.

Corporate Governance

Compliance with the provisions of the UK Quoted Companies Alliance Corporate Governance Code

The QCA Code is based on ten principles that companies should follow to deliver growth in long-term shareholder value. The QCA has stated what it considers to be appropriate arrangements for growing companies and asks companies to provide an explanation about how they are meeting the principles through the prescribed disclosures. We have considered how we apply each principle to the extent that the Board judges these to be appropriate in view of the Company's size, strategy, resources and stage of development, and below we provide an explanation of the approach taken in relation to each. This report explains in broad terms how the Company applies the main principles of the QCA Code. The Directors consider that Aminex PLC has complied throughout the year with the provisions of the QCA Code except for the following matters:

- A performance evaluation of the Board, its Committees and its Directors was not undertaken during the year.
- As stated in the Directors' Remuneration Report, during 2019 two of the Company's current Non-Executive Directors held options over the Ordinary Shares of the Company. The Board considers that this is in the Group's best interests to attract and retain high calibre directors and that, with limited cash resources, this can be achieved by the granting of options and given the nature of such options held by, and the calibre and experience of, such Non-Executive Directors, the Board viewed these Non-Executive Directors as sufficiently independent of management and as being capable of exercising independent judgement.

The Board of Directors

The Company is controlled through its Board of Directors. The Board's main roles are to create value for shareholders, to provide entrepreneurial leadership to the Group, to approve the Group's strategic objectives and to ensure that the necessary financial and other resources are made available to enable the Group to meet its objectives.

There are matters which are specifically reserved for the Board which include setting and monitoring business strategy; evaluating exploration opportunities and risks; approving all capital expenditure on exploration and producing oil and gas assets; approving all investments and disposals; approving budgets and monitoring performance against budgets; reviewing the Group's health and safety policy and considering and appointing new Directors and the Company Secretary.

The Board consists of four members and comprises a Non-Executive Chairman, an Executive Director and two Non-Executive Directors. Brief biographies of the Directors are set out on page 11.

Under the terms of the Company's Articles, at least one third of the Board must seek re-election to the Board at the Annual General Meeting each year. All new Directors appointed since the previous Annual General Meeting are required to seek election at the next Annual General Meeting and in accordance with this the Directors will propose a resolution to elect Robert Ambrose who was appointed to the Board on 5 September 2019. John Bell is required to seek re-election at the forthcoming Annual General Meeting. Linda Beal was appointed to the Board on 9 January 2019. Having served over nine years on the Board, Keith Phair retired from the Board on 4 February 2019. Jay Bhattacharjee retired from the Board and resigned from the Company due to ill health on

23 May 2019 and Max Williams retired from the Board on 31 October 2019 after over 25 years with the Company in various capacities. In April 2020, Tom Mackay retired from the Board after five years.

The Company arranges appropriate insurance cover in respect of legal action against its Directors.

Establish a strategy and business model which promote long-term value for shareholders

The strategy is reviewed by the Board. Senior management led by the Chief Executive Officer are responsible for executing the strategy once agreed by the Board. All developments in the Company's business are communicated to the shareholders via regulatory news service (RNS) announcements, Annual Report and Accounts, half yearly announcements and investor presentations at the Company's Annual General Meetings.

The Company's overall strategic objective is to develop its Tanzanian operations to generate a near term cashflow and seek strategic growth and consolidation opportunities, yielding value to shareholders. The Company aims to achieve this through our technical expertise, operational capabilities and industry contacts, secured by the close links we forge with the Tanzanian authorities and the local communities in which we operate. Completion of the Farm-Out Agreement is expected to fully fund Aminex through to full-field development of the Ntorya gas field and to relieve the Company of all its development capital requirements associated with the field.

Risk assessment and evaluation is an essential part of the Company's planning and an important aspect of the Company's internal control system. The Company strives to develop strong working relationships with its partners and suppliers in Tanzania to manage and mitigate the operational risks.

Seek to understand and meet shareholder needs and expectations

The Company's Chief Executive Officer and Non-Executive Chairman are responsible for shareholder liaison. They hold regular meetings with major shareholders and analysts to discuss the Company's strategy and performance and maintain a dialogue between the Company and its investors. The entire Board receives feedback following these meetings and any issues raised are discussed. The Non-Executive Chairman and Independent Non-Executive Director are available to meet with shareholders if required.

The Annual General Meeting (AGM) is the main forum for dialogue between the Board and the shareholders. All Directors aim to attend the AGM. The Non-Executive Chairman leads the AGM and takes questions from the floor. The Chief Executive Officer receives regular industry and peer updates, to enable him to keep current on issues relevant to the Company and its shareholders.

Take into account wider stakeholder and social responsibilities and their implications for long-term success

The Company's ability to achieve its long-term success is dependent on good relations across a wide range of stakeholders both internally (employees) and externally (partners, suppliers, regulatory authorities, local governments and communities in which we operate).

Our employees are one of the most important stakeholder groups and the Board recognises the need for two-way communication with the workforce. The small size of the Company means that the Directors and senior managers are relatively accessible to all employees to provide and receive feedback.

We recognise our responsibilities to the environment and community in the areas in which we operate. The Company places a high priority on operating to high standards of integrity and ethics. We recognise that our activities may have an impact on the environment and therefore aim to minimise that impact by operating in a socially responsible manner. The Company seeks to behave as a responsible employer and make positive contributions to the local economies.

All the Company's stakeholders have access to contact information for communication with the Company. Feedback is respectfully acknowledged by the Company and appropriately dealt with.

Embed effective risk management, considering both opportunities and threats, throughout the organisation

The Board acknowledges its overall responsibility for ensuring that the Company has a robust framework of risk management and an appropriate system of internal control. However, any system can only provide reasonable, not absolute, assurance against material misstatement or loss and is designed to manage but not to eliminate the risk of failure to achieve business objectives. The key risk management procedures are preparation of annual budgets for approval by the Board; cash flow management and treasury policies and procedures for the management of liquidity, currency and credit risk on financial assets and liabilities; regular management, committee and Board meetings to review operating and financial activities; consideration of industry and country-specific risks as part of the Company's review of strategy; recruitment of appropriately qualified and experienced staff to key financial and management positions; and preparation of annual financial statements, including external audit review.

Maintain the board as a well-functioning, balanced team led by the chair

The Board consists of four members and comprises a Non-Executive Chairman, an Executive Director and two Non-Executive Directors. The Chairman is responsible for the leadership of the Board, ensuring its effectiveness and setting its agenda and, with support from the Audit and Risk Committee, is responsible for the Company's approach to corporate governance and the application of the principles of the QCA Code. There is a clear division of responsibilities between the roles of Chief Executive Officer and Non-Executive Chairman. The Senior Independent Director is Linda Beal.

All Directors are expected to attend the scheduled meetings during the year. In addition, other meetings and calls are held in between each scheduled meeting to ensure that Non-Executive Directors are kept informed of corporate developments. To ensure that the Directors can properly carry out their roles all Directors receive reports and papers on a timely basis for Board and Committee meetings. The Directors have access to a regular supply of financial, operational and strategic information to assist them in the discharge of their duties. Such information is provided as part of the normal management reporting cycle undertaken by senior management. All Directors have access to the advice and services of the Company Secretary and may obtain independent professional advice at the Group's expense.

The Directors allocate appropriate time for the proper discharge of their duties and understand the need to commit additional time in exceptional circumstances and have been committing and will continue to commit significant additional time to the Company.

The Board is responsible for setting the overall strategy of the business, reviewing management performance and ensuring the Company has sufficient financial and human resources to meet its objectives. It directs the Company's activities in an effective manner through regular Board meetings and monitors performance through timely and relevant reporting procedures. The Board is specifically responsible for approval of budgetary and business plans; approval of significant investments and capital expenditure; approval of annual and half-year results and interim management statements, accounting policies and the appointment and remuneration of the external auditors; changes to the Group's capital structure and the issue of any securities; establishing and maintaining the Group's risk appetite, system of internal control, governance and approval authorities; executive performance and succession planning; determining standards of ethics and policies in relation to health, safety, security, environment, social and community responsibilities; disclosure to the market and shareholders.

Board Committees

During 2019, the Board had an Audit and Risk Committee, a Remuneration Committee and a Nominations Committee, each of which has formal terms of reference approved by the Board. The activities of the Committees are set out on pages 20 to 22.

Attendance at Board and Committee meetings is set out on page 23.

The Chairman, John Bell, and the Senior Independent Director, Linda Beal, are the Company's independent Directors. John Bell and Linda Beal each have a beneficial interest in the Company and participate in the Aminex PLC Share Option Scheme. After due and careful consideration of, and taking into account, overall remuneration packages and level of workload, share options were granted to John Bell and Linda Beal during 2019 and 2020 and the Company does not comply with the QCA Code in this respect. The Board believes that such participation enhances alignment between the Non-Executive Directors and shareholders. The Board considers John Bell and Linda Beal are free from any business relationships or circumstances that could materially interfere with the exercise of their independent judgement.

Ola Fjeld does not have a beneficial interest in the Company and Ola Fjeld and Robert Ambrose do not currently participate in the Aminex PLC Share Option Scheme. Ola Fjeld is the Chief Operating Officer of ARA Petroleum LLC and Robert Ambrose was formerly the Chief Operating Officer of The Zubair Corporation's Energy & Logistics Division, which are both part of The Zubair Corporation and an associate company of Eclipse Investments LLC ("Eclipse"), a major shareholder in the Company, and were nominated by Eclipse Investments LLC to be Non-Executive Directors. The Board recognises this potential conflict of interest and procedures are in place to ensure that the obligations of Eclipse-appointed representatives as Directors of Aminex are observed. With his new role as Interim Chief Executive Officer, Robert Ambrose will no longer be a representative of Eclipse.

The Chairman considers that the Company has a balanced and diverse Board with the requisite skills to source and assess future strategic growth and consolidation opportunities as it transitions from operator to non-operator of its key asset.

Ensure that between them the directors have the necessary up-to-date experience, skills and capabilities

The Company is committed to ensure that the Board has a suitable mix of skills and competencies covering all essential disciplines and is sufficiently diverse and appropriately balanced. In its work in the area of Board renewal, the Nominations Committee looks at a number of criteria when considering Non-Executive Director and Executive Director candidates, including: international business experience, particularly in the region in which the Group operates or into which it intends to expand; skills, knowledge and expertise (including educational or professional background) in areas relevant to the operation of the Board; diversity, including nationality and gender; and the need for an appropriately sized Board.

During the ongoing process of Board renewal, each, or a combination, of these factors can take priority. The Board appointed its first female Director in January 2019. Whilst only two nationalities are represented on the Board, the Directors have a wide range of backgrounds and experiences including African oil and gas operations, listed company, commercial, transaction and financial experience. The average tenure of service by a Director is under three years.

The nature of the Company's business requires the Directors to keep their skillset up to date. The Directors are kept informed on relevant regulatory compliance and statutory matters through briefings by external advisers and all Executive and Non-Executive Directors have access to the Company's external advisers.

All Company Non-Executive Directors also hold directorships and senior management roles in other companies, helping to ensure broad and current experience. Further training is available at the Company's expense.

Evaluate Board performance based on clear and relevant objectives, seeking continuous improvement

The Board considers that the combination of Non-Executive and Executive Directors is of sufficient competence and experience to support the strategy and development of the Company. The Chairman and Nominations Committee will continue to review and monitor the strength and objectivity of the Board and seek improvement.

Succession planning is currently undertaken on an informal basis by the Chairman in consultation with the Board. The Board is satisfied that this is appropriate for this stage in the Company's development.

While the Chairman and Nominations Committee evaluate requirements for the Board, a formal evaluation process for the Board as a whole, as well as of its Committees and Directors, has not taken place in the year. The Company does not currently comply with the QCA Code in this respect.

Promote a corporate culture that is based on ethical values and behaviours

Our ethics

The Company is committed to upholding high ethical standards and principles, both in letter and in spirit, throughout all of our operations. The Company aspires to, and encourages its staff to operate in a socially responsible manner, acting professionally at all times.

The Company is committed to a strong ethical and values-driven culture encompassing the highest standards of quality, honesty, openness and accountability, and understands that any issues counter to this culture could have an

extremely negative impact on the business. The Company, its management, employees, contractors and partners have the responsibility of applying the highest standard of ethical business practices in all their relationships with shareholders, suppliers, and the general public.

Creating a fair and inclusive culture

The Company promotes an inclusive, transparent and respectful culture. Led by the values of responsibility, excellence and continuous improvement, integrity and trustworthiness, cooperation and engagement, empathy and fairness they apply their skills and expertise every day to ensure we operate both responsibly and successfully.

The Company is an equal opportunity employer and seeks to hire, endorse and retain highly skilled people based on merit, competence, performance, and business needs. The Company is committed to employment policies which follow best practice, based on equal opportunities for all employees, irrespective of ethnic origin, religion, political opinion, gender, marital status, disability, age or sexual orientation.

The Company communicates its corporate culture through staff presentations and inductions. To embody and promote sound ethical principles, the Board has endorsed the following key policies: Employee Handbook; Code of Business Conduct; Share Dealing Policy; Anti-Bribery and Corruption Policy; Whistleblowing Policy; and Health, Safety, Security and Environment Policy.

Share Dealing Policy

The Company has adopted a Market Abuse Regulation-compliant share dealing policy for Directors and employees of the Company. The Directors consider that this share dealing policy is appropriate for the Company. The Company takes all reasonable steps to ensure compliance with the share dealing policy by the Directors and employees.

Health, Safety, Security and Environment (HSSE) Policy

The Company's objectives include observing a high level of health, safety and security standards, developing our staff to their highest potential and being a good corporate citizen in Tanzania. The Company is committed to providing a safe and secure working environment for its employees and anyone doing work on the Company's behalf. The Management Risk Committee reviews and makes recommendations concerning risk, health, safety and security issues. HSSE is discussed at each scheduled Board meeting of the Company.

Whistleblowing Policy

The Company has a Whistleblowing Policy in place to assist employees, suppliers, contractors and others with the reporting of any malpractice or illegal act or omission by others. The policy is reviewed at least every two years or more often if necessary and is communicated to all employees. It was last reviewed in January 2020.

Anti-Bribery and Corruption policy

The Company's Anti-Bribery and Corruption policy formalises the Company's zero-tolerance approach to bribery and corruption. The Company expects all employees, suppliers, contractors and consultants to conduct their day-to-day business activities in a fair, honest and ethical manner, and to be aware of and refer to the Anti-Bribery and Corruption Policy in all of their business activities worldwide and to conduct all business in compliance with it. The Company seeks to enforce effective systems to counter bribery, such as secondary authorisations for payments. We also expect and require high standards of behaviour from our partners.

The Anti-Bribery and Corruption Policy is reviewed at least every two years and is communicated to all employees. It was last reviewed in January 2020 and training for all employees will be provided during 2020.

Maintain governance structures and processes that are fit for purpose and support good decision-making by the Board

The Board of Directors recognises the importance of applying the highest standards of corporate governance to enable effective and efficient decision making, and to assist the Directors in discharging their duty to promote the success of the company for the benefit of its shareholders. The Board is responsible for the Group's system of internal controls, the setting of appropriate policies on those controls, the regular assurance that the system is functioning effectively and that it is effective in managing business risk. The system of internal control is designed to manage rather than eliminate the risk of failure to achieve business objectives.

The Audit and Risk Committee monitors the Group's internal control procedures, reviews the internal controls processes and risk management procedures and reports its conclusions and recommendations to the Board.

The Directors consider that the frequency of Board meetings and the information provided to the Board in relation to Group operations assists the identification, evaluation and management of significant risks relevant to its operations on a continuous basis.

Preparation and issue of financial reports to shareholders and the markets, including the consolidated financial statements, is overseen by the Audit and Risk Committee. The Group's financial reporting process is controlled using documented procedures. The process is supported by a Group finance team based in the UK and finance personnel in Tanzania who have responsibility and accountability to provide information in keeping with agreed policies. Aminex's processes support the integrity and quality of data by arrangements for segregation of duties. Each reporting entity's financial information is subject to scrutiny at reporting entity and Group level by the Chief Executive Officer and Chief Financial Officer. The half-year and annual consolidated reports are also reviewed by the Audit and Risk Committee in advance of being presented to the Board for review and approval.

Other key policies and procedures include preparation of annual budgets for approval by the Board; ongoing review of expenditure and cashflow versus approved budget; establishment of appropriate cashflow management and treasury policies for the management of liquidity, currency and credit risk on financial assets and liabilities; delegation of authorities and bank mandates; regular management, committee and Board meetings to review operational and financial activities; recruitment of appropriately qualified and experienced staff to key financial and management positions; Management Risk Committee, risk management procedures and risk register to assist with the identification and management of risk.

The Board reserves for itself a range of key decisions to ensure that it retains proper direction and control of the Company whilst delegating authority to the Chief Executive Officer who is responsible for the day to day management of the business.

The following matters are reserved for the Board:

- all matters which exceed the authority delegated to the Chief Executive Officer;
- mergers and acquisitions transactions;
- strategy, budgets and business plans;
- audit, financial and other reporting;
- changes in the capital structure of the company and the issue of shares or other securities by the Company;
- policies and guidelines;
- internal controls and governance;
- appointment or removal of Directors and the Group Company Secretary;
- establishment of sub-boards and committees;
- appointment, re-appointment or removal of the auditors and any other corporate advisers.

The Company conducts a review of the Company's governance framework each year and takes into account audit recommendations.

Communicate how the Company is governed and is performing by maintaining a dialogue with shareholders and other relevant stakeholders

Aminex is committed to open communication with all its stakeholders. The Company communicates regularly with shareholders including the release of the interim and annual results and following significant developments. The Annual General Meeting is normally attended by all Directors. Shareholders, including private investors, are invited to ask questions on matters including the Group's operations and performance and to meet with the Directors after the formal proceedings have ended.

The Group maintains a website (www.aminex-plc.com) on which all announcements, financial statements and other corporate information are published. The Directors are available to meet institutional shareholders for ad hoc discussions. The Senior Independent Director is available to meet with shareholders if they have concerns which contact through the normal channels of the Chairman and Chief Executive Officer has failed to resolve or for which such contact is inappropriate.

Copies of the Annual Report and Financial Statements are issued to all shareholders who have requested them and copies are available on the Group's website www.aminex-plc.com.

The Board discloses the result of general meetings by way of announcement and in order to improve transparency, the Board has committed to announcing proxy voting results in future and disclosing them on the Company's website. In the event that a significant portion of voters have voted against a resolution, an explanation of what actions it intends to take to understand the reasons behind the vote will be included.

Audit and Risk Committee

Composition of the Audit and Risk Committee

The Audit and Risk Committee comprises two members, both of whom are independent Non-Executive Directors including the chair, Linda Beal, who is considered by the Board to have recent and relevant financial experience. During the year, the Audit and Risk Committee comprised Keith Phair (Chair) (until 4 February 2019), Linda Beal (Chair) (from 5 February 2019), Tom Mackay (until 23 May 2019) and John Bell (from 24 May 2019). All members of the Committee are deemed to be financially competent and suitably qualified. The terms of reference for the Audit and Risk Committee are available for inspection on the Company's website www.aminex-plc.com.

Activities of the Audit and Risk Committee

The Audit and Risk Committee meets formally at least four times a year and otherwise as required and also meets with the Company's external auditor at least twice a year. The Audit and Risk Committee met five times during the year. All Directors are invited to attend, and four of the Committee meetings were attended by the Chief Executive Officer and the Finance Director or Chief Financial Officer. The external auditor also attended part of some of the meetings, as required and met separately with the Committee Chair.

The main roles and responsibilities of the Audit and Risk Committee are to monitor the integrity of the Company's financial statements, review key financial reporting judgements and estimates and review and monitor the effectiveness of the Group's internal control and risk management systems. The Committee also reviews and approves the audit and non-audit fees due to the Group's external auditor, approves the external auditor's letter of engagement and reviews the external auditor's report to the Audit and Risk Committee. In undertaking this review, the Audit and Risk Committee discussed with management and the external auditor the critical accounting policies and judgements that had been applied. In addition, it considers the financial performance, position and prospects of the Group and the Company and ensures they are properly monitored and reported on. It oversees the relationship with the external auditor (including advising on their appointment, agreeing the scope of the audit and reviewing the audit findings). The Audit and Risk Committee is also responsible for the appointment of the external auditor and during 2019 conducted an audit tender for the appointment of a new external auditor. During the year, the Audit and Risk Committee discharged its responsibilities as follows:

Integrity of the financial statements

The Audit and Risk Committee reviewed the interim and annual financial statements prior to Board approval, the appropriateness of the Group's key accounting policies, key judgements and estimates adopted in preparing the financial statements and the potential impact on the Group's financial statements of certain matters such as impairment of non-current asset values.

The Audit and Risk Committee determined that the key risks of misstatement of the Group's financial statements related to the carrying value of exploration and evaluation assets, the carrying value of production assets held under property, plant and equipment, the recoverability of trade receivables, the recognition of contingent liabilities, including commitments and certain amounts sought by the TPDC, and going concern. These issues were discussed with management during the

year when the Committee considered the half-year financial statements in September 2019 and the financial statements for the year ended 31 December 2019 in April 2020. These matters and how they were addressed are set out in further detail below:

Carrying value of exploration and evaluation assets

The total carrying value of exploration and evaluation assets at 31 December 2019 is US\$49.0 million. The Audit and Risk Committee assessed the carrying value of exploration and evaluation assets by applying the industry-specific indicators of impairment set out in IFRS 6 "Exploration for and Evaluation of Mineral Resources" along with a review of any other potential indicators of impairment. The Audit and Risk Committee considered the expiry of and prospect of extensions to each licence, anticipated continuance of activity and planned expenditure and whether there was any indication that the carrying cost was unlikely to be recovered from a successful development or sale.

The Audit and Risk Committee considered the recoverability of the carrying value of the Ruvuma PSA, which contains the Mtwara Licence and Lindi Licence. The Committee noted the Lindi licence expired in January 2017, and although the expiry of an exploration licence would ordinarily be an indicator of impairment the Ruvuma PSA states that there is no ringfencing of exploration costs between licences and therefore the cost pool for the Lindi Licence was considered recoverable from the Mtwara Licence under the Ruvuma PSA. In December 2019, the Tanzanian Government issued the new Petroleum Regulations, including The Petroleum (Cost Recovery Accounting) Regulations 2019, which state that costs shall be ringfenced to each licence where there is more than one licence in a contract area. There is an economic stabilisation clause in the Ruvuma PSA, however as there is now uncertainty as to the impact of The Petroleum (Cost Recovery Accounting) Regulations 2019, the Committee concurred with management that the Lindi Licence exploration costs of US\$10.4 million should be provided for until either a new PSA is granted for the Lindi Licence or the Company is able to demonstrate with sufficient certainty that The Petroleum (Cost Recovery Accounting) Regulations 2019 should not impact the recovery of Lindi costs under the Mtwara Licence.

The Audit and Risk Committee were satisfied no further provision for impairment was required against the remaining carrying value of the Ruvuma PSA. The Committee considered the Farm-Out Agreement under which all conditions precedent except for Government approval have been satisfied in assessing the conclusion by management that no additional adjustments to the impairment provision for exploration and evaluation assets is required for the period under review.

In 2018, the Group's Nyuni Area PSA asset was fully impaired following notification from the Tanzanian authorities that the Nyuni licence would end in October 2019 and to withhold all work on the licence pending a review of the PSA. An application for a second extension period of three years was submitted during the year, but has not yet been approved. Accordingly, the Committee confirmed management's conclusion that the Nyuni Area PSA assets should continue to be fully impaired at 31 December 2019 and any expenditure related to the Nyuni Area PSA in 2019 will be fully provided against.

Carrying value of property plant and equipment

The Audit and Risk Committee assessed the carrying value of the development asset at Kiliwani North in Tanzania.

The Committee considered the value-in-use based on a management estimate which itself is based on independent resource estimates for the Kiliwani North Development Licence and compared these valuations with the expected recoverable value of the cash-generating unit ("CGU"). The Committee took into consideration the delays incurred during the year in seeking approvals for remediation work to renew production at the Kiliwani North-1 well and the potential for continued delays. The Committee reviewed and challenged the assumptions used in management's assessment, discussed these in detail with senior management and, based on the above, concurred with management that there was a partial impairment on the Kiliwani North CGU of US\$0.8 million. The Committee continues to closely monitor the progress of the well remediation programme and any new information available to provide increased certainty on the assumptions used in the value-in-use valuation. The total carrying value of producing and development assets classified as property, plant and equipment assets at 31 December 2019 is US\$1.6 million.

Carrying value of intra-group loans

Following the impairment of the Group's exploration and evaluation assets and Kiliwani North CGU in 2019, the partial impairment provision for the Company's intercompany loan due from its subsidiary Ndovu Resources Limited was increased. The Audit and Risk Committee assessed the carrying value of the Company's intra-group loans with its subsidiaries and management's recommendation for a further increase in the impairment provision. The assessment took into consideration the ability of the subsidiary undertakings to service the loans that are repayable on demand and are not subject to interest.

Recoverability of the TPDC trade receivable

The Audit and Risk Committee considered the status of the TPDC trade receivables balance of US\$7.8 million, of which Aminex's net share amounted to US\$3.2 million, due from the TPDC for invoiced gas sales and interest for late payment thereon. The Committee noted that the delay in settlement of the balance was connected with requests from the TPDC for certain payments that the TPDC is seeking to offset against the trade receivables balance. The Committee noted that as disclosed in Note 15, the TPDC has requested payment of certain amounts totalling US\$6.0 million for liabilities arising on revenues from gas sales, of which Aminex's share is estimated to be US\$2.7 million. Of the amount claimed, Aminex has already accrued for the liabilities it considers appropriate based on its own calculations of amounts due as at 31 December 2019. Aminex has advised the TPDC that it does not accept the balance of the claims, which include computational inaccuracies. The Committee took into account third party legal advice that supports the Company's position. The TPDC has delayed settling its trade receivable balance while discussions continue. However, as the trade receivable balance for gas sales is not disputed Aminex expects to recover the full amount. In accordance with IFRS 9, Aminex calculated its expected credit loss based on its exposure to credit risk on its trade receivables at the end of the period and recognised an impairment on trade receivables of US\$582,000 charged to administrative expenses in the income statement. This expected credit loss ("ECL") reflected the continued delays by the TPDC to settle amounts due as discussions continue in respect of amounts claimed by the TPDC. The ECL is calculated on the full amount of US\$7.8 million due to

the Group for gas sales. Any credit loss would be reduced by the liability due to the Group's joint venture partners in respect of amounts due. The Audit and Risk Committee concurred with management that as the trade receivable balance is not disputed the trade receivable balance should be recognised in full subject to the ECL set out in Note 15.

Recognition of commitments, guarantees and contingent liabilities

The Audit and Risk Committee considered the ongoing tax audit covering the period from 2013 to 2015 with the Tanzania Revenue Authority ("TRA"). The assessment took into account relevant tax legislation and local tax consultant advice. The Committee further considered and assessed the status of management's discussions with the TPDC concerning requests for payments of certain amounts sought by the TPDC under profit share arrangements (see Note 24). The assessment took into account third party legal advice. The Committee concluded that adequate accruals had been made and the disclosure of the matter as a contingent liability was appropriate. The Committee also reviewed the other guarantees, commitments and contingent liabilities set out in Note 24 and considered them to be appropriate.

Going concern

The Audit and Risk Committee considered the Group's ability to continue as a going concern. The Committee reviewed and challenged the cash flow projections and sensitivity analysis performed, together with the key assumptions on which they were based, prepared by management for the 14-month period from the date of approval of the financial statements to 30 June 2021.

The Committee considered the recoverability of and expected timing of receivables amounting to US\$7.8 million, of which Aminex's share is US\$3.2 million, due from the TPDC. The Committee took into account the notification for payment of US\$6.0 million by the TPDC received on 11 April 2018 (see Note 15), which is still under discussion with the TPDC as Aminex has notified the TPDC that it does not accept some of the claims, together with more recent correspondence and external legal advice on certain matters arising therefrom. Due to these uncertainties, the TPDC receivables were not taken account of in the cash forecast for prudence.

The Committee reviewed the timing of the expected completion of the remaining conditions precedent relating to the Farm-Out and the consideration of US\$5.0 million plus recovery of back costs since the effective date of the Farm-Out Agreement of 15 March 2018 from APT payable by APT on completion and the repayment of the loan facility from APT due on completion. Further, the Committee considered the requirement to fund the US\$2.2 million capital gains tax ("CGT") due on the Farm-Out transaction and the non-binding heads of terms for a \$2 million short-term loan from ARA to pay this CGT, repayable out of the Farm-Out consideration. The Committee assessed the risks of and implications arising from non-completion of the transaction, and the terms of the Advance from ARA, which are set out in Note 17.

The Committee noted the Tanzanian tax assessment received in relation to 2013 to 2015 as set out in Note 24 and that development of the Group's other assets in Tanzania, including the Nyuni Area PSA commitment as set out in Note 24, will require the sourcing of additional funding and concluded that there is significant uncertainty as regards the ability of Aminex to raise funds in the current market conditions.

The Committee was satisfied that it was appropriate for the financial statements to be prepared on a going concern basis assuming that the Group secures a short-term loan from ARA for the CGT liability of US\$2.2 million and that the Farm-Out completes. However the Committee also concluded that there is no certainty that the Farm-Out will complete or that the Group will secure a short-term loan to settle the CGT charge or that the Group could raise additional funds. Therefore the Committee concluded there existed a material uncertainty on the Group's ability to continue as a going concern and accordingly the Group may not be able to realise its assets and discharge its liabilities in the ordinary course of business. The Committee reviewed management's cost mitigation plans in the event that the Group was unable to complete the Farm-Out and concluded that the plans were appropriate.

Misstatements

Management confirmed to the Audit and Risk Committee that they were not aware of any material misstatements or immaterial misstatements made intentionally to achieve a particular presentation.

Discussions with the auditor

The Audit and Risk Committee has received and discussed a report from the external auditor on the findings from the audit, including those relating to the risks noted above.

Conclusion

After reviewing the presentations and reports from management and taking into account views expressed by the external auditor, the Audit and Risk Committee is satisfied that the financial statements appropriately address the critical accounting judgements and key sources of estimation uncertainty (both in respect of amounts reported and the disclosures). The Audit and Risk Committee is also satisfied that the significant assumptions used for determining the value of assets and liabilities have been appropriately scrutinised and challenged and are sufficiently robust.

Audit tendering and rotation

The Committee acknowledges the provisions relating to audit reforms and audit tendering contained in the UK Corporate Governance Code and the EU Directive passed by the European parliament effective from June 2016. KPMG had been the Group's auditor for over 30 years and the audit was subject to mandatory rotation by no later than 2023. The Committee considered that it would be good governance to seek tenders for the audit for the year ended 31 December 2019. The Company held introductory meetings with four audit firms and three of these were formally invited to tender. All three firms accepted the Company's invitation to tender and submitted written proposals. Oral presentations took place in September 2019 and were assessed alongside written submissions against the set of predetermined criteria resulting in the Audit and Risk Committee recommending the preference of BDO to the Board for its consideration. In October 2019, the Board endorsed the Audit and Risk Committee's preference and appointed BDO to become the Group's statutory auditor for the financial year commencing 1 January 2019. The appointment remains subject to approval by shareholders at the 2020 Annual General Meeting.

Work by and independence of external auditor

The Audit and Risk Committee has a policy to monitor the level of audit and non-audit services provided by the Group's external auditor. This policy sets out that non-audit services, which need to be agreed in advance, are normally limited to assignments that are closely related to the annual

audit or where the work is of such a nature that a detailed understanding of the Group is necessary. An analysis of the fees paid to the external auditor in respect of audit and non-audit work is included in Note 5 of the financial statements. In addition to processes and safeguards put in place to ensure segregation of audit and non-audit roles, as part of the assurance process in relation to the audit, the external auditor is required to confirm to the Audit and Risk Committee that they have both the appropriate independence and objectivity to allow them to continue to serve the members of the Group. This is the first year with BDO as auditor and BDO did not provide any non-audit services during the year. No matters of concern were identified by the Audit and Risk Committee.

The Audit and Risk Committee invites the Chief Executive Officer, Finance Director and Chief Financial Officer and representatives of the external auditor to the meetings as appropriate. Members of the Audit and Risk Committee have an opportunity to meet in private without the presence of the Chief Executive Officer, Finance Director, Chief Financial Officer or the external auditor.

The Audit and Risk Committee also has an opportunity to discuss in private any matters with the external auditor without the presence of the Chief Executive Officer, Finance Director or Chief Financial Officer.

Internal audit function

The Audit and Risk Committee reviews the necessity for the establishment of an internal audit function. At present, the Committee does not consider that an internal audit function is required because of the small size of the Group and the direct involvement of senior management in setting and monitoring controls.

Internal controls and risk management

During the year, the Audit and Risk Committee undertook a review of controls and procedures and oversaw the establishment of additional risk management procedures, changes in the finance team to meet the Group's current needs more cost effectively, the Chief Financial Officer's review of finance department procedures in Tanzania and the implementation of cost mitigations and detailed cashflow planning. More information on internal controls and risk management procedures and key areas of risk for the Group are set out below.

Remuneration Committee

During the year, the Remuneration Committee comprised Tom Mackay (Chair) (until 23 May 2019), Linda Beal (Chair) (from 9 January 2019 and Chair from 24 May 2019), Keith Phair (until 4 February 2019) and John Bell (from 24 May 2019). The Remuneration Committee met three times during the year to consider the remuneration of the Group's Executive Directors and the granting of options under the Aminex PLC Share Option Scheme ("the Scheme"). Options were granted in February, June and November 2019 to Directors and staff and, subsequent to the year-end, in February 2020. Details of Directors' remuneration and options held is set out in the Directors' Remuneration Report on pages 27 to 28.

Nominations Committee

During the year, the Nominations Committee comprised John Bell (Chair), Tom Mackay, Sultan Al-Ghaithi (until 4 September 2019) and Linda Beal (from 24 May 2019). The Nominations Committee met once during the year to consider the nomination by Eclipse Investments LLC of Robert Ambrose as a Non-Executive Director in place of Sultan Al-Ghaithi.

Directors' attendance at Board and Committee Meetings

The table below sets out the attendance record of each Director at scheduled Board and Committee meetings during 2019.

	Board (Main)	Audit and Risk Committee	Remuneration Committee	Nominations Committee
Number of meetings	8	5	3	1
	Meetings attended	Meetings attended	Meetings attended	Meetings attended
Sultan Al-Ghaithi ¹	5	n/a	n/a	n/a
Robert Ambrose ²	2	n/a	n/a	n/a
Linda Beal	8	5	2	1
John Bell ³	7	3	2	1
Jay Bhattacharjee ⁴	3	n/a	n/a	n/a
Ola Fjeld	7	n/a	n/a	n/a

Keith Phair ⁶	1	n/a	1	n/a
Max Williams ⁷	7	n/a	n/a	n/a

Key: n/a Not applicable (where a Director was not a member of the Committee)

1) Retired 4 September 2019, 2) Appointed 5 September 2019, 3) Recused from one meeting due to conflict of interest, 4) Retired 23 May 2019, 5) Appointed CEO 24 May 2019, 6) Retired 4 February 2019, 7) Retired 31 October 2019

During 2019, certain Directors who were not committee members attended meetings of the Audit and Risk and Remuneration Committees by invitation. These details have not been included in the table above.

Internal control

The Directors are responsible for the Group's system of internal controls, the setting of appropriate policies on those controls, the regular assurance that the system is functioning effectively and that it is effective in managing business risk.

The system of internal control is designed to manage rather than eliminate the risk of failure to achieve business objectives.

The Audit and Risk Committee monitors the Group's internal control procedures, reviews the internal controls processes and risk management procedures and reports its conclusions and recommendations to the Board.

The Directors consider that the frequency of Board meetings and the information provided to the Board in relation to Group operations assists the identification, evaluation and management of significant risks relevant to its operations on a continual basis.

Preparation and issue of financial reports to shareholders and the markets, including the consolidated financial statements, is overseen by the Audit and Risk Committee. The Group's financial reporting process is controlled using documented procedures. The process is supported by a Group finance team based in the UK and finance personnel in Tanzania who have responsibility and accountability to provide information in keeping with agreed policies. Aminex's processes support the integrity and quality of data by arrangements for segregation of duties. Each reporting entity's financial information is subject to scrutiny at reporting entity and Group level by the Chief Executive Officer and Chief Financial Officer. The half-year and annual consolidated reports are also reviewed by the Audit and Risk Committee in advance of being presented to the Board for its review and approval.

Other key policies and procedures include preparation of annual budgets for approval by the Board; ongoing review of expenditure and cashflow versus approved budget; establishment of appropriate cashflow management and treasury policies for the management of liquidity, currency and credit risk on financial assets and liabilities; delegation of authorities and bank mandates; regular management, committee and Board meetings to review operational and financial activities; recruitment of appropriately qualified and experienced staff to key financial and management positions; Management Risk Committee, risk management procedures and risk register to assist with the identification and management of risk.

Management review risks and update the risk register in regular Management Risk Committee meetings and the Audit and Risk Committee review the risk register at least twice annually. The principal risks and uncertainties are set out below.

The Audit and Risk Committee also ensures that appropriate procedures, resources and controls are in place to comply with the UKLA Listing Rules, Market Abuse Regulation, Ireland and UK companies' legislation and monitors compliance thereof. There are anti-bribery and corruption, whistleblowing and environmental policies, a Code of Business Conduct and share dealing policy which are considered appropriate for the Company.

Following the monitoring and review of the internal control process and the risk management procedures, the Board considers that the system of internal control operated appropriately during the year and up to the date of signing the Annual Report.

Principal Risks and Uncertainties

The Group's strategic objectives for its principal activities, being the production and development of and the exploration for oil and gas reserves, are only achievable if certain risks are managed effectively. The Board has overall accountability for determining the type and level of risk it is prepared to take. The Board has been assisted by the Management Risk Committee, which seeks to identify risks for Audit and Risk Committee and Board consideration and the Audit and Risk Committee which monitors risks, the responsibility for those risks and how they are managed. The following are considered to be the key risks facing the Group that may affect the Group's business, although there are other risks which the Group currently deems to be less material that may impact the Group's performance.

Strategic Risks

Development of assets to production – The Group may fail to expand through the exploration and development of its licences for which it acts as operator with joint venture partners. The failure to fund Aminex's commitments or of joint venture partners to pay their working interests may impact on Aminex's strategy. As noted above, Aminex has entered into a Farm-Out agreement to accelerate the development of and production from the Ruvuma PSA acreage for which shareholder approval was obtained at an extraordinary general meeting held on 4 January 2019, but which remains subject to Government approval.

Mitigation – Aminex seeks to develop its assets to derive production and the growth of cash generative business streams such that it can meet its other commitments with internally-generated funds. The Board considers that the focus of Aminex's activities on development projects, with exploration potential, will provide value creation for shareholders rather than an exploration-led strategy. The Group identifies joint venture partners who are capable of contributing to operations. Pending completion of the Farm-Out, Aminex has maintained a majority interest in each of its licences which offers greater upside potential to shareholders or the possibility of further farm-out opportunities to assist with funding. Aminex has a reasonable expectation that Government approval required for the Farm-Out will be received by the long stop date of 30 June 2020.

Financing risk – Difficult global market conditions and the volatility in commodity prices due more recently to COVID-19 and the oil price drop may impact the Group's operations and in particular the ability to raise equity or debt finance to meet its licence commitments and develop its assets or to allow the Group to enter into transactions on its assets. The Group will need to raise funding or find a partner to meet its licence commitments for the Nyuni Area PSA. The Group has applied for the Second Extension Period of three years together with a request for an amendment to the existing work programme obligation for the licence area and a new proposal for this further extension period.

Mitigation – The Group reviews global conditions and manages its exposure to risk through minimising capital expenditure on high risk assets and will seek to develop fixed price gas projects. Aminex entered into the Farm-Out to access the financial and technical resources of APT and therefore to enable the earlier development of its Ruvuma asset. The Company raised approximately US\$2.40 million before expenses in February 2019 through a placement of new ordinary shares in the capital of Aminex at a price of Stg 1.45p per share and actively engages with potential funders and partners. Aminex monitors costs closely and will seek to take advantage of the low-cost environment for capital commitments where possible. Cost mitigations have been implemented in the year and subsequent to the year end to reduce ongoing G&A expenses.

Operational Risks

Maintaining licence interests – The Group may be unable to meet or agree amendments to its work programme commitments which may give rise either to minimum work obligations needing to be paid or the implementation of default procedures against the Group as operator which may lead to a licence being rescinded or financial penalties. In respect to the Nyuni Area PSA, the Group received notification from the Tanzanian authorities that Nyuni Area Licence period was to end in October 2019, earlier than expected by the Group, which led to impairment of the Nyuni asset in 2018. In the case of the Ruvuma PSA, Aminex has been granted a one year extension to the Mtwara Licence in April 2020. The grant of new licences or extensions to new licences are at the discretion of the Tanzanian authorities. The TPDC holds security over up to 15% of profit share for the Kiliwani North Development Licence in the event that part or all of the work commitments under the terms of the Ruvuma PSA relating to either the Mtwara or Lindi Licences are not fulfilled.

Mitigation – Aminex is committed to fulfilling its obligations and seeks extensions to licence periods and deferrals of or amendments to production sharing terms through negotiation with the TPDC in order to ensure that commitments are met even if not in the original timeframe expected. The Company

was granted the extension to the Mtwara Licence over the Ntorya location in April 2020. Aminex intends to meet its commitments, with each exploration well drilled on the Ruvuma PSA reducing the TPDC's security over the Kiliwani North Development Licence. ARA has been supporting the Group in discussions with the Tanzanian authorities on the Ruvuma PSA. The Group has applied for a Second Extension Period for the Nyuni Area PSA with reduced work commitments, which has been supported by both the TPDC and PURA and is awaiting Ministerial approval.

Exploration risk – Exploration and development activities may be delayed or adversely affected by factors including in particular: climatic and oceanographic conditions; equipment failure; performance of suppliers and exposure to rapid cost increases; unknown geological conditions resulting in dry or uneconomic wells or risk of blowout; remoteness of location.

Mitigation – Aminex mitigates exploration risk by reducing the risk of drilling failure through conducting appropriate studies including the acquisition, processing and interpretation of seismic data. For drilling operations, the Group contracts with international and local service providers with substantial industry experience and safety procedures according to Aminex's own high standards.

Production risks – Operational activities may be delayed or adversely affected by factors including: blowouts; reservoir performance; unusual or unexpected geological conditions; performance of joint venture partners on non-operated and operated properties; seepages or leaks resulting in substantial environmental pollution; increased operational costs; uncertainty of oil and gas resource estimates; production, marketing and transportation conditions; actions of host governments or other regulatory authorities. The Company is awaiting final approval to carry out remedial work on Kiliwani North-1 that may involve down-hole operational risks and which may not guarantee additional production. Although approval is expected there is no firm timeline on when it will be granted.

Mitigation – Although not currently in a production phase, Aminex develops, implements and maintains procedures in order to limit the risk of operational failures on production assets. In the past, through its gas sales agreement, Aminex had an agreed mechanism to enable reservoirs to be produced optimally while seeking to meet the requirements of the purchaser and thereby maximising resources. The Company can take several possible actions for remediation in the near future to maximise recoverable resources.

Compliance Risks

Political risks – Aminex may be subject to political, economic, regulatory, legal, and other uncertainties (including but not limited to terrorism, military repression, war or other unrest). There are risks of nationalisation or expropriation of property, changes in and interpretation of national laws and energy policies which could lead to unanticipated payment demands. The Tanzanian government passed three laws in July 2017, affecting the mining and energy sectors - the Natural Wealth and Resources (Permanent Sovereignty) Act; the Written Laws (Miscellaneous Amendments) Act; and the Natural Wealth and Resources Contracts (Review and Re-Negotiation of Unconscionable Terms). This new legislation includes the right of the Tanzanian authorities to renegotiate 'unconscionable terms' in agreements. New laws were passed in December 2019 relating to cost recoverability. The Tanzanian authorities are currently reviewing a number of PSAs. Tanzanian government elections will take place in October 2020.

Mitigation – Aminex monitors international and national political risk in relation to its interests, liaising closely with governmental and other key stakeholders in Tanzania. The Company has reviewed and continues to monitor the new legislation and the enforcement of such legislation. Based on the Board's current understanding of this new legislation and given the existing terms and conditions of our PSAs, including economic stabilisation provisions in certain of our PSAs, it is unclear if there will be any material impact on Aminex's operations in Tanzania. Aminex is actively seeking to spread asset and regional risk in order to diversify its portfolio and to reduce exposure to one business or region via farm-outs.

Health, safety, security and environmental – The main health, safety and security risks for the Group generally occur during drilling operations and from production operations, although it is recognised that such risks can arise even during a non-operational phase.

Mitigation – The Group develops, implements and maintains effective health and safety procedures, including management of environmental issues and security, to ensure robust safeguards for well control and drilling operations are in place. The Group has appropriate medical and other insurances in place to protect against health, safety and security issues.

Legal compliance – The Group could suffer penalties or damage to reputation through failure to comply with legislation or other regulations, in particular those over bribery and corruption, and these risks may increase when operating in certain regions of the world.

Mitigation – Aminex manages risk of legal compliance failure through the implementation and monitoring of high standards to minimise the risk of corrupt or anti-competitive behaviour. The Company has adopted an updated anti-bribery and corruption policy and all staff will have relevant training during 2020.

Financial Risks

Credit risk – All of the Group's revenues arising from the sale of natural gas to date has been to one customer, the TPDC, which is the gas aggregator and operator of the National Gas Pipeline in Tanzania. Sales of natural gas and the credit terms relating to the sales are governed by a gas sales agreement. The recoverability and timing of receipts are therefore dependent on one customer. As at 31 December 2019, the Kiliwani North partners in jointly controlled operations were owed US\$7.8 million in respect of gas sales and interest on overdue invoices. Delays in receipt of these receivables have arisen largely in relation to various requests for payment made by the TPDC which the Company has advised the TPDC it does not accept and for which the parties are in discussion (see Note 24).

Mitigation – The credit risk arising from future sales to the TPDC can be mitigated by a letter of credit which is required under the gas sales agreement once a commercial operations date has been declared. No such declaration has been made in relation to Kiliwani North-1. Aminex has been regularly engaging with the TPDC to obtain payment of the outstanding payments.

Cost recovery risk – Under its PSAs the Group is entitled to recover certain costs incurred during its operations, as part of its economic return on its investment. There is a risk that not all prior costs will be recognised as recoverable by the relevant Tanzanian authorities. This may be due to a different application of laws by the authorities than that applied by the operator or changes in the law and practice since the date that costs were incurred. If the Tanzanian authorities do not accept the Group's position on prior costs this will impact the economic return on the assets and hence the profitability of the Group.

Mitigation – The Group continues to liaise and attempt to influence the relevant authorities to apply the correct laws and practice. The Group maintains clear and correct procedures for the entering into and filing of contracts.

Currency risk – Although the reporting currency is the US dollar, which is the currency most commonly used in the pricing of petroleum commodities and for significant exploration and production costs, a significant proportion of the Group's other expenditure (in particular central administrative costs) is made in local currencies (as are the Company's equity fundings), and fluctuations in exchange rates may significantly impact the results of the Group and the results between periods, thus creating currency exposure.

Mitigation – The Group has a policy of minimising exposure to foreign currency rates by holding the majority of the Group's funds in US dollars.

Impact on the Group of COVID-19

The global social and economic impact of COVID-19 has been significant. Uncertainty remains as to the long-term implications of the pandemic as we continue to closely monitor governmental guidance to the crisis in our various locations.

The oil price has been hit particularly hard, with Brent falling dramatically in the first quarter of 2020 reaching a mid-April low of under \$20 per barrel, initially as a result of the production level dispute between Russia and Saudi Arabia and subsequently from the fall in global demand as a result of the international restrictions on movement. With the Group's business focus on gas exploration and evaluation and fixed-price sales contracts, it is shielded against the current fluctuations in the global oil price.

The first quarter of 2020 has seen the material drop in global equities as a result of the pandemic coupled with the drop in oil price impacting the sector, which the Group has not been immune to despite not being an oil producer. The Directors recognise that the current macro-economic environment may result in limited or more expensive sources of funding. Continued progress has been made towards closing the Farm-Out transaction which, upon completion, will secure further funds for the Group. Although our Farm-Out partner is also likely to be impacted by current events, the Group remains confident in closing the transaction and its ability to fund its obligations under the Farm-Out.

The Group has reported previously on measures it has taken since 2019 to significantly reduce G&A costs. Additional steps continue to be made to further reduce costs and enable the Group to best position itself, to manage the potential longer-term impacts of the pandemic, whilst it focuses in the near-term on fiscal, financial and regulatory matters.

It is likely that if the restriction on movement continues for a significant period, there may be a delay in the Group's operations in Tanzania as access to sites, personnel and equipment may not be possible. The Group will consequently carefully review any capital asset investment decisions and take further action to reduce costs if necessary.

In these unprecedented times, clearly the priority for the Group remains the health and wellbeing of our employees and wider stakeholders.

Going concern basis

The financial statements of the Group are prepared on a going concern basis.

The Directors have given careful consideration to the Group's ability to continue as a going concern through review of cash flow forecasts prepared by management for the period to 30 June 2021, review of the key assumptions on which these are based and sensitivity analysis. The Directors have taken into account the Farm-Out, which is an assignment of a 50% interest in the Ruvuma PSA to APT, for which shareholder approval was obtained at an extraordinary general meeting held on 4 January 2019 and which has a long stop date of 30 June 2020. While the conditions precedent within the control of Aminex and APT have been satisfied, the Farm-Out remains subject to certain government approvals. Under the terms of the Farm-Out Agreement, on completion the Group will receive US\$5 million in cash consideration plus payment for interim costs incurred on the Ruvuma PSA since 15 March 2018, the effective date of the Farm-Out. On 12 November 2019, Aminex and APT signed a funding agreement whereby APT has agreed to provide a US\$3 million advance in instalments to the Company, prior to the Completion of the Farm-Out (the "Advance"). US\$2 million of the Advance has been drawn down as at 30 April 2020. The US\$5 million cash consideration will settle the advance funding immediately on Completion. The capital gains tax ("CGT") payable on the Farm-Out amounts to US\$2.2 million and the Company is in advanced negotiations with ARA for a US\$2 million short-term loan to pay this tax and has a signed non-binding heads of terms. The CGT payment is a prerequisite to the Ministry of Energy approval of the Farm-Out. On completion of the Farm-Out, the Advance and the short-term loan will be immediately repaid to ARA out of the Farm-Out cash consideration.

Trade receivables of US\$7.8 million, of which Aminex's net share is US\$3.2 million, have not been taken into account in the cash flow forecast due to the claims for certain amounts by the TPDC, set out in Note 24 to the financial statements. Although this trade receivable is due, the TPDC continue to delay payment until a resolution is reached in respect of the claims and the Directors consider it prudent not to take this receivable amount into consideration of the Group's ability to continue as a going concern. As disclosed in Note 24, the Group received a tax assessment from the TRA of US\$2.2 million in relation to a prior period audit related to 2013 to 2015 which is excluded from the cash forecast as any cash outflow during the going concern period is considered remote. If the tax assessment finding went against the Group it is likely additional funding would be required to settle any potential liability.

The Group implemented cost cuts during 2019 to reduce its G&A expenditure and is currently in the process of implementing further cost reduction measures to preserve cash in response to depressed market conditions due to COVID-19 and the oil price fall.

The Directors have a reasonable expectation that the Group will receive the short-term loan from ARA to pay the CGT on the Farm-Out and be able to complete the Farm-Out with APT and repay the Advance and short-term funding out of the consideration. Based on this expectation, the Directors concluded that the Group would have sufficient resources to continue as a going concern and meet its obligations as and when they fall due for a period of not less than 12 months from the date of approval of the consolidated financial statements and consequently the consolidated financial statements have been prepared on a going concern basis.

However, there is no certainty that the Group will obtain the short-term loan to settle the US\$2.2 million CGT or that the Farm-Out with APT will complete as it remains subject to Tanzania government approval. If the Farm-Out does not complete, the Group will need to seek additional funding. In addition, development of the Group's other assets in Tanzania will require the sourcing of additional funding. This includes the Nyuni Area PSA where the Group has applied for the licence to be extended on a revised work programme, as disclosed in Note 24. The Kiliwani North Development Licence has no work programme commitments. The impact of COVID-19 in Tanzania is uncertain and, depending on the measures taken to combat the pandemic locally, could adversely impact the completion of the Farm-Out. There is also significant uncertainty as regards the ability of Aminex to raise funds in the current market conditions due to the COVID-19 pandemic and the depressed oil price. These may result in the Company having to raise funds at whatever terms are available at the time.

These matters indicate the existence of a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern. If the Farm-Out does not complete, and the Group cannot raise additional funding to meet licence commitments or potential tax assessment, or the Group is unable to renegotiate or defer commitments on its Licence interests, the Group will be unable to realise its assets and discharge its liabilities in the normal course of business. The consolidated financial statements have been prepared on a going concern basis and do not include any adjustments that would be necessary if this basis were inappropriate.

On behalf of the Board,

Linda Beal

Director
30 April 2020

Directors' Remuneration Report

In preparing this Report, the Remuneration Committee has followed the provisions of the QCA Code published in April 2018, unless otherwise stated.

Following a review of its remuneration policy by an independent external consultancy in 2017, and subsequent recommendation by the Remuneration Committee, it was resolved that the Executive Directors' remuneration package should have a combination of the following components:

- Base Salary;
- Annual Performance Bonus Award; and
- Award of Options under the Aminex PLC Share Option Scheme.

Base Salary should be benchmarked against comparable companies in the Company's peer group. Any Annual Bonus Award is to be set against key business performance indicators to be set at the beginning of each year and the Committee will continue to consider the award of options under the Aminex PLC Share Option Scheme.

When determining the total remuneration of the Executive Directors, the Committee takes into account the remuneration practices adopted in the general market. The Committee also commissioned an updated benchmarking study during 2019 from an external consultancy.

Remuneration of Directors

The Non-Executive Directors' fees were as follows:

	2019 US\$'000	Fees 2018 US\$'000
Sultan Al-Ghaithi ¹	30	40
Robert Ambrose ¹	15	-
Linda Beal	44	-
John Bell	73	47
Ola Fjeld ¹	45	40
Brian Hall ²	-	167
Tom Mackay ³	17	47
Keith Phair	-	68
Total	224	409

1 Fees are paid to Eclipse Investments LLC

2 Includes termination benefits

3 Tom Mackay was appointed Chief Executive Officer on 24 May 2019

The remuneration of the Executive Directors was as follows:

	Basic Salary		Bonus		Benefits in kind		Sub total		Pension		Total	
	2019 US\$'000	2018 US\$'000	2019 US\$'000	2018 US\$'000	2019 US\$'000	2018 US\$'000	2019 US\$'000	2018 US\$'000	2019 US\$'000	2018 US\$'000	2019 US\$'000	2018 US\$'000
Jay Bhattacharjee ¹	297	387	-	-	1	3	298	390	6	13	304	403
Tom Mackay	140	-	-	-	-	-	140	0	-	-	140	-
Max Williams ¹	303	287	-	-	5	6	308	293	11	13	319	306
Total	740	674	-	-	6	9	746	683	17	26	763	709

1 Includes termination benefits

The exchange rate used for the translation of base remuneration in Pound sterling into US dollars is 1.2765.

There were no bonuses awarded to the Executive Directors in 2019. Salaries are reviewed annually with effect from 1 January. Benefits in kind comprise life insurance and health insurance. As at 31 December 2019, there was one Executive Director (2018: two) and four Non-Executive Directors (2018: five). There was an average number of two Executive Directors and four Non-Executive Directors holding office during the year.

Share options

Certain Directors participate in the Aminex PLC Share Option Scheme and are granted options over the Company's Ordinary Shares at prevailing market prices at the time of the grant. Options are exercisable not later than ten years after the date of grant, with the majority of options granted being limited to exercise within three to five years of date of grant. The Scheme was established in 1980 and subsequently extended with shareholders' approval at the Annual General Meetings held in 1996, 1999, 2004, 2009 and 2014. The Scheme will expire in May 2020 and then no further options will be granted under the Scheme. The options that have been granted, and set out below, will continue to have effect until expiry or exercise of such options.

The Scheme does not comply in all respects with current best practice of the QCA Code. As stated elsewhere in this report, certain of the Company's Non-Executive Directors hold options over the Ordinary Shares of the Company. The Board considers that it is in the Group's best interests to attract and retain high calibre directors. With limited cash resources, the Board has previously granted options to Non-Executive Directors, and after due and careful consideration of, and taking into account remuneration packages and services provided, options have been granted to Linda Beal and John Bell.

Directors' Remuneration Report continued

The Directors who held office at 31 December 2019 had the following beneficial interests in options over the Company's Ordinary Shares:

Name	Options held at 1 January 2019 Number	Options granted/ (lapsed) during the year Number	Options held at 31 December 2019 Number	Exercise price Sterling	Period of exercise From To	
Linda Beal	-	4,000,000	4,000,000	Stg0.86p	Jun-19	Jun-24
	-	11,000,000	11,000,000	Stg1.40p	Nov-19	Nov-26
John Bell	2,000,000	-	2,000,000	Stg3.08p	Jan-18	Jan-20
	-	6,411,000	6,411,000	Stg1.56p	Feb-19	Feb-29
	-	8,000,000	8,000,000	Stg0.86p	Jun-19	Jun-24
	-	17,000,000	17,000,000	Stg1.40p	Nov-19	Nov-26
Tom Mackay	6,000,000	(6,000,000)	-	Stg1.34p	May-16	May-19
	-	5,000,000	5,000,000	Stg0.86p	Jun-19	Jun-24
	-	20,000,000	20,000,000	Stg1.40p	Nov-19	Nov-26
	8,000,000	65,411,000	73,411,000			

Robert Ambrose and Ola Fjeld have no beneficial interest in any options. Keith Phair, at the date of his retirement, had an interest in 6,200,000 options at prices ranging from Stg1.34p to Stg8.50p and with periods of exercise ending no later than January 2020. Jay Bhattacharjee, at the date of his retirement, had an interest in 8,000,000 options at an exercise price of Stg3.08p to be exercised no later than January 2021. Max Williams, at the date of his retirement, had an interest in 8,000,000 options at prices ranging from Stg3.08p to Stg8.50p and with periods of exercise ending no later than January 2021. Brian Cassidy, the Company Secretary, has an interest in 20,000,000 options with an exercise price ranging from Stg1.40p to Stg3.08p.

No options were exercised and 71,000,000 options lapsed during the year. Options were granted during the year to Executive Directors, Non-Executive Directors and key staff for retention and incentivisation. No options were granted during the year at below market value. Since the year end, 8,000,000 options have been granted at Stg1.02p to John Bell in lieu of remuneration.

Non-Executive Directors

Fees paid to Non-Executive Directors are determined by the Board. Each Non-Executive Director has a letter of appointment and either party may terminate the agreement with notice of three months or less, except in the case of the Chairman, John Bell, who is entitled to six months' notice. Under his letter of appointment, John Bell is entitled to either (i) annual fees of £100,000; or (ii) annual fees of a reduced amount and a further grant of options over ordinary Shares in the Company.

Statement of Directors' Responsibilities in Respect of the Annual Report and the Financial Statements

The Directors are responsible for preparing the Annual Report and the Group and Company Financial Statements, in accordance with applicable law and regulations.

Company law requires the Directors to prepare Group and Company Financial Statements for each financial year. Under that law, the Directors are required to prepare the Group Financial Statements in accordance with IFRS as adopted by the European Union and applicable laws including Article 4 of the IAS Regulation. The Directors have elected to prepare the Company Financial Statements in accordance with IFRS as adopted by the European Union as applied in accordance with the Companies Acts 2014.

Under company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Group and Company and of the Group and Company's profit or loss for that year. In preparing each of the Group and Company financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with IFRS as adopted by the European Union, and as regards the Company, as applied in accordance with the Companies Act 2014; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Group and the Company will continue in business

The Directors are also required by the Transparency (Directive 2004/109/EC) Regulations 2007 and the Transparency Rules of the Central Bank of Ireland to include a management report containing a fair review of the business and a description of the principal risks and uncertainties facing the Group.

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and profit or loss of the Company, and which enable them to ensure that the Financial Statements of the Company comply with the provisions of the Companies Act 2014. The Directors are also responsible for taking all reasonable steps to ensure such records are kept by the subsidiary companies which enable them to ensure that the financial statements of the Group comply with the provisions of the Companies Act 2014. They are also responsible for safeguarding the assets of the Company and the Group, and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities. The Directors are also responsible for preparing a Directors' Report which complies with the requirements of the Companies Act 2014.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Group's and Company's website www.aminex-plc.com. Legislation in Ireland concerning the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Responsibility statement as required by the Transparency Directive

Each of the Directors, whose names and functions are listed on page 11 of this Annual Report, confirm that, to the best of each person's knowledge and belief:

- The Group Financial Statements, prepared in accordance with IFRS as adopted by the European Union, and the Company financial Statements, prepared in accordance with the IFRS as adopted by the European Union as applied in accordance with the provisions of the Companies Act 2014, give a true and fair view of the assets, liabilities, financial position of the Group and Company at 31 December 2019 and of the profit or loss of the Group for the year then ended;
- The Directors' Report contained in the Annual Report includes a fair review of the development and performance of the business and the position of the Group and Company, together with a description of the principal risks and uncertainties that they face; and
- The Annual Report and financial statements, taken as a whole, provides the information necessary to assess the Group's performance, business model and strategy and is fair, balanced and understandable and provides the information necessary for the shareholders to assess the Company's position and performance, business model and strategy

Relevant audit information

The Directors believe that they have taken all steps necessary to make themselves aware of the relevant audit information and have established that the Group's statutory auditors are aware of that information. In so far as the Directors are aware, there is no relevant audit information of which the Group's statutory auditors are unaware.

On behalf of the Board

Robert Ambrose

Director

Independent Auditor's Report to the Members of Aminex PLC

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Aminex Plc ("the Company") and its subsidiaries ("the Group") for the year ended 31 December 2019, which comprise the Group income statement, the Group statement of comprehensive income, the Group and the Company balance sheets, the Group and Company statement of changes in equity, the Group and Company statement of cash flows and notes to the financial statements, including the summary of significant accounting policies set out in note 1. The financial reporting framework that has been applied in their preparation is Irish Law and International Financial Reporting Standards ("IFRS") as adopted by the European Union and, as regards the Company financial statements, as applied in accordance with the provisions of the Companies Act 2014.

In our opinion:

- the Group financial statements give a true and fair view of the assets, liabilities and financial position of the Group as at 31 December 2019 and of its loss for the year then ended;
- the Company statement of financial position gives a true and fair view of the assets, liabilities and financial position of the Company as at 31 December 2019;
- the Group financial statements have been properly prepared in accordance with IFRS as adopted by the European Union;
- the Company financial statements have been properly prepared in accordance with IFRS as adopted by the European Union as applied in accordance with the provisions of the Companies Act 2014; and
- the Group financial statements and Company financial statements have been properly prepared in accordance with the requirements of the Companies Act 2014 and, as regards the Group financial statements, Article 4 of the IAS Regulation.

Basis for opinion

We conducted our audit in accordance with ISAs (Ireland) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Group and Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard as applied to listed public interest entities issued by the Irish Auditing and Accounting Supervisory Authority ("IAASA"), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material uncertainty related to going concern

We draw attention to note 1 to the financial statements, which indicates that the Group will need to raise short term funding and the COVID -19 pandemic may have an effect on the ability of the Group to raise the funds. As stated in note 1, these events or conditions, along with other matters as set out in note 1, indicate that a material uncertainty exists that may cast significant doubt on the Group and Parent Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Given the conditions and uncertainties noted above we considered going concern to be a key audit matter.

We performed the following procedures in respect of this key audit matter:

- We discussed the potential impact of Covid-19 with management and the Audit Committee, including their assessment of potential risks and uncertainties associated with areas such as the Group's operations, ability to secure funding and the potential impact on the farm out and recovery of the Tanzania Petroleum Development Corporation ("TPDC") receivables that are relevant to the Group's business model and operations. We formed our own assessment of risks and uncertainties based on our understanding of the business and oil and gas sector.
- We obtained management's reverse stress testing analysis which was performed to determine the point at which liquidity breaks and considered whether such scenarios, including inability to secure anticipated funding, failure to complete the farm out and delays in receipt of TPDC receivables were possible.
- We critically assessed management's base case cash flow forecasts and the underlying key assumptions which have been approved by the Board. In doing so, we considered factors such as historical operating expenditure. We evaluated commitments under the Production Sharing Agreements and licences, reviewed board minutes, market announcements and correspondence with the TPDC and PURA for indications of additional cash requirements.
- We considered management's judgement that they had reasonable expectation of securing funding through a short term loan to pay the capital gains tax and the completion of the farm out.
- We reviewed and considered the adequacy of the disclosure within the financial statements relating to the Directors' assessment of the going concern basis of preparation.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. In addition to the matter described in the Material uncertainty related to going concern section these matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matter	How we addressed the key audit matter in the audit
Carrying value of Exploration and Evaluation Assets	
<p>As detailed in note 10, the carrying value of Exploration and Evaluation Assets ("E&E assets") amounted to US\$49.0 million at 31 December 2019.</p> <p>Management are required to assess each year whether there are any potential impairment triggers under IFRS 6 Exploration for and Evaluation of Mineral Resources which would indicate that the carrying value of E&E assets may not be recoverable.</p> <p>As disclosed in note 10, management identified an indicator of impairment in respect of the Lindi exploration costs under the Ruvuma production sharing agreement ("PSA") as a result of new regulations issued in December 2019 in respect to the upstream petroleum industry. Management carried out an impairment test and an impairment of US\$10.4 million was recognised in the year ended 31 December 2019 in respect of the Lindi exploration costs.</p> <p>Following impairment indicator assessments in respect of the remaining Mtwara and Kiliwani South E&E assets management concluded that no further impairments were required.</p> <p>Following assessment of the previously impaired Nyuni Area PSA management concluded that no reversal of previous impairments was required.</p> <p>As disclosed in note 1 and 10, the impairment review of the carrying value of E&E assets requires significant judgement by management. Given the materiality of the assets in the context of the Group's balance sheet and the judgement involved in making this assessment we considered this to be a key audit matter.</p>	<ul style="list-style-type: none"> • We critically reviewed Management's impairment review and performed our own assessment of impairment indicators in accordance with IFRS 6 in order to determine whether their assessment was complete and in accordance with the requirements of the accounting standard. • We met with operational management and reviewed board minutes and press releases to assess the exploration activity undertaken in the year, the results of exploration activity and the future plans for each of the licence areas. • We gained an understanding of the strategy the directors are pursuing in each licence area given the delays experienced in securing licence approvals and have reviewed the farm-out agreement the company has entered into for the Mtwara licence to confirm the terms of the farm-out and that, if completed, it would support management's expectation of continued exploration. • We reviewed the external competent persons reports in respect of Mtwara and Kiliwani South in order to assess whether there were any potential impairment triggers which had not previously been identified. We made an assessment of the third party expert by considering, amongst other things, the scope of their work, their independence and their expertise. • We reviewed the Group's budget and planned works programme to determine if substantive expenditure is planned in each licence area to identify whether there were circumstances whereby no further substantive expenditure was planned, which would be an indicator of impairment • We obtained the Mtwara licence extension documents to confirm that the licence has been extended, which is a condition of the farm-out. • We considered management's impairment review and conclusion that it was appropriate to impair the Lindi exploration costs. In doing so, we reviewed the legislation issued in December 2019 and the terms of the Ruvuma PSA and discussed the judgement with the Audit Committee. • In respect of the Nyuni Area PSA we made inquiries of management and reviewed correspondence with the regulatory authorities to evaluate whether the conditions that triggered the original impairment had reversed. • We evaluated the adequacy of the Group's disclosures in respect of the impairment assessments.
<p>Key observations</p> <p>Based on the procedures performed we found management's assessment and disclosures in the financial statement to be appropriate.</p>	

Key audit matters continued

Key Audit Matter	How we addressed the key audit matter in the audit
Carrying value of Property, Plant and Equipment (Producing assets)	
<p>As detailed in note 11, the carrying value of the Group's Production assets amounted to US\$1.6 million and represents capitalised development expenditure on its Kiliwani North-1 gas producing well ("KN-1").</p> <p>Management are required to assess at least annually, whether there is any indication that the Group's producing assets may be impaired. Management are required to perform a detailed assessment if there are indicators of potential impairment.</p> <p>Management identified an impairment indicator, as a result of the continued absence of production and performed an impairment test. As a result, management recorded an impairment of US\$0.8million in 2019.</p> <p>The preparation of the impairment models requires Management to make critical judgements and estimates including in particular the level of gas reserves, methods and rates of production and whether necessary approvals to undertake remedial works will be granted and the timing of such approval.</p> <p>Given that significant judgement and estimation is required in determining the carrying value, this is considered to be a key audit matter.</p>	<ul style="list-style-type: none"> • We evaluated Management's impairment model and challenged the significant inputs, assumptions and judgements. In doing so, we compared the estimated gas reserves to the external competent person's report and extraction rates to consultant reports and agreed gas prices to contract. • We considered the scope and methodology of the works undertaken by the third party experts and assessed their competence and independence. • We considered management's assumptions regarding if and when the necessary approvals to undertake remedial works will be granted and obtained an understanding of the work required. In doing so, we discussed the requirements and status with the Group's in-house technical expert, discussed the judgement with the Audit Committee including the potential for continued delays and performed sensitivities. • We performed sensitivity analysis over key assumptions including the discount rate and timing of remedial work to assess whether the impairment charge was sensitive to these assumptions. • We assessed the adequacy of the disclosures contained within the financial statements.
<p>Key observations</p> <p>Based on the procedures performed we found management's assessment and disclosures in the financial statement to be appropriate.</p>	
Recoverability of TPDC receivables and completeness of TPDC payables	
<p>As detailed in note 15, the Group has significant receivables due from TPDC of US\$7.8 million as at 31 December 2019, the recovery of which continues to be delayed due to the ongoing discussions with TPDC in respect of the TPDC's claims for US\$5.97 million. There has been no resolution to date on this matter.</p> <p>Management are required to make an assessment of expected credit loss provisions related to the TPDC balance in accordance with IFRS 9. Management performed an assessment and recognised an expected credit loss provision of US\$1.27 million as detailed in note 1 and 15.</p> <p>Management are also required to assess the claims by TPDC and determine whether liabilities recorded in the financial statements are complete and whether contingent liabilities require disclosure. As detailed in notes 1 and 24, Management have accrued for the liabilities it considers appropriate and disclosed a contingent liability for the remaining balances.</p> <p>The assessment of the expected credit loss provision and evaluation of the completeness of liabilities and disclosures represented a key audit matter given the significant judgement and estimation required in the assessment.</p>	<p><i>In respect of the TPDC receivables:</i></p> <ul style="list-style-type: none"> • We reviewed correspondence with the TPDC to confirm that the underlying gas sales receivable is valid and considered whether there were indicators of a dispute. We recalculated the additional interest accrued in the period based on the terms of the gas sales agreement and reviewed legal opinions regarding the validity of the interest. • We reviewed the expected credit loss calculation prepared by management against the requirements of the relevant accounting standard and assessed the methodology adopted. We performed sensitivity analysis and considered the appropriateness of the different scenarios considered, recovery outcomes and timing of receipts. In doing so, we made inquiries of management, considered the Group's public announcements, legal advice obtained and correspondence with TPDC. • We assessed the appropriateness of the credit adjusted discount rate applied to the cash flows based on market data. • We reviewed the disclosures in the financial statements against the requirements of the relevant accounting framework and considered whether they appropriately reflect the key judgements. <p><i>In respect of the TPDC claims:</i></p> <ul style="list-style-type: none"> • We reviewed the TPDC claim documents confirming the balance, made inquiries of management and reviewed correspondence for any indications of material developments such as additional claims or acceptance of previously disputed claims.

Key audit matters continued

Key Audit Matter	How we addressed the key audit matter in the audit
	<p><i>In respect of the TPDC claims:</i> continued</p> <ul style="list-style-type: none"> • We reviewed management's assessment against the external legal opinion received in 2018 and held discussions with the Group's internal legal counsel to identify any potential developments that would alter management's assessment. • We evaluated the completeness of liabilities in the financial statements against the TPDC claim documents, supporting documents and requirements under the PSA. • We reviewed and assessed the appropriateness and adequacy of disclosures provided within the financial statements in notes 1 and 24.
<p>Key observations</p> <p>Based on the procedures performed we found management's assessment of the recoverability of the TPDC receivables and TPDC claims, the associated judgements applied and the disclosures in the financial statements to be acceptable.</p>	

Our application of materiality

We apply the concept of materiality both in planning and performing our audit and in evaluating the effect of misstatements. We consider materiality to be the magnitude by which misstatements, including omissions, could influence the economic decisions of reasonable users that are taken on the basis of the financial statements. Importantly, misstatements below these levels will not necessarily be evaluated as immaterial as we also take account of the nature of identified misstatements, and the particular circumstances of their occurrence, when evaluating their effect on the financial statements as a whole.

This is the first year in which we have acted as auditors.

Group materiality FY 2019	Basis for materiality
US\$450,000	0.75% of total assets

We consider total assets to be one of the principal considerations for stakeholders of the Group in assessing the financial performance of the Group.

Whilst materiality for the financial statements as a whole was US\$450,000, the significant components of the group were audited to a lower materiality of US\$320,000 to US\$210,000.

Materiality for the Parent Company was set at US\$320,000 and was restricted to approximately 70% of Group materiality.

Performance materiality is the application of materiality at the individual account or balance level and is set at an amount which reduces to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality for the financial statements as a whole. Performance materiality was set at US\$315,000 for the financial statements as a whole, and US\$224,000 for the Parent Company which represents 70% of the above materiality levels. The level of performance materiality applied was set after having considered a number of factors including the expected total value of known and likely misstatements, the level of transactions in the year and consideration of the effect of this being our first year as auditors to the Group.

We agreed with the Audit Committee that we would report to the committee all audit differences in excess of US\$9,000, as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds. We also report to the audit committee on disclosure matters that we identified when assessing the overall presentation of the financial statements.

An overview of the scope of our audit report

Our audit was scoped by obtaining an understanding of the Group and its environment, as well as assessing the risks of material misstatement in the financial statements at Group level.

Whilst Aminex Plc is a Company registered in Ireland and listed on the London Stock Exchange in the UK, the Group's principal operations are located in Tanzania. In approaching the audit, we considered how the Group is organised and managed. We assessed there to be three significant components being Aminex Plc, Aminex Petroleum Services Limited and Ndovu Resources Limited. All of these were subject to a full scope audit and the audits were conducted by the Group audit team, which included partners and staff from BDO UK who were part of the Group audit team.

The remaining components of the Group were considered non-significant and were subject to analytical review procedures by the Group audit team.

How the audit was considered capable of detecting irregularities, including fraud

We considered the laws and regulations of Ireland, the UK and Tanzania to be of significance in the context of the Group audit. As part of our audit we performed procedures to evaluate the extent of compliance with the relevant local and regulatory frameworks. Our procedures included, but were not limited to agreement of the financial statement disclosures to underlying supporting documentation, performing substantive testing on accounts balances which were considered to be at a greater risk of susceptibility to fraud, reviewing correspondence with the Tanzanian tax authorities, reviewing the terms of exploration and production licences and reviewing correspondence with regulators in so far as the correspondence related to the Financial Statements. There are inherent limitations in the audit procedures described above and the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely we would become aware of it.

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2014

Based solely on the work undertaken in the course of the audit, we report that:

- in our opinion, the information given in the directors' report is consistent with the financial statements; and
- in our opinion, the directors' report has been prepared in accordance with the Companies Act 2014.

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the Company statement of financial position is in agreement with the accounting records.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the group and the parent company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions required by sections 305 to 312 of the Act are not made. We have nothing to report in this regard.

Respective responsibilities

Responsibilities of directors for the financial statements

As explained more fully in the directors' responsibilities statement set on page 29, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Group and the parent Company's ability to continue as going concerns, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or the parent Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: http://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf

This description forms part of our auditor's report.

Other matters which we are required to address

We were appointed by the Audit Committee to audit the financial statements for the year ended 31 December 2019 and subsequent financial periods.

The non-audit services prohibited by IAASA's Ethical Standard were not provided to the group and we remain independent of the group in conducting our audit.

Our audit opinion is consistent with the additional report to the audit committee.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

1 Statement of Accounting Policies

Aminex PLC (the “Company”) is a company domiciled and incorporated in Ireland. The principal activities of the Group are the exploration, appraisal, development and production of oil and gas assets, reserves and resources. The Group operates through subsidiary undertakings, details of which are set out in Note 13 to the financial statements. The Group’s principal area of activity is in Tanzania. The Group financial statements for the year ended 31 December 2019 consolidate the individual financial statements of the Company and its subsidiaries (together referred to as “the Group”). The registered office address is Paramount Court, Corrig Road, Sandyford Business Park, Dublin 18, D18 R9C7, Ireland.

Basis of preparation

The Group and Company financial statements (together the “Financial Statements”) have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as adopted by the European Union (EU).

The principal accounting policies adopted in the preparation of the consolidated and company financial statements are set out below. The policies have been consistently applied to all the years presented, unless otherwise stated.

The consolidated and company financial statements are presented in US Dollars, which is also the Group’s functional currency. Amounts are rounded to the nearest thousand, unless otherwise stated.

The preparation of financial statements in compliance with adopted IFRS requires the use of certain critical accounting estimates. It also requires Group management to exercise judgement in applying the Group’s accounting policies. The areas where significant judgements and estimates have been made in preparing the financial statements and their effect are disclosed below.

The consolidated and company financial statements have been prepared on a historical cost basis.

Going concern

The financial statements of the Group are prepared on a going concern basis.

The Directors have given careful consideration to the Group’s ability to continue as a going concern through review of cash flow forecasts prepared by management for the period to 30 June 2021, review of the key assumptions on which these are based and sensitivity analysis. The Directors have taken into account the Farm-Out, which is an assignment of a 50% interest in the Ruvuma PSA to APT, for which shareholder approval was obtained at an extraordinary general meeting held on 4 January 2019 and which has a long stop date of 30 June 2020. While the conditions precedent within the control of Aminex and APT have been satisfied, the Farm-Out remains subject to certain government approvals. Under the terms of the Farm-Out Agreement, on completion the Group will receive US\$5 million in cash consideration plus payment for interim costs incurred on the Ruvuma PSA since 15 March 2018, the effective date of the Farm-Out. On 12 November 2019, Aminex and APT signed a funding agreement whereby APT has agreed to provide a US\$3 million advance in instalments to the Company, prior to the Completion of the Farm-Out (the “Advance”). US\$2 million of the Advance has been drawn down as at 30 April 2020. The US\$5 million cash consideration will settle the advance funding immediately on Completion. The capital gains tax (“CGT”) payable on the Farm-Out amounts to US\$2.2 million and the Company is in advanced negotiations with ARA for a US\$2 million short-term loan to pay this tax and has a signed non-binding heads of terms. The CGT payment is a prerequisite to the Ministry of Energy approval of the Farm-Out. On completion of the Farm-Out, the Advance and the short-term loan will be immediately repaid to ARA out of the Farm-Out cash consideration.

Trade receivables of US\$7.8 million, of which Aminex’s net share is US\$3.2 million, have not been taken into account in the cash flow forecast due to the claims for certain amounts by the TPDC, set out in Note 24 to the financial statements. Although this trade receivable is due, the TPDC continue to delay payment until a resolution is reached in respect of the claims and the Directors consider it prudent not to take this receivable amount into consideration of the Group’s ability to continue as a going concern. As disclosed in Note 24, the Group received a tax assessment from the TRA of US\$2.2 million in relation to a prior period audit related to 2013 to 2015 which is excluded from the cash forecast as any cash outflow during the going concern period is considered remote. If the tax assessment finding went against the Group it is likely additional funding would be required to settle any potential liability.

The Group implemented cost cuts during 2019 to reduce its G&A expenditure and is currently in the process of implementing further cost reduction measures to preserve cash in response to depressed market conditions due to COVID-19 and the oil price fall.

The Directors have a reasonable expectation that the Group will receive the short-term loan from ARA to pay the CGT on the Farm-Out and be able to complete the Farm-Out with APT and repay the Advance and short-term funding out of the consideration. Based on this expectation, the Directors concluded that the Group would have sufficient resources to continue as a going concern and meet its obligations as and when they fall due for a period of not less than 12 months from the date of approval of the consolidated financial statements and consequently the consolidated financial statements have been prepared on a going concern basis.

However, there is no certainty that the Group will obtain the short-term loan to settle the US\$2.2 million CGT or that the Farm-Out with APT will complete as it remains subject to Tanzania government approval. If the Farm-Out does not complete, the Group will need to seek additional funding. In addition, development of the Group’s other assets in Tanzania will require the sourcing of additional funding. This includes the Nyuni Area PSA where the Group has applied for the licence to be extended on a revised work programme, as disclosed in Note 24. The Kiliwani North Development Licence has no work programme commitments. The impact of COVID-19 in Tanzania is uncertain and, depending on the measures taken to combat the pandemic locally, could adversely impact the completion of the Farm-Out. There is also significant uncertainty as regards the ability of Aminex to raise funds in the current market conditions due to the COVID-19 pandemic and the depressed oil price. These may result in the Company having to raise funds at whatever terms are available at the time.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

1 Statement of Accounting Policies (continued)

Going concern continued

These matters indicate the existence of a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern. If the Farm-Out does not complete, and the Group cannot raise additional funding to meet licence commitments or potential tax assessment, or the Group is unable to renegotiate or defer commitments on its Licence interests, the Group will be unable to realise its assets and discharge its liabilities in the normal course of business. The consolidated financial statements have been prepared on a going concern basis and do not include any adjustments that would be necessary if this basis were inappropriate.

Statement of compliance

The Group financial statements have been prepared and approved by the Directors in accordance with IFRS and their interpretations as adopted by the EU ("EU IFRS"). The individual financial statements of the Company ("Company financial statements") have been prepared and approved by the Directors in accordance with EU IFRS and as applied in accordance with the Companies Acts 2014 which permits a company that publishes its Company and Group financial statements together to take advantage of the exemption in Section 304 of the Companies Act 2014 from presenting to its members its company income statement and related notes that form part of the approved Company financial statements.

Change in accounting policies

i) New accounting standards, interpretations and amendments effective from 1 January 2019

The following new and revised standards and interpretations, all of which are effective for accounting periods beginning on or after 1 January 2019, have been adopted in the current financial year.

- Amendments to IAS 28 Sale of Long-Term Interest in Associates and Joint Ventures.
- IFRS 16 Leases.
- IFRIC 23 Uncertainty over Income Tax Treatments.
- Annual Improvements to IFRS Standards 2015-2017 Cycle.
- Amendments to IAS 19: Plan Amendment, Curtailment or Settlement.
- Amendments to IFRS 9 Prepayment Features with Negative Compensation.

The most significant change in accounting policy arises from the adoption of IFRS 16 Leases, and this is described in detail below.

The Group has adopted IFRIC 23 Uncertainty over Income Tax Treatments which is effective for accounting periods beginning on or after 1 January 2019. The interpretation is applied to the determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates, when there is uncertainty over income tax treatments under IAS 12. The adoption of this interpretation has not had a material impact on the financial statements of the Group.

The other new standards effective from 1 January 2019, as listed above, do not have a material effect on the Group's financial statements.

ii) Standards not affecting the reported results or the financial position

Other new and amended standards and interpretations issued by the International Accounting Standards Board ("IASB") that have been applied for the first time in these annual financial statements have not had a significant impact on the Group as they are either not relevant to the Group's activities or require accounting which is consistent with the Group's current accounting policies.

iii) New standards, interpretations and amendments not yet effective

There are a number of standards, amendments to standards, and interpretations which have been issued by the IASB that are effective in future accounting periods and which the group has decided not to adopt early. The most significant of these are as follows, which are all effective for the period beginning 1 January 2020:

- IAS 1 Presentation of Financial Statements and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors (Amendment – Definition of Material)
- Amendments to IAS 1 Classification of Liabilities as Current or Non-current
- IFRS 3 Business Combinations (Amendment – Definition of Business)
- Revised Conceptual Framework for Financial Reporting

Aminex is currently assessing the impact of these new accounting standards and amendments. None of these are expected to have a significant effect on the Group.

IFRS 16: Leases

IFRS 16 has been adopted by applying the modified retrospective approach from 1 January 2019; consequently, the comparatives for the 2018 reporting period have not been restated, as permitted under the specific transitional provisions in IFRS 16. The reclassifications and the transitional adjustments arising from the new leasing rules are recognised on the date of initial application (1 January 2019).

IFRS 16 introduces a single on-balance sheet lease accounting model for leases. The Group, as lessee, has recognised lease liabilities in relation to leases previously identified as operating leases in accordance with IAS 17: "Leases" and IFRIC 4 Determining Whether an Arrangement Contains a Lease. These lease liabilities were measured at 1 January 2019 at the present value of the remaining lease payments payable after that date. The associated right-of-use assets have been recognised as at 1 January 2019 on a retrospective basis as if IFRS 16 had always been applied. The Group has applied the practical expedient permitted by the standard for contracts entered into before the transition date, the Group has relied on its assessment made when applying IAS 17 and IFRIC 4. Contracts have not been reassessed to determine if a contract is, or contains, a lease at the date of initial application.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

1 Statement of Accounting Policies (continued)

IFRS 16: Leases continued

The Group has elected not to recognise right-of-use assets and lease liabilities for leases which have low value, or short-term leases with a duration of 12 months or less. The payments associated with such leases are charged directly to the income statement on a straight-line basis over the lease term.

In addition, the Group will no longer recognise provisions for operating leases that it assesses to be onerous. Instead, the Group will include the payments due under the lease in its lease liability.

Transition

	31 December 2018 US\$'000	Adjustment on adoption of IFRS 16 US\$'000	1 January 2019 US\$'000
Property, plant and equipment	2,393	604	2,997
Trade and other receivables	8,043	(70)	7,973
Trade and other payables	(10,524)	(122)	(10,646)
Long-term liabilities	-	(407)	(407)
Total equity		5	

A reconciliation of the operating lease commitments disclosed at 31 December 2018 to the total lease liabilities recognised upon initial application of IFRS 16 is presented below:

Operating lease commitments at 31 December 2018	US\$'000
Effect of discounting at weighted average incremental borrowing rate of 4.6%	689
Adjustment for prepayments of lease liabilities	(65)
Adjustment for short-term leases	(42)
	(5)
Lease liabilities recognised at 1 January 2019	577
Short-term lease liability	232
Long-term lease liability	345
	577

Accounting policy for leases

The Group enters into leases in respect of leases of various office properties. Lease liabilities are measured at the present value of the contractual payments due to the lessor over the lease term. Lease payments are discounted using the incremental borrowing rate (being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions), unless the rate implicit in the lease is available. The Group currently uses the incremental borrowing rate as the discount rate for all of its leases. For the purposes of measuring the lease liability, lease payments comprise fixed payments and variable lease payments based on an index or rate.

Right-of-use assets are measured at cost, which comprises the initial measurement of the lease liability, plus any lease payments made prior to lease commencement, initial direct costs incurred and the estimated cost of restoration or decommissioning; less any lease incentives received. Right-of-use assets are depreciated over the lease term.

Lease repayments made are allocated to capital repayment and interest so as to produce a constant periodic rate of interest on the remaining lease liability balance.

Right-of-use assets are presented within property, plant and equipment. Lease liabilities are presented under non-current liabilities unless due within 12 months of the reporting date, in which case they are included under trade and other payables in current liabilities. In the cash flow statement, lease repayments (both the principal and interest portion) are presented within cash used in operating activities.

When the Group revises its estimate of the term of any lease (because, for example, it re-assesses the probability of a lessee extension or termination option being exercised), it adjusts the carrying amount of the lease liability to reflect the payments to make over the revised term, which are discounted using a revised discount rate. The carrying value of lease liabilities is similarly revised when the variable element of future lease payments dependent on a rate or index is revised, except the discount rate remains unchanged. In both cases an equivalent adjustment is made to the carrying value of the right-of-use asset, with the revised carrying amount being amortised over the remaining (revised) lease term. If the carrying amount of the right-of-use asset is adjusted to zero, any further reduction is recognised in profit or loss.

Leases of low-value items (such as office equipment) and short-term leases (where the lease term is 12 months or less, which include the rental of drilling rigs) are expensed on a straight-line basis to the income statement.

The Group does not have any activities as a lessor.

Previous accounting policy for leases

Previously, the Group recognised operating lease expense on a straight-line basis over the term of the lease, and recognised assets and liabilities only to the extent that there was a timing difference between actual lease payments and the expense recognised.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

1 Statement of Accounting Policies (continued)

Reclassification of expected credit loss

During the year, the Group revisited its accounting policy in respect of its expected credit loss calculation. The expected credit loss is now calculated on the gross trade receivables balance, where previously it was recognised on the Group's share of trade receivables net of any amounts due to partners in joint operations. The change in accounting policy results in the reclassification of an expected credit loss previously held in liabilities. The total expected credit loss is now recognised in trade and other receivables rather than trade and other payables and prior year comparatives have been reclassified accordingly for consistency. The accruals recognised in 2018 to be reclassified amounts to US\$537,000. The reclassification has no impact on the Group or Company's comparative period loss before tax or net assets.

Basis of consolidation

The Group financial statements consolidate the financial statements of Aminex PLC and its subsidiaries. Subsidiaries are consolidated from the date on which control is transferred to the Group and cease to be consolidated from the date on which control is transferred out of the Group. Control exists when the Company is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Financial statements of subsidiaries are prepared for the same reporting year as the parent company.

The statutory individual financial statements of subsidiary companies have been prepared under the accounting policies applicable in their country of incorporation but adjustments have been made to the results and financial position of such companies to bring their accounting policies into line with those of the Group for consolidation purposes.

All intra-group balances and transactions, including unrealised profits arising from intra-group transactions, have been eliminated in full. Unrealised losses are eliminated in the same manner as unrealised gains except to the extent that there is evidence of impairment.

Investments in subsidiaries

Subsidiaries are all entities over which the Group has the power to govern the financial and operating policies, is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Such power, generally but not exclusively, accompanies a shareholding of more than one-half of the voting rights. Non-current investments in subsidiaries of the Company are shown at cost less provision for impairment.

Joint operations

Joint operations are those activities over which the Group exercises joint control with other participants, established by contractual agreement. The Group recognises, in respect of its interests in joint operations, the assets that it controls, the liabilities that it incurs, the expenses that it incurs and the share of the income that it earns from the sale of goods or services by the joint operation.

Revenue from contracts with customers

Revenue is measured based on the consideration specified in a contract with a customer. The Group recognises revenue when performance obligations are satisfied and it transfers control over a good or service to a customer. Details of the Group's sources of revenue from contracts with customers and details on when control passes are detailed in Note 2.

Employee benefits

(a) Pensions and other post-employment benefits

The Group contributes towards the cost of certain individual employee and Director defined contribution pension plans. Annual contributions are based upon a percentage of gross annual salary or as otherwise agreed, managed on an individual basis. Pension contributions are recognised as an expense in the income statement and are accounted for on an accruals basis based on the employee's related service.

(b) Share-based payments

The Group operates a share option scheme. For equity-settled share-based payment transactions (i.e. the issuance of share options), the Group measures the services received by reference to the value of the option or other financial instrument at fair value at the measurement date (which is the grant date) using a recognised valuation methodology for the pricing of financial instruments (i.e. the Black Scholes model).

If the share options granted do not vest until the completion of a specified period of service, the fair value assessed at the grant date is recognised in the income statement over the vesting period as the services are rendered by employees with a corresponding increase in equity. For options granted with no vesting period the fair value is recognised in the income statement at the date of the grant.

Where share options granted do not vest until performance-related targets, which include targets outside management's control, have been achieved (i.e. a variable vesting period), the fair value assessed at the grant date is recognised in the income statement over a vesting period estimated by management based on the most likely outcome of the performance condition (IFRS 2.15(b)).

Share options issued by the Group that are subject to market-based vesting conditions, as defined in IFRS 2, are ignored for the purposes of estimating the number of equity shares that will vest; these conditions have already been taken into account when fair valuing the shares (November 2019 grant issuance included market conditions – share price related).

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

1 Statement of Accounting Policies (continued)

(b) Share-based payments continued

Non-market vesting conditions are not taken into account when estimating the fair value of share options at the grant date; such conditions are taken into account through adjusting the number of equity instruments included in the measurement of the amount charged to the income statement over the vesting period so that, ultimately, the amount recognised equates to the number of equity instruments that actually vest. The expense in the income statement in relation to share options represents the product of the total number of options anticipated to vest and the fair value of these options at the date of grant.

Share options where the performance conditions are service-related and non-market in nature, the cumulative charge to the income statement is reversed only where an employee in receipt of share options leaves the Group prior to completion of the service period and forfeits the options granted and/or performance conditions are not expected to be satisfied.

The proceeds received by the Group on the exercise of share entitlements are credited to share capital and share premium. Where share options are awarded by the Group to employees of subsidiary companies, the value of the share-based payment is credited to the Group's share option reserve and charged through investments in subsidiary undertakings to the income statement of the relevant subsidiary company.

When share options which have not been exercised reach the end of the original contractual life, the value of the share options is transferred from the share option reserve to retained earnings. The Group does not operate any cash-settled share-based payment schemes or share-based payment transactions with cash alternatives as defined in IFRS 2.

Share capital

Ordinary shares and deferred shares are classified as equity. Proceeds received from the issue of ordinary shares above the nominal value is classified as Share Premium. Costs directly attributable to new shares are shown in equity as a deduction from retained earnings from June 2015 in accordance with the provisions of the Companies Act 2014. Prior to that date costs were deducted from Share Premium.

Finance costs

Finance costs comprise interest payable on borrowings calculated using the effective interest rate method, the unwinding of the discount on the decommissioning provision and foreign exchange losses.

Finance income

Finance income comprises interest income, which is recognised in the income statement as it accrues using the effective interest rate method and foreign exchange gains.

Tax

The tax expense in the income statement represents the sum of the current tax expense and deferred tax expense.

Tax currently payable is based on taxable profit for the year and any adjustments to tax payable in respect of previous years. Taxable profit differs from net profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are not taxable or deductible. The liability for current tax is calculated using rates that have been enacted or substantively enacted at the balance sheet date.

Tax is recognised in the income statement except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Deferred tax is provided, using the liability method, on all temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes, except those arising from non-deductible goodwill or on initial recognition of an asset or liability in a transaction that is not a business combination and that affects neither accounting nor taxable profit.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is expected to be realised or the liability to be settled based on laws that have been enacted or substantively enacted at the balance sheet date.

Deferred tax assets are recognised for all deductible differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit would be available to allow all or part of the deferred tax asset to be utilised.

Earnings per ordinary share

Basic earnings per share is computed by dividing the net profit for the financial period attributable to ordinary shareholders by the weighted average number of ordinary shares in issue during the financial period.

Diluted earnings per share is computed by dividing the profit for the financial period attributable to ordinary shareholders by the weighted average number of ordinary shares in issue after adjusting for the effects of all potential dilutive ordinary shares that were outstanding during the financial period.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

1 Statement of Accounting Policies (continued)

Foreign currency translation

The presentation currency of the Group and the functional currency of Aminex PLC is the US dollar ("US\$"), representing the currency of the primary economic environment in which the Group operates. Transactions in foreign currencies are recorded at the rate of exchange ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated into the functional currency at the rate of exchange at the balance sheet date. All translation differences are taken to the income statement.

Results and cash flows of non-dollar subsidiary undertakings are translated into US dollars at average exchange rates for the year and the related assets and liabilities (including goodwill and fair value adjustments) are translated at the rates of exchange ruling at the balance sheet date. Adjustments arising on translation of the results of non-dollar subsidiary undertakings at average rates, and on the restatement of the opening net assets at closing rates, are dealt with in a separate translation reserve within equity, net of differences on related currency borrowings. Proceeds from the issue of share capital are recognised at the prevailing exchange rate on the date that the Board of Directors ratifies such issuance; any foreign exchange movement arising between the date of issue and the date of receipt of funds is charged or credited to the income statement.

The principal exchange rates used for the translation of results, cash flows and balance sheets into US dollars were as follows:

	2019	Average 2018	2019	Year-end 2018
US\$1 equals				
Pound sterling	0.7834	0.7491	0.7570	0.7831
Australian dollar	1.4384	1.3394	1.4257	1.4168

On loss of control of a foreign operation, accumulated currency translation differences are recognised in the income statement as part of the overall gain or loss on disposal.

Exploration and evaluation assets

The assessment of what constitutes an individual exploration and evaluation ("E&E") asset (an E&E asset is the same as a cash-generating unit ("CGU") for the purposes of impairment testing) is based on technical criteria but normally a production sharing agreement ("PSA") is designated as an individual E&E asset. A PSA will normally equate to a single licence except for the Ruvuma PSA (see Note 10).

E&E expenditure incurred prior to obtaining the legal rights to explore an area is recognised in the income statement as incurred. Costs incurred after rights to explore have been obtained, such as geological and geophysical surveys, drilling and commercial appraisal costs and other directly attributable costs of exploration and appraisal including technical and administrative costs, are capitalised as intangible E&E assets.

Capitalised E&E costs are not amortised prior to the conclusion of appraisal activities. At completion of appraisal activities, if technical feasibility is demonstrated, commercial reserves are discovered and commercial viability is demonstrable, then, following development sanction, the carrying value of the relevant E&E asset will be reclassified to property, plant and equipment, but only after the carrying value of the E&E asset has been assessed for impairment and, where appropriate, its carrying value adjusted. If, after completion of appraisal activities in an area, it is not possible to determine technical feasibility and commercial viability, if the legal rights to explore expire or if the Group decides not to continue E&E activities then the costs of such unsuccessful E&E are written off to the income statement in the period the relevant events occur.

Property, plant and equipment – developed and producing oil and gas assets (stated at cost)

Developing and producing oil and gas assets are aggregated generally on a field-by-field basis and represent the cost of developing the commercial reserves discovered and bringing them into production, together with the E&E expenditure incurred in finding commercial reserves transferred from intangible E&E assets as outlined in the accounting policy above.

Subsequent expenditure is capitalised only where it either enhances the economic benefits of the developed and producing properties or replaces part of the existing developed and producing properties. The carrying amounts of the part replaced are expensed to the income statement.

Interest on borrowings for development projects is capitalised by field up to the time that the asset commences to produce commercial reserves.

Depletion

The Group depletes capitalised costs calculated at price levels ruling at the balance sheet date on developed and producing properties on a unit of production basis, based on proved and probable reserves on a field by field basis. In certain circumstances, fields within a single development may be combined for depletion purposes.

Amortisation is calculated by reference to the proportion that production for the period bears to the total of the estimated remaining commercial reserves as at the beginning of the period. Changes in reserves quantities and cost estimates are recognised prospectively.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

1 Statement of Accounting Policies (continued)

Impairment

E&E assets are assessed at each reporting date for indicators of impairment, with an impairment test being required when facts and circumstances suggest that the carrying amount of capitalised E&E expenditure exceeds its recoverable amount and sufficient data exists to enable the Group to determine technical feasibility and commercial viability.

Under IFRS 6, the following indicators are set out to determine whether an E&E asset is required to be tested for impairment:

- a) the period for which the entity has the right to explore in the specific area has expired during the period or will expire in the near future, and is not expected to be renewed;
- b) substantive expenditure on further exploration for and evaluation of mineral resources in the specific area is neither budgeted nor planned;
- c) exploration for and evaluation of mineral resources in the specific area have not led to the discovery of commercially viable quantities of mineral resources and the entity has decided to discontinue such activities in the specific area; and
- d) sufficient data exists to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the E&E asset is unlikely to be recovered in full from successful development or by sale.

The list is not exhaustive, and management will consider other relevant changes in facts and circumstances that may indicate the requirement for an E&E asset impairment test.

Where an indicator of impairment exists, management will assess the recoverability of the carrying value of the E&E asset (equivalent to the CGU). This assessment is based on a range of technical and commercial considerations and confirming that sufficient progress is being made to establish development plans and timing. If no future activity is planned, or the value of the asset cannot be recovered via successful development or sale, the balance of the E&E expenditure is impaired wholly or in part as appropriate.

Impairment reviews on developed and producing properties are carried out on each cash-generating unit identified in accordance with IAS 36 "Impairment of Assets". The Group's cash-generating units are those assets which generate largely independent cash inflows and are normally, but not always, single development areas or fields.

Where there has been a charge for impairment in an earlier period that charge will be reversed in a later period where there has been a change in circumstances to the extent that the discounted future net cash flows are higher than the net book value at the time. In reversing impairment losses, the carrying amount of the asset will be increased to the lower of its original carrying value or the carrying value that would have been determined (net of depletion) had no impairment loss been recognised in prior periods.

Decommissioning costs

A liability is recognised once there is an obligation for the decommissioning of oil and gas wells. Decommissioning cost estimates are measured based on current requirements, technology and price levels, which is inflated to estimate the future cost at the expected abandonment date; the present value is calculated using amounts discounted over the useful economic life of the assets. This amount is included within the related exploration and evaluation or developed and producing assets by field and the liability is included in provisions. Such cost is depleted over the life of the field on a unit of production basis and charged to the income statement. The unwinding of the discount is reflected as a finance cost in the income statement over the remaining life of the well. Changes in estimates are recognised prospectively, with corresponding adjustments to the provision and the associated asset. The effects of changes resulting from revisions to the timing or the amount of the original estimate of the provision are reflected on a prospective basis, generally by adjustment to the carrying amount of the related exploration and evaluation or property, plant and equipment.

Property, plant and equipment – other

Other property, plant and equipment is stated at cost less accumulated depreciation and impairment losses.

Depreciation is calculated to write off the original cost of other property, plant and equipment less its estimated residual value over their expected useful lives on a straight-line basis.

The estimated useful lives applied in determining the charge to depreciation are as follows:

Leasehold property	remaining life of lease
Plant and equipment	3-5 years
Fixtures and fittings	3-5 years

The useful lives and residual values are reassessed annually.

On disposal of other property, plant and equipment, the cost and related accumulated depreciation and impairments are removed from the financial statements and the net amount less any proceeds is taken to the income statement.

The carrying amounts of other property, plant and equipment are reviewed at each balance sheet date to determine whether there is any indication of impairment. An impairment loss is recognised whenever the carrying amount of an asset or its cash generating unit exceeds its recoverable amount. Impairment losses are recognised in the income statement.

Subsequent costs are included in an asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the replaced item can be measured reliably. All other repair and maintenance costs are charged to the income statement during the financial period in which they are incurred.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

1 Statement of Accounting Policies (continued)

Cash and cash equivalents

Cash and cash equivalents include cash in hand, current accounts with banks and cash held by the Group in current accounts with banks on behalf of joint venture partners.

Financial instruments

Financial assets and financial liabilities are recognised on the Group's balance sheet when the Group becomes a party to the contractual provisions of the instrument. Up to the date of this balance sheet, the Group had not utilised derivative financial instruments.

There are no material financial assets and liabilities for which differences between carrying amounts and fair values are required to be disclosed. The classification of financial instruments as required by IFRS 7 is disclosed in Notes 15, 16, 17 and 20.

(a) Financial assets

Financial assets are initially recognised at fair value, normally being the transaction price, and subsequently measured at amortised cost, fair value through other comprehensive income or fair value through profit or loss. The classification of financial assets is determined by the contractual cash flows and where applicable the business model for managing the financial assets. The Group derecognises financial assets when the contractual rights to the cash flows expire or the financial asset is transferred to a third party. On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

(i) Financial assets at fair value through profit or loss

Where a financial instrument is classified as a financial asset at fair value through profit or loss it is initially recognised at fair value. At each balance sheet date the fair value is reviewed and any gain or loss arising is recognised in the income statement. Changes in the net present value of the financial asset arising from discounting are included in other gains and losses.

(ii) Financial assets at amortised cost

Financial assets are classified as measured at amortised cost when they are held in a business model the objective of which is to collect contractual cash flows and the contractual cash flows represent solely payments of principal and interest. Such assets are carried at amortised cost using the effective interest method if the time value of money is significant. Gains and losses are recognised in profit or loss when the assets are derecognised or impaired and when interest is recognised using the effective interest rate method. This category of financial assets includes trade and other receivables and loans provided to subsidiary undertakings of the Company.

(b) Financial liabilities

Financial liabilities are generally stated at amortised costs using the effective interest rate method.

(c) Impairment of financial assets

From 1 January 2018, the expected credit loss model is applied for recognition and measurement of impairments in financial assets measured at amortised cost. The loss allowance for the financial asset is measured at an amount equal to the 12-month expected credit losses. If the credit risk on the financial asset has increased significantly since initial recognition, the loss allowance for the financial asset is measured at an amount equal to the lifetime expected credit losses. Changes in loss allowances are recognised in profit and loss. For trade receivables, a simplified impairment approach is applied recognising expected lifetime losses from initial recognition.

Critical accounting judgements

The Group assesses critical accounting judgements annually. The following are the critical judgements, apart from those involving estimations, that the Directors have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in the Financial Statements.

Carrying value of intangible exploration and evaluation assets (Note 10):

The amounts for intangible exploration and evaluation assets represent active exploration projects. These amounts will be written off to the income statement as exploration costs unless commercial reserves are established, or the determination process is not completed and there are no indications of impairment in accordance with the Group's accounting policy. The process of determining whether there is an indicator for impairment or impairment reversal and the subsequent calculation requires critical judgement.

The key areas in which management has applied judgement are as follows: the Group's intention to proceed with a future work programme for a prospect or licence; the likelihood of licence renewal or extension; the review of new legislation or regulations that may impact the economic terms of the Group's PSAs; the assessment of whether sufficient data exists to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or by sale and the success of a well result or geological or geophysical survey.

The most material area to which this judgement was applied during 2019 was the assessment and identification of impairment indicators, in accordance with IFRS 6, related to the Ruvuma PSA and Kiliwani South CGUs. Following the impairment assessment, specifically in relation to the publication of new petroleum regulations in Tanzania, management concluded that there were impairment indicators on the Ruvuma PSA CGU which resulted in the impairment of the Lindi exploration and evaluation costs of US\$10.4 million, discussed in detail in Note 10.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

1 Statement of Accounting Policies (continued)

Carrying value of intangible exploration and evaluation assets (Note 10): continued

In respect to the Nyuni Area PSA CGU, management concluded in 2018 that an impairment trigger event had occurred and resulted in the asset being fully impaired. Expenditure on the Nyuni Area PSA E&E asset during 2019 was capitalised and immediately impaired from the exploration and evaluation assets to the income statement as exploration and evaluation expenditure in line with the Group's policy. If the Group secures a second extension period over the Nyuni Area PSA the result of future exploration and appraisal work will require judgement of whether there is any indication of a reversal in impairment of the asset.

Carrying value of property plant and equipment assets (Note 11):

During oil and gas operations production from a well is subject to a rate of decline as the reservoir is depleted and the pressure naturally decreases. There are various mechanical options available to the business to remedy such decline and to increase production from an existing well. Management's critical judgements in deciding whether they can remediate a decline in production relate to: whether the technology and technical expertise is available at its operating locations to remedy the production decline, whether the chosen remedial action will be successful and whether it will be economical to perform the remediation work. If management decides, after reviewing all available options, that there is no economical method for remediating a well, an asset would potentially be impaired.

During 2019, as there was no production from the Kiliwani North-1 well, management assessed the asset for impairment in accordance with IAS 36. Management concluded that although there is a clear remediation plan in place that can potentially recover further volumes from the Kiliwani North-1 well, following the delays getting approval from the Tanzania authorities to progress the remediation plan management revised some of its recovery scenarios available to the Group and consequently a partial impairment was recognised on the asset. Details of the impairment are disclosed in Note 11. The results of future remediation work may be different to current management judgements and will likely result in a further impairment or impairment reversal to the Kiliwani North CGU which would impact the Group's financial statements.

Recoverability of trade receivable (Note 15)

The Group uses a forward-looking impairment model based on expected credit losses ("ECLs") of financial assets in accordance with IFRS 9, including short-term trade receivables. The standard requires the Company to book an allowance for ECLs for its financial assets. Management calculate a net present value of outstanding receivables discounted by the discount rate that reflects counterparty credit risk, for a range of possible scenarios including delays and no payment with a probability assigned to each. The assumptions of scenarios, probability weighting and discount rate require critical judgement.

The Group's trade receivables are due from one customer, the TPDC, which owes the Group trade receivables amounting to US\$7.80 million, of which Aminex's net share amounts to US\$3.23 million (see Note 15). The Company evaluates the collectability of its receivables on the basis of past events, current conditions and forecast of future economic conditions, as well as management's assessment of the customer's willingness and ability to pay. Critical judgements also relate to confirmation that gas production has been invoiced and interest for late payment charged in accordance with the Kiliwani North Gas Sales Agreement and that the TPDC has an obligation to pay the amounts due.

Recoverability of amounts due from subsidiary undertakings (Note 14):

During the period, following the impairment to the Group's exploration and evaluation assets of US\$10.9 million and the impairment against the Kiliwani North property, plant and equipment CGU of US\$0.81 million there was considered to be an increased credit risk. Therefore, in line with the requirements of IFRS 9, the Company calculated an expected credit loss equivalent to the lifetime expected credit losses.

Arriving at the expected credit loss allowance involved considering different scenarios for the recovery of the intercompany loan receivables, the possible credit losses that could arise and the probabilities for these scenarios. The following was considered: the success of the Farm-Out, value of the potential reserves, project risks, the ability to achieve certain production levels. Third party valuation reports were used to support valuations where available. Significant judgement is required in determining the probability of the different scenarios. The Company applies no discounting to the expected credit loss calculation as the effective interest rate is considered to be 0% as the loans are interest free.

Following the review, the loans due from subsidiaries were considered unlikely to be repaid in full and a partial impairment was recognised (see Note 14).

Recognition of contingent liabilities (Note 24):

During the year, the Tanzania Revenue Authority ("TRA") were in the process of finalising an audit of taxation years 2013 to 2015 with an assessment issued to the Group in February 2020 covering non income taxes including VAT, withholding tax and employment taxes. In 2018, the Group received notification from the TPDC requesting payment of certain amounts (see Note 24). Judgement is required to determine whether these amounts should be provided for or disclosed as contingent liabilities. Critical judgements relate to the application of certain criteria in accordance with IAS 37 "Provisions, Contingent Liabilities and Contingent Assets" that include: whether the Group has a present obligation as a result of a past event, whether there is a probable outflow of economic resources, and whether that outflow can be measured reliably.

Going concern:

Refer to page 39 and 40.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

1 Statement of Accounting Policies (continued)

Key sources of estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Carrying value of property, plant and equipment (Note 11):

Management performs impairment reviews on the Group's property, plant and equipment assets at least twice annually with reference to indicators in IAS 36 Impairment of Assets. Estimation of the asset value of oil and gas assets is calculated from a number of inputs that require varying degrees of estimation. Principally oil and gas assets are valued by estimating the future cash flows based on a combination of reserves and resources, costs of appraisal, development and production, production profile and future sales price and discounting those cash flows at an appropriate discount rate.

The estimation of the recoverable amount of the Kiliwani North CGU includes key assumptions related to production profiles, commercial reserves, discount rates, and related cost profiles. In addition, the recoverable amount includes the key assessment of approval of work programmes from the Tanzanian authorities, the timing of which is outside the control of management. Lack of progress on approvals can result in significant delays in value realisation and consequently a lower asset value. Such assumptions may change from time to time due to changes in local legislation or regulation, market forces or more data being available.

During 2019, key changes to accounting estimates related to production volumes, production timings and discount rate. Discount rate is assessed by the Group using various inputs from market data, external advisers and internal calculations. A discount rate of 15% (2018: 10%) was used for impairment testing of the Kiliwani North CGU, reflecting the specific degree of risk associated with the well. Production volume and timing estimates were adjusted due to delays in receiving approvals for the remediation programme from the Tanzanian authorities which had previously been forecast to take place during 2019. Management reflected the potential for future delays in seeking approvals to remediate the Kiliwani North-1 well in the current forecast. These changes to accounting estimates resulted in an impairment charge recognised on the Kiliwani North CGU (see Note 11). Timing, cost and results of the remediation work on the Kiliwani North-1 well may give rise to alternative estimates which could impact the Group's financial statements.

Commercial reserves estimates used in the calculation of depletion, depreciation and amortisation, and impairment of property, plant and equipment (Note 11):

Proven and probable reserves are estimates of the amount of oil and gas that can be economically extracted from the Group's oil and gas assets. The Group estimates its reserves using standard recognised evaluation techniques. The estimate is annually reviewed by independent consultants. A significant reduction in reserve estimates would indicate an impairment trigger for the related developed and producing assets which could materially impact the financial statements of the Group.

Decommissioning estimates (Note 19):

There is uncertainty around the cost of decommissioning as cost estimates can vary in response to many factors, including changes to the relevant legal requirements, the emergence of new technology or experience at other assets. The expected timing, work scope and amount and currency mix of expenditure required may also change. Therefore, significant estimates and assumptions are made in determining the provision for decommissioning.

The estimated decommissioning costs are reviewed annually by an internal expert. Provision for environmental clean-up and remediation costs is based on current legal and contractual requirements, technology and management's estimate of costs with reference to current price levels.

Uncertain tax and regulatory positions (Note 24):

The Group is subject to various tax and regulatory audits from time to time in the ordinary course of business, which may give rise to assessments and the potential for items considered to be available for cost recovery to be disallowed in the jurisdictions in which the Group operates. In order to assess whether these amounts should be provided for in the Financial Statements management has assessed these matters in the context of the laws and operating agreements of the countries in which it operates. Management has applied judgement in assessing the likely outcome of these matters and has estimated the financial impact based on external tax and legal advice, recent precedents in the relevant jurisdiction and prior experience of such audits. During 2019, the Tanzania Revenue Authority ("TRA") concluded their audit work for taxation years 2013 to 2015, resulting in a tax assessment received in February 2020. Due to the interpretation of tax law in-country by the TRA significant uncertainty remains and the results of any submitted objections or appeals process in relation to the tax assessment can influence the estimation of any future liability. This uncertainty often remains until the conclusion of this process. Details of the assessment are disclosed in Note 24.

2 Segmental Information

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components.

The Group considers that its operating segments consist of (i) Producing Oil and Gas Properties, (ii) Exploration Activities and (iii) Oilfield Services. These segments are those that are reviewed regularly by the Chief Executive Officer (Chief Operating Decision Maker) to make decisions about resources to be allocated to the segment and assess its performance and for which discrete financial information is available. However, the Group further analyses these by region for information purposes. Segment results include items directly attributable to the segment as well as those that can be allocated on a reasonable basis. Unallocated Aminex Group items comprise mainly head office expenses, cash balances and certain other items.

The Group's revenue is derived from contracts with customers. The timing of revenue streams depends on the following for products and services:

Producing oil and gas assets

The Group satisfies its performance obligation by transferring a nominated volume of gas to its customer. The title to gas transfers to a customer when the customer takes physical possession of the gas at the contracted delivery point. The gas needs to meet certain agreed specifications. The Group generates all its revenue under this segment from the TPDC, the operator of the Songo Songo Island Gas Processing Plant, under a gas sales agreement.

Oilfield services

Revenue for services is recognised as services are rendered to the customer. All services rendered by the Group relate to Joint operations to which the Group is a party and the terms of the services provided are subject to service contracts.

The IFRS 8 operating segments as follows (i) Producing Oil and Gas Properties, (ii) Exploration Activities and (iii) Oilfield Services are the disaggregation of revenue from customers as required by IFRS 15.

Operating segment results - 2019

	Tanzania Producing oil and gas properties 2019 US\$'000	Tanzania Exploration activities 2019 US\$'000	UK Oilfield services 2019 US\$'000	Unallocated Corporate Aminex Group 2019 US\$'000	Total 2019 US\$'000

Unwinding of discount on decommissioning provision (Note 19)	(20)	(44)	-	-	(64)

Total non-current assets and liabilities by geographical region are set out in Notes 10, 11, 18 and 19 to the financial statements.

3 Employment

Employment costs charged against the Group operating loss are analysed as follows:

	2019 US\$'000	2018 US\$'000
Salaries and wages	1,939	2,301
Social security costs	244	25
Other pension costs	69	72
Redundancy	17	-
Share based payment charge	369	581
	2,638	2,979
Employment costs capitalised (Note 10)	(840)	(958)
Employment costs charged against the Group operating loss	1,798	2,021

A proportion of the Group's employment costs charged against the Group operating loss are recharged to partners in Joint operations by the Group acting as operator, a proportion is allocated to the Group's cost of sales with the remainder classified under administrative expenses.

The Group's average number of employees, including Executive Directors, during the year was:

	2019 US\$'000	2018 US\$'000
Europe	9	9
Tanzania	7	8
	16	17

Employment costs charged against the Company operating loss are analysed as follows:

	2019 US\$'000	2018 US\$'000
Share based payment charge	229	24

The Company incurs no other employment costs and has no employees.

Directors' emoluments (which are included in administrative expenses) and interests are shown in the Directors' Remuneration Report on pages 27 to 28.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

4 Share based payments

Aminex PLC operates a Share Option Scheme ("the Scheme"). Under the terms of the Scheme, certain Directors and employees of Aminex PLC and its subsidiary companies are entitled to subscribe for Ordinary Shares in Aminex PLC at the market value on the date of the granting of the options, subject to a maximum aggregate of 10% of the issued Ordinary Share capital of Aminex PLC.

Options are granted at market price, in accordance with the Scheme rules, with reference to the average closing price for the fourteen days prior to the grant of options. Options granted before and during 2010 will expire at a date no later than 10 years after their grant date. These options generally vest if employees remain in service for 3 years from the date of grant and Directors' options vest immediately. No options were granted between 2011 and 2015. Options granted in 2016 and 2018 vest immediately and will expire at a date no later than 3 years after their grant date. Of the options granted in 2019, those issued in February and June vest immediately, and the options granted in November 2019 vest in tranches subject to the achievement of certain market and non-market performance conditions. The options granted in 2019 will expire at a date either 5 years, 7 years or 10 years after their date of grant, as detailed below.

The fair value of the grant date is measured using a recognised valuation methodology for the pricing of financial instruments i.e. the Black-Scholes method.

The following expenses have been recognised in the income statement arising on share-based payments and included within administrative expenses:

	2019 US\$'000	2018 US\$'000
Share based payment charge	369	581

The fair value of options granted for Directors and staff in the period were calculated using the following inputs into the Black-Scholes method (previously the fair value of options were estimated using the binomial option-pricing model):

	11 November 2019	20 June 2019	14 February 2019
Date of grant	11 November 2019	20 June 2019	14 February 2019
Contractual life	7 years	5 years	10 years
Exercise price	Stg 1.40 pence	Stg 0.86 pence	Stg 1.56 pence
Number of options granted (immediate vesting)	92,000,000	17,000,000	6,411,000
Expected volatility	77%	75%	94%
Vesting conditions	Market and non-market	Immediate	Immediate
Fair value per option	Stg 0.64 pence	Stg 0.38 pence	Stg 0.76 pence
Expected dividend	-	-	-
Risk-free rate	0.001%	0.001%	0.0001%

	Number of options	Average exercise price
Outstanding at 1 January 2018	137,750,000	Stg2.18p
Granted	42,000,000	Stg3.08p
Expired	(1,500,000)	Stg22.0p
Outstanding at 1 January 2019	178,250,000	Stg2.46p
Granted	115,411,000	Stg1.33p
Expired	(111,400,000)	Stg1.35p
Outstanding at 31 December 2019	182,261,000	Stg2.42p
Exercisable at 31 December 2018	178,250,000	Stg2.46p
Exercisable at 31 December 2019	113,261,000	Stg3.04p

On 31 December 2019, there were options over 113,261,000 (2018: 178,250,000) Ordinary Shares outstanding which are exercisable at prices ranging from Stg0.86 pence to Stg9.0 pence per share and which expire at various dates up to 2029. The weighted average remaining contractual life of the options outstanding is 4.46 years (2018: 0.85 years). The average share price for the year ended 31 December 2019 was Stg1.13pence/€0.01005 (2018: Stg2.27pence/€0.02607).

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

5 Loss before tax

The loss before tax has been arrived at after charging / (crediting) the following items:

	2019 US\$'000	2018 US\$'000
Depletion of producing asset	-	36
Depreciation of other property, plant and equipment	240	22
Auditor's remuneration – Group audit (i)	82	97
Auditor's remuneration – overseas	42	51
Auditor's remuneration – interim review	-	21
Auditor's remuneration – tax advisory services	-	49
Auditor's remuneration – non-audit services	-	97
Loss on disposal of fixed assets	-	2
Receipt of US production payments	-	(15)
	<u> </u>	<u> </u>

(i) Audit comprises audit work performed by BDO Ireland and member firm on the consolidated financial statements. In 2019, US\$13,000 (2018: US\$7,000) of audit fees related to the audit of the Company. The auditor to the Group and Company in 2018 was KPMG Ireland.

6 Finance income

	2019 US\$'000	2018 US\$'000
Deposit interest income	4	8
Foreign exchange gain	26	57
	<u> </u>	<u> </u>
	30	65

7 Finance costs

	2019 US\$'000	2018 US\$'000
Unwinding of discount on decommissioning provision (see Note 19)	64	64
Interest on lease liabilities (Note 18)	18	-
	<u> </u>	<u> </u>
	82	64

8 Income tax expense

The components of the income tax expense for the years ended 31 December 2019 and 2018 were as follows:

	2019 US\$'000	2018 US\$'000
Current tax expense:		
Current year	-	-
Deferred tax expense:		
Origination and reversal of temporary differences	-	-
Total income tax expense for the Group	<u> </u>	<u> </u>
	-	-

A reconciliation of the expected tax benefit computed by applying the standard Irish tax rate to the loss before tax to the actual benefit is as follows:

	2019 US\$'000	2018 US\$'000
Loss before tax	(15,231)	(48,509)
Irish standard tax rate	12.5%	12.5%
Taxes at the Irish standard rate	(1,904)	(6,064)
Effect of different tax rates in foreign jurisdiction	(232)	(616)
Expenses not deductible for tax purposes	1,617	5,249
Losses utilised / (carried forward)	519	1,431
	<u> </u>	<u> </u>
	-	-

Expenses not deductible for tax purposes predominantly relate to impairment charge taken during the year on exploration and evaluation assets of US\$10.9 million (2018: US\$43.5 million) and the impairment against property, plant and equipment assets of US\$809,000 (2018: US\$nil).

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

8 Income tax expense (continued)

The following deferred tax assets have not been recognised in the balance sheet as it is currently considered uncertain that the assets will be realised in the future.

	2019	2018
	US\$'000	US\$'000
Net operating losses	24,652	19,473

The gross amount of unused tax losses carried forward with their expiry dates is as follows:

	Ireland	UK	ROW	Total
	2019	2019	2019	2019
	US\$'000	US\$'000	US\$'000	US\$'000
One year	-	-	-	-
Two years	-	-	-	-
Three years	-	-	-	-
Four years	-	-	-	-
Five years	-	-	-	-
More than five years	12,857	23,737	63,366	99,960
Total	12,857	23,737	63,366	99,960
	Ireland	UK	ROW	Total
	2018	2018	2018	2018
	US\$'000	US\$'000	US\$'000	US\$'000
One year	-	-	-	-
Two years	-	-	-	-
Three years	-	-	-	-
Four years	-	-	-	-
Five years	-	-	-	-
More than five years	12,537	21,390	47,539	81,466
Total	12,537	21,390	47,539	81,466

These losses can be carried forward indefinitely but may only be offset against taxable gains or taxable profits earned from the same trade or trades.

9 Loss per Ordinary Share

The basic loss per Ordinary Share is calculated using a numerator of the loss for the financial year and a denominator of the weighted average number of Ordinary Shares in issue for the financial year. The diluted loss per Ordinary Share is calculated using a numerator of the loss for the financial year and a denominator of the weighted average number of Ordinary Shares outstanding and adjusting for the effect of all potentially dilutive shares, including share options and share warrants, assuming that they had been converted.

The calculations for the basic loss per share for the years ended 31 December 2019 and 2018 are as follows:

	2019	2018
Loss for the financial year (US\$'000)	(15,231)	(48,509)
Weighted average number of Ordinary Shares ('000)	3,757,787	3,643,458
Basic and diluted loss per Ordinary Share (US cents)	(0.41)	(1.33)

There is no difference between the basic loss per Ordinary Share and the diluted loss per Ordinary Share for the years ended 31 December 2019 and 2018 as all potential Ordinary Shares outstanding are anti-dilutive. There were 182,261,000 (2018: 178,250,000) share options issued which are anti-dilutive as at 31 December 2019.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

10 Exploration and evaluation assets

Group

	Tanzania and Total US\$'000
Cost	
At 1 January 2018	104,668
Additions	1,463
Employment costs capitalised	958
At 31 December 2018	107,089
Additions	521
Employment costs capitalised	840
At 31 December 2019	108,450
Provisions for impairment	
At 1 January 2018	5,081
Increase in impairment provision	43,474
At 31 December 2018	48,555
Increase in impairment provision	10,928
At 31 December 2019	59,483
Net book value At 31 December 2019	48,967
At 31 December 2018	58,534

The Group does not hold any property, plant and equipment within exploration and evaluation assets.

The additions to exploration and evaluation assets during the period relate mainly to own costs capitalised for geological, geophysical and administrative ("GG&A") work and licence maintenance costs, along with training and licence fees under the respective PSAs.

The Directors have considered the licence, exploration and appraisal costs incurred in respect of its exploration and evaluation assets, which comprise the following three CGUs; the Ruvuma PSA, the Nyuni Area PSA and exploration work on Kiliwani South within the Kiliwani North Development Licence. These assets are carried at historical cost except for provisions against the Nyuni Area PSA and the Lindi Licence exploration expenditure, cost of seismic acquired over relinquished blocks and obsolete stock.

In accordance with its accounting policies each CGU is evaluated annually for impairment, with an impairment test required when a change in facts and circumstances, in particular with regard to the remaining licence terms, likelihood of renewal, likelihood of further expenditures and ongoing acquired data for each area, result in an indication of impairment. The progress during the year of E&E assets are more fully described in the Operations Report.

Tanzania developments

Production Sharing Agreement Review

The Tanzanian government passed three new laws in July 2017, affecting the mining and energy sectors - the Natural Wealth and Resources (Permanent Sovereignty) Act; the Written Laws (Miscellaneous Amendments) Act; and the Natural Wealth and Resources Contracts (Review and Re-Negotiation of Unconscionable Terms). This new legislation includes the right of the Tanzanian authorities to renegotiate 'unconscionable terms' in agreements. A special advisory committee was formed in November 2017 to probe for flaws in the law and policies governing the gas subsector and recommend how the nation can benefit from the revenues accruing from the gas subsector. During 2019, this review remained ongoing as the Tanzanian authorities continue to review a number of PSAs. Based on the Board's current understanding of this new legislation and given the existing terms and conditions of our PSAs it is unclear whether there will be any material impact on Aminex's operations in Tanzania. Until the results of the PSA review are known there is insufficient data to consider the new laws or the PSA review as an indicator of impairment.

New Upstream Petroleum Regulations

In December 2019, the Government of Tanzania released new regulations in respect to the upstream petroleum industry. These regulations were:

1. Petroleum (Reconnaissance and Tendering) Regulations
2. Petroleum (Cost Recovery Accounting) Regulations, and
3. Upstream Petroleum Authority (Annual Levy, Fees and Charges)

A key change relates to the ringfencing of exploration costs. Section 5(1) of the new Petroleum (Cost Recovery Accounting) Regulations states that "Recoverable contract expenses shall be ring fenced based on exploration licence or development licence as stipulated in the Act." The change in regulations is an indication of impairment of Lindi exploration costs under the Ruvuma PSA and therefore management conducted an impairment test during the year on the asset that resulted in impairment (see below).

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

10 Exploration and evaluation assets (continued)

Ruvuma PSA

The Ruvuma PSA, comprised two exploration licences; Mtwara and Lindi. In July 2018, Aminex announced it had signed a binding Farm-Out Agreement to farm-out 50% of the Ruvuma PSA to The Zubair Corporation LLC (“Zubair”), a related party of the Group. In return for a 50% interest in the Ruvuma PSA, Zubair will pay cash consideration of US\$5.0 million plus payment for interim costs incurred on the Ruvuma PSA since 15 March 2018, the effective date of the Farm-Out, and a net US\$35.0 million carry for Aminex’s 25% interest on the development programme, expected to be through to production. The Farm-Out remains subject to approval by the Tanzanian authorities. In April 2020, the Group received a one year extension to the Mtwara Licence, details of which are included in Note 28, satisfying one of the remaining conditions precedent to the Farm-Out. An associate of Zubair, ARA Petroleum Tanzania Limited, will become operator under the Ruvuma PSA and is required to drill the Chikumbi-1 well, acquire at least 200 km² of 3D seismic over the Ntorya Prospect and implement an early production system (or proceed directly to a full production system as may be required). The purpose of the Farm-Out is to accelerate development of and production from the Ntorya field. The Board has a reasonable expectation that the Farm-Out will be completed no later than the long stop date of 30 June 2020.

The Lindi licence expired in January 2017. Ordinarily, the expiry of an exploration licence would be an indicator of impairment, however, the Ruvuma PSA states that there is no ringfencing of exploration costs between licences and therefore the cost pool for the Lindi Licence is recoverable from the Mtwara Licence under the Ruvuma PSA. During 2019, the Tanzanian Government published regulations that stated exploration costs would be ring fenced by Licence and the Directors have taken the view that, although the Ruvuma PSA contains an economic stabilisation clause, this change has created uncertainty of recoverability of the Lindi exploration costs. Consequently, the carrying cost of the Lindi Licence, which amounts to US\$10.4 million, has been impaired.

The Directors are satisfied that following the impairment assessment of the Ruvuma PSA there are no indicators of impairment following the granting of the Mtwara Licence extension and the identified Ntorya asset development programme, supported by the Farm-Out that provides the necessary funding for the development of the asset. The Directors recognise that future realisation of the Ruvuma PSA assets is dependent on the completion of the Farm-Out and further successful exploration, appraisal and development activities and the subsequent economic production of hydrocarbon reserves.

Nyuni Area PSA

Aminex fully provided for the Nyuni Area PSA exploration asset in 2018 following confirmation from the Tanzania authorities that the Nyuni Licence period ended in October 2019, coupled with the communication from the Tanzania Ministry of Energy to withhold all work on the licence, pending a review of the Nyuni Area PSA. The Company was unable to progress the work programme and, therefore, the Directors concluded that the carrying cost of the Nyuni asset should be fully impaired. The status of the Nyuni asset remained the same at 31 December 2019 and the Directors maintain their position. Expenditure during the year is capitalised and then immediately impaired to the income statement as impairment against exploration and evaluation assets.

Kiliwani South

Kiliwani South, located within the Kiliwani North Development Licence acreage, has been identified as a potential lead. In February 2019, the Group raised approximately US\$2.4 million gross to provide funding for the reprocessing of some of the existing 2D seismic in the area and to prepare a 3D seismic programme over the Kiliwani North Development Licence area in order to advance the potential drilling of a Kiliwani South location and assessing the remaining potential in the Kiliwani North structure (inclusive of the Kiliwani North-1 well). During the year, Aminex conducted the reprocessing of select 2D seismic data. Remapping of the reprocessed data in combination with a fresh look at the regional data has identified multiple structural and stratigraphic leads across the licence which are ideally located in shallow waters and in close proximity to existing offtake infrastructure, meaning that a discovery could be rapidly monetized with relatively low-cost drilling and tie-backs.

The Directors are satisfied that, following an assessment of the Kiliwani South asset, with the work planned on the Licence there are no indicators of impairment.

Development property - Tanzania

Following the award of the Kiliwani North Development Licence by the Tanzanian Government in April 2011, the carrying cost relating to the development licence was reclassified as a development asset under property, plant and equipment, in line with accounting standards and the Group's accounting policies. Production from the Kiliwani North-1 well commenced on 4 April 2016 and depletion is calculated with reference to the remaining reserves of 1.94 BCF, which were ascribed to the field as at 1 January 2018 in an independent reserves and resources report prepared by RPS in February 2018. The report also identified a contingent resource of 30.8 BCF in addition to the reserves. The well has produced approximately 6.4 BCF of gas to date. Production from the Kiliwani North-1 well in 2018 was intermittent and there was no commercial production from the well in 2019. Following a successful well intervention to open the sub-surface safety valve carried out in December 2018, Aminex has experienced delays through the rest of 2019 in awaiting final approval to carry out a remedial work programme. The programme is intended to establish fluid levels in the wellbore, reservoir pressure and to unload fluid using foam treatment technology. The intention of this operation, if successful, is to re-establish gas production from the well.

In accordance with IAS 36, the Group conducted an impairment test as at 31 December 2019 on a value-in-use basis. The cash-generating unit for the purpose of impairment testing is the Kiliwani North-1 well. A financial model of the forecast discounted cash flow is employed for the value-in-use calculation of the well.

Key assumptions that represent the key sensitivities in the value-in-use calculation include discount rate, production volumes, timing of the commencement of gas production, remediation work on the gas well being successful and the cost of remediation work. Following a review of the key assumptions used in the impairment test as a result of the delays experienced throughout 2019 changes in estimates were applied to the inputs to the value-in-use forecast in respect of timing and volume of production, including sensitivities reflecting potential extended delays of 1 or 2 years in conducting remediation work, lower-end estimates of reserves recoveries of 0.8 BCF (2018: 1.4 BCF) and an increased discount rate of 15% (2018: 10%) reflecting the specific degree of risk associated with the well. A 5% increase in the discount rate would result in an increase in impairment of US\$68,000 and a further year's delay in production would increase the impairment by US\$154,000.

These changes in accounting estimates resulted in a partial impairment of \$809,000 against the Kiliwani North CGU.

Once the remediation work on the Kiliwani North-1 well, discussed above, is complete, it is expected that the results will further reduce the key estimation uncertainties currently used in the impairment test, particularly around the remaining volume and timing of gas production. This will provide a clearer understanding of the likelihood for producing the remaining reserves and potential resources assigned to the well and therefore impact on the sensitivity of inputs used for future impairment tests.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

11 Property, plant and equipment (continued)

Right of use assets

All right of use assets relate to leases the Group has entered into in respect of various office properties. All leases are accounted for by recognising a right-of-use asset and a lease liability except for:

- Leases of low value assets; and
- Leases with a duration of 12 months or less.

IFRS 16 was adopted 1 January 2019 without restatement of comparative figures. For an explanation of the transitional requirements that were applied as at 1 January 2019, see Note 1. See Note 18 for disclosures around the Group's lease liabilities.

Right of use assets of US\$361,000 (2018: US\$nil) relate to an office lease located in the UK and US\$29,000 (2018: US\$nil) located in Tanzania. All other assets are located in the UK.

12 Interests in joint operations

Exploration, evaluation, appraisal and development activities are conducted through joint arrangements governed by joint operating agreements and production sharing agreements. A joint operation is a joint arrangement whereby the parties have joint control to the assets, and obligations for the liabilities, relating to the arrangement. Significant joint operations of the Group are those with the most significant contributions to the Group's net profit or net assets. The Group's interest in the joint operations results are listed in the table below:

Significant joint operations	Country of operation	Principal activity	Group interest	
			2019	2018
Ruvuma PSA (1)	Tanzania	Exploration and evaluation	75%	75%
Nyuni Area PSA (2)	Tanzania	Exploration and evaluation	100%	100%
Kiliwani North Development Licence (1)	Tanzania	Development and production	63.83%	63.83%

(1) While the Group holds a greater than 50 per cent interest in these joint operations, all participants in these joint operations approve the operating and capital budgets and therefore the Group has joint control over the relevant activities of these arrangements.

(2) This contractual arrangement is controlled by the Group and does not meet the definition of joint operations. However, as it is formed by a contractual arrangement and is not an entity, the Group recognises its share of assets and liabilities arising from this arrangement.

13 Investments in subsidiary undertakings

Company	US\$'000
At 1 January 2018	5,207
Additions	1,384
At 31 December 2018	6,591
Additions	141
At 31 December 2019	6,732
Provisions for impairment	
At 1 January 2018	-
Increase in provision	-
At 31 December 2018	-
Increase in provision	1,086
At 31 December 2019	1,086
Net book value	
At 31 December 2019	5,646
At 31 December 2018	6,591

The Company's investment in subsidiary undertakings increased by US\$141,000 (2018: US\$1,384,000). 2018 includes a reclassification of share based payment charges of US\$827,000 relating to options granted in 2016 and 2017 which were previously treated as a receivable due from subsidiary undertakings. The Company reviewed the recoverability scenarios of each investment in subsidiaries and recognised a provision of USD\$1.09 million (2018: US\$nil). After taking into account the provision shown above, the Directors believe the carrying value of these loans to be fully recoverable.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

13 Investments in subsidiary undertakings (continued)

Subsidiary undertakings

As at 31 December 2019 the Company had the following subsidiary undertakings, in which the Company directly or indirectly held ordinary shares:

	Proportion held by Company	Proportion held by Subsidiary	Country of Incorporation
Oil and Gas Exploration, Development and Production			
Aminex Petroleum Services Limited (1)	100%	-	UK
Amossco Holdings Limited (1)	-	100%	UK

		<u>77,995</u>
At 31 December 2019		77,995
Net book value		
At 31 December 2019		65,927
At 31 December 2018		<u>75,370</u>
		<u>75,370</u>
	2019	2018
	US\$'000	US\$'000
Included in non-current assets	65,354	71,420
Included in current assets	573	3,950
	<u>65,927</u>	<u>75,370</u>

Included in current assets are loans provided to subsidiary undertakings which are interest free and repayable on demand.

Included in non-current assets is US\$65.4 million (2018: US\$71.4 million) which represents loans provided to subsidiary undertakings which are interest free and repayable on demand. The Directors do not expect to call for repayment of these loans in the foreseeable future. The loans are expected to be repaid by future revenues generated from the Group's assets in Tanzania. During the period, following the impairment to the Group's exploration and evaluation assets of US\$10.9 million and the impairment against the Kiliwani North property, plant and equipment CGU of US\$809,000 there was considered to be an increased credit risk. Therefore, in line with the requirements of IFRS 9, the Company calculated an expected credit loss equivalent to the lifetime expected credit losses. The Company reviewed the recoverability scenarios of each loan to subsidiaries. The following scenarios and their probabilities were considered for the recovery of the intercompany loan receivables: the success of the Farm-Out, value of the potential reserves, project risks, the ability to achieve certain production levels. Third party valuation reports were used to support valuations where available. This resulted in an increase in the provision of US\$12.3 million (2018: US\$31.4 million) against these loans, which were considered to be unlikely to be repaid in full. The Company applies no discounting to the expected credit loss calculation as the effective interest rate is considered to be 0% as the loans are interest free. After taking into account the provisions shown above, the Directors believe the carrying value of these loans to be fully recoverable.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

15 Trade and other receivables

	Group		Company	
	2019 US\$'000	2018 US\$'000	2019 US\$'000	2018 US\$'000
Current				
Trade receivables	7,951	7,488	-	-
Amounts due from partners in Joint operations	788	269	-	-
VAT recoverable	66	5	-	-
Other receivables	227	144	-	-
Prepayments	99	137	17	21
	9,131	8,043	17	21
Expected credit loss	(1,262)	(537)	-	-
	7,869	7,506	17	21

Trade receivables are interest bearing and are on terms of 30 days. Trade and other receivables amounted to US\$7.87 million at the period end (31 December 2018: US\$7.51 million). The increase largely relates to an increase in amounts owing from the Group's partners in joint operations. Included in trade and other receivables is an amount of US\$7.80 million due from the TPDC for gas sales from Kiliwani North and related late payment interest. Aminex's net share of the receivable is US\$3.23 million (31 December 2018: US\$3.04 million). On 11 April 2018, the Company received formal notification from the TPDC requesting payment of certain amounts totalling US\$5.97 million for liabilities arising on revenues from gas sales, of which Aminex's share is estimated to be US\$2.73 million. Of the amount claimed, Aminex has already accrued for the liabilities it considers appropriate based on its own calculations of amounts due as at 31 December 2019. Aminex has advised the TPDC that it does not accept the balance of the claims, which include computational inaccuracies. The TPDC has delayed settling its trade receivable balance while discussions continue. In accordance with IFRS 9, Aminex calculated an expected credit loss ("ECL") based on its exposure to credit risk on its trade receivables at the end of the period and recognised an impairment on trade receivables of US\$1.26 million (2018: US\$537,000), with a charge to the income statement of US\$582,000 (2018: US\$390,000), reflecting Aminex's share after adjusting for the share related to partners in joint operations of US\$143,000, resulting in a total increase in the expected credit loss balance for the period of US\$725,000. The comparative ECL balance has been reclassified from trade and other payables. Further details of the reclassification have been provided in Note 1. The ECL is calculated on the full amount of US\$7.80 million due to the Group for gas sales and late payment interest; any actual credit loss would be reduced by the liability due to the Group's joint venture partners in respect of amounts due.

16 Cash and cash equivalents

	Group		Company	
	2019 US\$'000	2018 US\$'000	2019 US\$'000	2018 US\$'000
Cash and cash equivalents	694	1,860	214	483

Included in cash and cash equivalents is an amount of US\$165,000 (2018: US\$515,000) held on behalf of partners in Joint operations.

17 Trade and other payables

	Group		Company	
	2019 US\$'000	2018 US\$'000	2019 US\$'000	2018 US\$'000
Current				
Trade payables	1,064	1,042	11	274
Amounts due to partners in Joint operations	1,999	1,999	-	-
Withholding tax payable	851	593	-	-
VAT payable and excise duty	1,707	1,713	-	-
Capital gains tax payable	327	327	-	-
Other payables	2,344	983	1,000	-
Accruals	3,218	3,330	378	395
	11,510	9,987	1,389	669

Included in other payables for the Group and Company is US\$1.0 million in relation to the Advance Funding Agreement ("Advance") entered into between the Group and ARA Petroleum LLC, a related party of the Group (see Note 27), on 12 November 2019. The Advance provides a US\$3.0 million advance in instalments to the Company, ahead of Completion of the Farm-Out. The Advance will be offset against the first tranche of the cash consideration payable to Aminex on Completion of the Farm-Out. If Completion has not occurred by 30 June 2020, the Advance will convert to an interest-bearing secured loan at an interest rate of three month USD LIBOR plus 3.5%, repayable by 30 June 2021.

Amounts due to partners in Joint operations, VAT payable and other payables include amounts arising on gas sales and are payable on receipt of gas revenues from the TPDC. Certain comparative period payables have been reclassified to trade and other receivables. Details of the reclassification are provided in Note 1.

The Directors consider that the carrying amounts of trade payables approximate their fair value.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

18 Lease liabilities

Group		US\$'000
At 1 January 2019		577
Interest expense		18
Lease payments		(232)
Foreign exchange movements		16
At 31 December 2019		379

Non-current	174	345
Total lease liability	379	577

The Group leases a number of properties in the jurisdictions from which it operates. All lease liabilities relate to leases for various office properties the Group has entered into. Total non-current lease liabilities of US\$174,000 (2018: US\$nil) relate to corporate office space leased in the UK. The Group incurred low value lease payments during the year of US\$27,000 (2018: US\$27,000).

19 Decommissioning provision

Group		US\$'000
At 1 January 2018		636
Discount unwound in the year (see Note 7)		64
At 1 January 2019		700
Discount unwound in the year (see Note 7)		64
At 31 December 2019		764
	2019	2018
	US\$'000	US\$'000
Non-current	764	700
Total decommissioning provision	764	700

Decommissioning costs are expected to be incurred over the remaining lives of the wells, which are estimated to end between 2021 and 2042. The provision for decommissioning is reviewed annually and at 31 December 2018 and 2019 relates to wells in Tanzania. The provision has been calculated assuming industry established oilfield decommissioning techniques and technology at current prices which are inflated to future costs at a rate of 3.6% per annum and discounted at 9.2% per annum, reflecting the associated risk profile.

20 Financial instruments and risk management

General objectives, policies and procedures

The Board has overall responsibility for the determination of the Group's risk management objectives and policies and, whilst retaining ultimate responsibility for them, it has delegated the authority for designing and operating processes that ensure the effective implementation of the objectives and policies to executive management. The Board receives regular reports at Board meetings through which it reviews the effectiveness of the processes put in place and the appropriateness of the objectives and policies it sets.

The overall objective of the Board is to set policies that seek to reduce risk as far as possible without unduly affecting the Group's competitiveness and flexibility. Further details regarding these policies are set out below.

Group

The Group is exposed through its operations to the following financial risks:

- Liquidity and interest rate risk
- Commodity price risk
- Foreign currency risk
- Credit risk

In common with all other businesses, the Group is exposed to risks that arise from its use of financial instruments. This note describes the Group's objectives, policies and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these financial statements.

The Group may from time to time enter into derivative transactions to minimise its exposure to interest rate fluctuations, foreign currency exchange rates and movements in oil and gas prices. There were no derivatives held at 31 December 2019 or 31 December 2018.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

20 Financial instruments and risk management (continued)

There have been no substantive changes in the Group's exposure to financial instrument risks, its objectives, policies and processes for managing those risks or the methods used to measure them from previous periods unless otherwise stated in this note.

The principal financial instruments used by the Group, from which financial instrument risk arises, comprise:

- Trade and other receivables
- Cash and cash equivalents
- Trade and other payables
- Lease liabilities

Policies for managing these risks are summarised as follows:

a) Liquidity/interest rate risk

The Group closely monitors and manages its liquidity risk using both short and long-term cash flow projections. Cash forecasts are regularly produced, and sensitivities run for different scenarios including, but not limited to, changes in asset production profiles and cost schedules. The Group finances its operations through a mixture of shareholders' funds, loans and borrowings and working capital. Board approval is required for all new borrowing facilities.

b) Commodity risk

The Group's activities expose it primarily to the financial risks of changes in gas commodity prices. The Group monitors and manages this risk where considered appropriate through the use of fixed price gas sales contracts.

The requirement for hedging instruments is kept under ongoing review. During the year, the Group did not enter into any hedging transactions.

c) Foreign currency risk

The Group reports in US dollars, which is the currency of a large proportion of its trading income.

The Group conducts and manages its business predominantly in US dollars, the operating currency of the industry in which it participates. The Group also routinely purchases on the spot market the currencies of the countries in which it operates. From time to time certain transactions are undertaken denominated in other currencies. The risk is managed wherever possible by holding currency in US Dollars and other internationally recognised fungible currencies, converted into less stable currencies as and when the need arises.

d) Credit risk

Credit risk to customers and to jointly operated activities arises on the outstanding receivables and outstanding cash calls due, as well as cash and cash equivalents, deposits with banks and outstanding production payments.

The carrying value of the Group's various financial assets, as presented within the fair value table set out on below, represents the Group's maximum credit risk exposure.

Fair value

The accounting classification for each class of the Group's financial assets and financial liabilities, together with their associated fair values, is set out below. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.

	Loans and receivables at amortised cost 2019 US\$'000	Liabilities at amortised cost 2019 US\$'000	Total carrying amount 2019 US\$'000	Fair value 2019 US\$'000
Other financial assets and financial liabilities				
Current trade and other receivables	8,966	-	8,966	7,704
Cash and cash equivalents	694	-	694	-
Trade payables	-	(1,064)	(1,064)	-
Amounts due to partners in Joint operations	-	(1,999)	(1,999)	-
Other payables and accruals	-	(4,674)	(4,674)	-
	Loans and receivables at amortised cost 2018 US\$'000	Liabilities at amortised cost 2018 US\$'000	Total carrying amount 2018 US\$'000	Fair value 2018 US\$'000
Other financial assets and financial liabilities				
Current trade and other receivables	7,906	-	7,906	7,369
Cash and cash equivalents	1,860	-	1,860	-
Trade payables	-	(1,042)	(1,042)	-
Amounts due to partners in Joint operations	-	(1,999)	(1,999)	-
Other payables and accruals	-	(3,575)	(3,575)	-

* The restated amounts relate to the inclusion in 2018 of amounts accrued

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

20 Financial instruments and risk management (continued)

Estimation of fair values

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted prices (unadjusted) in active markets for identical assets;

Level 2: other techniques for which all inputs have a significant effect on the recorded fair value are observable either directly or indirectly; or

Level 3: techniques which use inputs that are not based on observable market data.

Set out below are the major methods and assumptions used in estimating the fair values of the financial assets and liabilities set out in the table above.

Amounts due from/(to) partners in joint operations

The amounts receivable from/payable to partners in jointly controlled operations are expected to be settled within less than six months and so the carrying value is deemed to reflect fair value.

Trade and other receivables/payables

For the receivables and payables with a remaining maturity of less than six months or demand balances, the contractual amount payable less impairment provisions, where necessary, is deemed to reflect fair value. For long term receivables greater than one year the contractual amount has been discounted to reflect fair value using a level 2 technique.

Cash and cash equivalents including short-term deposits

For short-term deposits and cash and cash equivalents, all of which have a remaining maturity of less than three months, the nominal value is deemed to reflect the fair value.

Risk exposures

The Group's operations expose it to various financial risks that include credit risk, liquidity risk and market risk. The Group has a risk management programme in place which seeks to limit the impact of these risks on the financial performance of the Group and it is the Group's policy to manage these risks in a non-speculative manner.

This note presents information about the Group's exposure to each of the above risks, and the Group's objectives, policies and processes for measuring and managing the risk.

Trade and other receivables

The Group's exposure to credit risk is influenced by the individual characteristics of each customer. For trade receivables, credit checks are performed on new customers and appropriate payment terms are agreed with customers. There is a concentration of credit risk by dependence on the TPDC for revenues from gas sales. Trade receivables are monitored by review of the aged debtor reports.

The maximum gross exposure to credit risk for trade and other receivables arising from the Group as operator at the balance sheet date by geographic region was as follows:

	2019 US\$'000	2018 US\$'000
Tanzania	7,802	7,408

In accordance with IFRS 9, Aminex calculated its expected credit loss based on its exposure to credit risk on its trade receivables at the end of the period and recognised an impairment on trade receivables of US\$582,000 (2018: US\$309,000). The ECL is calculated using a net present value of outstanding receivables discounted by the discount rate that reflects counterparty credit risk, for a range of possible scenarios including delays and no payment with a probability assigned to each. The Group's trade receivables are due from one customer, the TPDC, which owes the Group trade receivables amounting to US\$7.80 million, of which Aminex's net share amounts to US\$3.23 million (see Note 15).

The Group's net exposure is reduced by related amounts due to its partners in Joint operations (see Note 17).

Amounts due from partners in joint operations

The Group assesses the creditworthiness of potential parties before entering into agreements with them and continues to monitor their creditworthiness. The aggregate of the amount due from partners in Joint operations is considered to be current and receivable with no provisions required.

Cash and short-term deposits

Cash and short-term deposits are invested mainly through the Group's bankers and short-term deposits are treasury deposits of less than one month.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

20 Financial instruments and risk management (continued)

Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group manages liquidity risk by monitoring rolling forecasts of expected cash flows against actual cash flows. The following are the contractual maturities of the financial liabilities including estimated interest payments and excluding the impact of netting agreements:

	Carrying amount 2019 US\$'000	Contractual cashflows 2019 US\$'000	6 months 2019 US\$'000	6-12 months 2019 US\$'000	1-2 years 2019 US\$'000	2-5 years 2019 US\$'000	More than 5 years 2019 US\$'000
Trade payables	1,064	1,064	1,064	-	-	-	-
Amounts due to partners in Joint operations	1,999	1,999	1,999	-	-	-	-
Other payables	1,456	1,456	456	-	1,000	-	-
Accruals	3,218	3,218	3,218	-	-	-	-
Lease liabilities	379	435	112	111	196	16	-
	8,116	8,172	6,849	111	1,196	16	-

	Carrying amount restated* 2018 US\$'000	Contractual cashflows restated* 2018 US\$'000	6 months restated* 2018 US\$'000	6-12 months 2018 US\$'000	1-2 years 2018 US\$'000	2-5 years 2018 US\$'000	More than 5 years 2018 US\$'000
Trade payables	1,042	1,042	1,042	-	-	-	-
Amounts due to partners in jointly controlled operations	1,999	1,999	1,999	-	-	-	-
Other payables	245	245	245	-	-	-	-
Accruals	3,330	3,330	3,330	-	-	-	-
	6,616	6,616	6,616	-	-	-	-

* The restated amounts relate to the inclusion in 2018 of amounts accrued

Amounts due to partners in Joint operations are only payable on receipt of amounts for trade receivables (Note 15).

Market risk

Market risk is the risk that changes in the market prices and indices which will affect the Group's income or the value of its holdings of financial instruments. The Group has four principal types of market risk being commodity prices, equity price risk, foreign currency exchange rates and interest rates.

Commodity price risk. The requirement for hedging instruments is kept under ongoing review. During the year, the Group did not enter into any commodity hedging transactions. General oil and gas commodity strategies are commented on in the Operations Report.

Foreign currency risk. The Group reports in US dollars, which is the currency of a large proportion of its trading income. The risk is managed wherever possible by matching foreign currency income and expenditures.

Interest rate risk. The Group's exposure to interest rate risk arises from cash and cash equivalents.

The Group's exposure to transactional foreign currency risk, for amounts included in trade and other receivables, cash and cash equivalents and trade and other payables (as shown on the balance sheet), is as follows:

	Sterling 2019 US\$'000	Euro 2019 US\$'000	US dollars 2019 US\$'000	Sterling 2018 US\$'000	Euro 2018 US\$'000	US dollars 2018 US\$'000
Cash and cash equivalents	103	15	135	403	2	36
Trade payables	116	10	2	153	121	-
	219	25	137	556	123	36

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

20 Financial instruments and risk management (continued)

Sensitivity analysis

A 15% strengthening or weakening in the value of sterling and the euro against the US dollar, based on the outstanding financial assets and liabilities at 31 December 2019 (2018: 15%), would have the following impact on the income statement. This analysis assumes that all other variables, in particular interest rates, remain constant.

	15% increase 2019 US\$'000	15% decrease 2019 US\$'000	15% increase 2018 US\$'000	15% decrease 2018 US\$'000
Cash and cash equivalents	38	(38)	66	(66)
Trade payables	(19)	19	(41)	41
	19	(19)	25	(25)
Tax impact	-	-	-	-
After tax	19	(19)	25	(25)

The Group finances its operations through a mixture of shareholders' funds, loans and borrowings and working capital. Board approval is required for all new borrowing facilities. The Group had no loans outstanding at the year end. There are no bank borrowings or overdraft facilities at year end. The Group's liquid resources were held in a mixture of current accounts and short-term deposits at the year end.

The interest rate profile of the Group's interest-bearing financial instruments at 31 December 2019 was as follows:

	Fixed rate 2019 US\$'000	Floating rate 2019 US\$'000	Total 2019 US\$'000	Fixed rate 2018 US\$'000	Floating rate 2018 US\$'000	Total 2018 US\$'000
Cash and cash equivalents	-	694	694	-	1,860	1,860

Cash flow sensitivity analysis

An increase of 100 basis points or decrease of 25 basis points in interest rates at the reporting date would have had the following effect on the income statement. This analysis assumes all other variables, in particular foreign currency, remain constant.

	100 bps increase profit 2019 US\$'000	25 bps decrease profit 2019 US\$'000	100 bps increase profit 2018 US\$'000	25 bps decrease profit 2018 US\$'000
Cash and cash equivalents	7	(2)	19	(5)
Tax impact	-	-	-	-
After tax	7	(2)	19	(5)

The Group has no interest bearing loans outstanding at 31 December 2019 and 31 December 2018. As there are no variable rate loans, there is no potential impact to profit and loss from a change in interest rates.

Company

The Company's approach to the management of financial risk is as set out under the Group disclosures above.

The accounting classification for each class of the Company's financial assets and financial liabilities, together with their fair values, is as follows:

	Loans and receivables 2019 US\$'000	Liabilities at amortised cost 2019 US\$'000	Total carrying amount 2019 US\$'000	Fair value 2019 US\$'000
Other financial assets and financial liabilities				
Amounts due from subsidiary undertakings	65,927	-	65,927	-
Cash and cash equivalents	214	-	214	-
Trade and other payables	-	(1,011)	(1,011)	-
Accruals	-	(378)	(378)	-
	Cash Loans and receivables 2018 restated* US\$'000	Liabilities at amortised cost 2018 restated* US\$'000	Total carrying amount 2018 restated* US\$'000	Fair value 2018 restated* US\$'000
Other financial assets and financial liabilities				
Amounts due from subsidiary undertakings	75,370	-	75,370	-
Cash and cash equivalents	483	-	483	-
Trade and other payables	-	(274)	(274)	-
Accruals	-	(395)	(395)	-

* The restated amounts relate to the inclusion in 2018 of amounts accrued

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

20 Financial instruments and risk management (continued)

Estimation of fair values

Amounts due from subsidiary companies

The amounts due from subsidiary companies are technically repayable on demand and so the carrying value is deemed to reflect fair value.

The estimation of other fair values is the same, where appropriate, as for the Group as set out above.

Risk exposures

The Company's operations expose it to the risks as set out for the Group above.

This note presents information about the Company's exposure to credit risk, liquidity risk and market risk, the Company's objectives, policies and processes for measuring and managing risk. Unless stated, the policy and process for measuring risk in the Company is the same as outlined for the Group above.

Credit risk

The carrying value of financial assets, net of impairment provisions, represents the Company's maximum exposure at the balance sheet date.

At the balance sheet date, there was deemed to be an increase in credit risk related to the loans due from subsidiary undertakings due to the value of the Group's exploration and evaluation and property, plant and equipment assets being impaired during the year. The loans are expected to be recovered from future revenues generated by the Group's assets in Tanzania. Consequently, a lifetime expected credit loss was calculated and their carrying value of the loans due from subsidiary undertakings written down by US\$12.3 million (2018: US\$31.4 million) (See Note 14). Arriving at the expected credit loss allowance involved considering different scenarios for the recovery of the intercompany loan receivables, the possible credit losses that could arise and the probabilities for these scenarios. The following was considered: the success of the Farm-Out, value of the potential reserves, project risks, the ability to achieve certain production levels. Third party valuation reports were used to support valuations where available. Details of the impairment to the Group's exploration and evaluation assets are discussed in Note 10 and the impairment against the Group's property, plant and equipment are discussed in Note 11.

The Directors are satisfied that no further impairment is considered to have occurred.

Liquidity risk

The liquidity risk for the Company is similar to that for the Group as set out above. Contractual cash flows on trade payables, borrowings amounting to US\$11,000 (2018: US\$274,000) fall due within six months of the balance sheet date. Repayment of the funding provided under the ARA Advance is due upon the earlier of completion of the Farm-Out and 30 June 2021.

The Directors have given careful consideration to the Company's and the Group's ability to continue as a going concern (see Note 1).

Market risk

The market risk for the Company is similar to that for the Group as set out above.

The Company's exposure to transactional foreign currency risk is as follows:

	2019 Sterling US\$'000	2019 Euro US\$'000	2018 Sterling US\$'000	2018 Euro US\$'000
Trade and other payables payables	<u>116</u>	<u>10</u>	<u>153</u>	<u>121</u>

Sensitivity analysis

A 15% strengthening or weakening in the value of sterling or the euro against the US dollar (2018: 15%), based on the outstanding financial assets and liabilities at 31 December 2019, would have no material impact on the income statement in the current or prior years. This analysis assumes that all other variables, in particular interest rates, remain constant.

The interest rate risk of the Company is similar to that of the Group as set out above. The interest rate profile of the Company's interest-bearing financial instruments at 31 December 2019 was as follows:

	Fixed rate 2019 US\$'000	Floating rate 2019 US\$'000	Total 2019 US\$'000	Fixed rate 2018 US\$'000	Floating rate 2018 US\$'000	Total 2018 US\$'000
Cash and cash equivalents	<u>-</u>	<u>118</u>	<u>118</u>	<u>-</u>	<u>404</u>	<u>404</u>

Cash flow sensitivity analysis

An increase of 100 basis points or decrease of 25 basis points in interest rates at the reporting date would have had the following effect on the income statement. This analysis assumes all other variables, in particular foreign currency, remain constant.

	100 bps increase profit 2019 US\$'000	25 bps decrease profit 2019 US\$'000	100 bps increase profit 2018 US\$'000	25 bps decrease profit 2018 US\$'000
Cash and cash equivalents	<u>2</u>	<u>(1)</u>	<u>4</u>	<u>(1)</u>
Tax impact	<u>-</u>	<u>-</u>	<u>-</u>	<u>-</u>
After tax	<u>2</u>	<u>(1)</u>	<u>4</u>	<u>(1)</u>

	4,589,343,064

No voting rights are attached to the deferred shares.

22 Share option reserve

The share option reserve represents the fair value of share options issued to Directors and employees.

During 2019, the Company awarded 115,411,000 options to Directors and staff (2018: 42,000,000 awarded to Directors and staff). The fair value of options granted in the period was US\$739,000 (2018: US\$581,000), of which US\$369,000 was expensed in 2019 (2018: US\$581,000). During the period 111,400,000 options expired (2018: 1,500,000) with a fair value of US\$815,000 (2018: US\$411,000). Further details regarding the issuance, lapse and expiry of share options are set out in Note 4.

23 Loss for the financial year

The Company Financial Statements have been prepared and approved by the Directors in accordance with EU IFRS and as applied in accordance with the Companies Act, 2014, which permit a company that publishes its company and group financial statements together, to take advantage of the exemption in Section 304 of the Companies Act 2014 from presenting to its members its Company income statement and related notes that form part of the approved Company financial statements. Of the consolidated loss after taxation, a loss of US\$13.9 million (2018: US\$32.3 million) is dealt with in the Company income statement of Aminex PLC.

24 Commitments, guarantees and contingent liabilities

Commitments exploration activity

In accordance with the relevant PSAs, Aminex has a commitment to contribute its share of the following outstanding work programmes:

- Following the grant of the first extension to the Nyuni Area PSA, Tanzania, the terms of the licence require the acquisition of 700 kilometres of 3D seismic over the deep-water sector of the licence, and the drilling of four wells, on the continental shelf or in the deep-water, by October 2019. In accordance with the terms of the Nyuni Area PSA, Aminex has applied in July 2019 for the licence to be extended into the Second Extension Period of three years with a request for an amendment to the work programme obligations for the licence area. The proposal is supported by the TPDC, which has submitted the proposal as licence holder to the Ministry of Energy.
- The Ruvuma PSA, Tanzania, originally comprised two licences. The Mtwara Licence was extended in April 2020 for a period of one-year, see further details in Note 28. Two wells are required to be drilled, one of which is expected to be the Chikumbi-1 location. The Lindi Licence expired in January 2017 and although the Company has previously sought an extension to the Lindi Licence, for which there remains a two-well commitment, it is unlikely it will pursue such extension.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

24 Commitments, guarantees and contingent liabilities (continued)

Guarantees and contingent liabilities

- (a) Under the terms of the Addendum to the Ruvuma PSA, Ndovu Resources Limited, a subsidiary company of Aminex PLC, has provided security to the TPDC for up to 15% of the profit share of the Kiliwani North Development Licence to guarantee the amended four-well drilling commitment under the Ruvuma PSA. For each well drilled the security interest will be reduced by 3% for the first well and 4% thereafter.
- (b) The Company guarantees certain liabilities and commitments of subsidiary companies from time to time, including the commitments of Ndovu Resources Limited under the Nyuni Area PSA. These are considered to be insurance arrangements and are accounted for as such i.e. they are treated as a contingent liability until such time as it becomes probable that the Company will be required to make payment under the guarantee in which case a liability is recognised.
- (c) On 11 April 2018, Ndovu Resources Limited received formal notification from the TPDC of certain claims amounting to US\$5.97 million against the Kiliwani North Development Licence with regard to unpaid royalties and amounts due under profit share arrangements which it proposes to offset against the trade receivable balance owing by the TPDC to Aminex (see Note 15). Of the amount claimed, Aminex has already accrued for the liabilities it considers appropriate based on its own calculations of amounts due as at 31 December 2019. Aminex has advised the TPDC that it does not accept the balance of the claims, which include computational inaccuracies. The Group has received legal advice in country that supports its position and this has been provided to the TPDC. No further provision has been made in the financial statements for the additional amounts claimed as the Directors believe the claims are without merit and are satisfied that the US\$7.80 million included in trade receivables as owing from the TPDC is recoverable.
- (d) As part of the US\$3 million advance funding arrangement ("Advance") entered into with ARA Petroleum LLC in November 2019, the Company agreed to grant a pledge over its shareholding in its wholly owned subsidiary, Tancoil NL, as security in the event the Farm-Out has not completed by 30 June 2020 and such advance funding converts to an interest-bearing loan.

Tanzanian Tax Assessment

On 28 February 2020 (see Note 28), following the conclusion of the TRA audit of Ndovu Resources Limited ("NRL"), the Group's Tanzanian wholly owned subsidiary, for taxation years 2013 to 2015, the TRA issued a tax assessment in respect of these taxation years. The following matters were raised in the assessments:

		Principal US\$'000	Interest US\$'000	Total US\$'000
Area				
Withholding tax	Withholding tax on payments made to non-residents for services performed outside of Tanzania	242	182	424
VAT	Output VAT on imported services	191	156	347
Withholding tax	Withholding tax on deemed interest	797	664	1,461
		1,230	1,002	2,232

NRL considers these claims without technical merit in tax law and, with the assistance of an in-country tax advisor, has submitted an objection to the TRA findings. At this stage it is unclear whether NRL will be successful in its objections and therefore the amount or timing of potential cash outflow remains uncertain. Provision has been made for amounts NRL has ceded or where management determine the likelihood of success through the objection or appeals process is unlikely.

25 Pension arrangements

The Group contributes towards the cost of certain individual employee and Director defined contribution pension plans. Annual contributions are based upon a percentage of gross annual salary. Pension contributions, which are charged to the Group income statement as incurred, amounted to US\$69,000 for 2019 (2018: US\$72,000).

26 Analysis of net funds

Group	At 1 January 2019 US\$'000	Cash flow US\$'000	At 31 December 2019 US\$'000

27 Related party transactions

The Company entered into the following transactions with its subsidiary companies:

	2019	2018
	US\$'000	US\$'000
Balances at 31 December		
Amounts owed by subsidiary undertakings	65,927	75,370

Details of loans advanced to subsidiary undertakings during the year are set out in Note 14.

Remuneration of key management personnel

The remuneration of the Directors, who are the key management personnel of the Group, is set out below. Information about the remuneration of each Director is shown in the Remuneration Report on pages 27 to 28.

	2019	2018
	US\$'000	US\$'000
Short-term benefits	970	1,092
Pension contributions	17	26
Share-based payments	229	24
	1,216	1,142

Directors' remuneration of US\$90,000 (2018: US\$80,000) is payable to Eclipse Investments LLC, a significant shareholder in Aminex PLC. The amount outstanding in respect of the Directors fees at 31 December 2019 was US\$116,000.

During the course of the year, the Group entered into the following related party transactions: fees for Interim Chief Executive Officer services to Aminex PLC amounting to US\$157,000 (2018: US\$47,000) which were paid to Upstream Solutions Limited, a company connected with Tom Mackay. Fees amounting to US\$2,000 (2018:US\$nil) which were paid to Auxilia Limited a company connected with Linda Beal, by Simpson Booth a recruitment agency to the Company.

The Group provided oilfield support services to ARA Petroleum LLC which, through its associated company, Eclipse Investments LLC, is a significant shareholder in Aminex PLC. The amount due from ARA Petroleum LLC at 31 December 2019 was US\$121,000 (2018: US\$nil).

On 11 July 2018, Ndovu Resources Limited, a subsidiary company, entered into a related party transaction through a farm-out agreement with The Zubair Corporation LLC which, through its associated company, Eclipse Investments LLC, is a significant shareholder in Aminex PLC. The effective date of the transaction was 15 March 2018. On 4 January 2019, the Company announced that shareholders approved the Farm-Out of a 50% interest in the Ruvuma PSA to The Zubair Corporation LLC at an extraordinary general meeting. Subsequent to the Farm-Out agreement being signed, The Zubair Corporation LLC has assigned its interest in the agreement to ARA Petroleum Tanzania Limited. The transaction remains subject to completion, including receipt of various approvals.

On 7 February 2019, the Company raised US\$2.36 million before expenses in a placing through the issue of 127,226,781 new ordinary shares at a price of Stg 1.45p per share. Eclipse Investments LLC, a substantial shareholder and a related party, subscribed for 26,525,198 new ordinary shares in the placing. Key management personnel subscribed for 4,137,928 new ordinary shares in the placing.

On 12 November 2019, the Company entered into a Funding Agreement with ARA Petroleum LLC, a related party of the Group, to provide a US\$3.0 million advance in instalments to the Company, ahead of Completion of the Farm-Out ("Advance"), which provides the Company with financial flexibility pending Completion. The Advance will be offset against the first tranche of the cash consideration payable to Aminex on Completion of the Farm-Out. The second tranche of the cash consideration of US\$2 million, which was initially due to the Company 180 days after Completion, will now be payable to the Company upon Completion. The long stop date for Completion of the Farm-Out has been extended to 30 June 2020. If Completion has not occurred by 30 June 2020, the Advance will convert to an interest-bearing secured loan, repayable by 30 June 2021. During 2019, US\$1.0 million of the advance had been received with US\$1.0 million recognised as a current liability at 31 December 2019.

Notes Forming Part of the Financial Statements

for the year ended 31 December 2019

28 Post balance sheet events

On 4 February 2020, the Company granted 8,000,000 options over Ordinary Shares to John Bell, in lieu of remuneration. The exercise price is Stg1.02p with the exercise period not exceeding five years from date of grant. The share-based payment charge arising from the grant will be charged to the income statement in the year ending 31 December 2020.

On 3 March 2020, Ndovu Resources Limited, a wholly owned subsidiary of the Group, received a tax assessment from the TRA in relation to a tax audit conducted by the TRA covering the period from 2013 to 2015 (see Note 24).

Since 31 December 2019, the Group has received a further US\$1.0 million under the Advance from ARA Petroleum LLC, a related party of the Group (see Note 27).

On 24 April 2020, Ndovu Resources Limited received a one year extension to the Mtwara Exploration Licence in respect to the Ntorya location. The extension is effective from 17 April 2020. This satisfies one of the conditions precedent of the Farm-Out. During the one year extension period the Group is committed to undertake acquiring 200 km² of 3D seismic (minimum expenditure of US\$7 million), drill the Chikumbi-1 exploration well (minimum expenditure of US\$15 million), complete the negotiation of the Gas Terms for the Ruvuma PSA with the TPDC and, using the data gathered from the Chikumbi-1 and seismic acquisition, prepare and submit an application for a Development Licence for the Ntorya Location area. It is acknowledged by the Group that the full work programme is unlikely to be completed during this one year extension period and therefore the Group will apply for an additional extension(s) as necessary and as permissible under the current legislation. Also in relation to the completion of the Farm-Out, the TRA have issued the CGT assessment on the Farm-Out of US\$2.2 million to be paid prior to government approval.

On 27 April 2020, Robert Ambrose was appointed interim Chief Executive Officer of the Company. Tom Mackay resigned as interim Chief Executive Officer and as a Director of Aminex.

The global impact of the COVID-19 virus is a non-adjusting event after the financial year end. To date, the Company has experienced no adverse material impact on its operations as a result of the COVID-19 virus. Further information has been provided in the Directors' Report and Principal Risks and Uncertainties.

29 Approval of financial statements

These financial statements were approved by the Board of Directors on 30 April 2020.

Senior Personnel

Aaron LeBlanc Chief Operating Officer

Aaron LeBlanc is a Geoscientist with over 18 years in oil and gas exploration, development and operations. He has worked in Western Canada, the Former Soviet Union, Europe, North Africa, East Africa, the Middle East and South-east Asia. His early career was spent with Devon Energy Corporation where he was an integral member of the Iron River oilfield development which saw production increase from 3,000 to 30,000 BBLS/d. Prior to joining Aminex he was Vice-President Exploration at Serinus Energy Inc and was a key member of the team that grew their Ukrainian gas production 10-fold through an aggressive drilling programme. As COO at Aminex he is responsible for operations in Tanzania and elsewhere when applicable.

Brian Cassidy General Counsel and Company Secretary

Brian Cassidy is a Solicitor qualified in England and Scotland. He has over 20 years' experience in the oil and gas industry, during which time he was based in the UK, Azerbaijan, Singapore, Hong Kong, China and South Korea. Before moving in-house, he held senior roles with Ledingham Chalmers LLP, McGrigors LLP and Clifford Chance LLP. Prior to joining Aminex PLC, he was Head of Legal and Company Secretary at Bowleven plc.

John Arthur Chief Financial Officer

John Arthur joined Aminex as Group Financial Controller in June 2018, and in November 2019 was promoted to the role of Chief Financial Officer. John is a qualified Chartered Certified Accountant with over 15 years' experience working in the oil and gas sector in a number of jurisdictions including Africa, Russia and Europe. John has extensive experience in Africa, specifically sub-Saharan Africa through previous senior held financial roles with Seven Energy where he worked from 2010 to 2018. John holds a Bachelor's degree in Economics and Accounting from the University of Plymouth.

Thierry Murcia Country Manager, Tanzania

Thierry Murcia has spent his career in commercial management and administration, primarily in Western Australia. Prior to joining Aminex and relocating to Tanzania, he worked for Caltex in various commercial and administrative capacities. Prior to Caltex he was an executive with BP Australia. Thierry Murcia holds an MBA from The University of Western Australia. He is currently resident in Dar es Salaam where he has day-to-day responsibilities for all Aminex's activities in Tanzania. Thierry was the Honorary Consul for Australia in Tanzania and continues to be active with relevant Tanzanian affairs.
